RE: BWIP

Dear Dr. Williams:

Under Subtask 2.2 of NRC Contract NRC-02-85-008, FIN D1020, I request that Williams and Associates review hydrogeologic aspects of Volumes I and II of the BWIP Exploratory Shaft Test Plan, BWI-TP-007, December 1984 [Enclosed]. Your review should focus particularly on determining whether the hydrologic tests proposed by BWIP appear to be adequate and appropriate to support characterization of the hydrogeology of the Reference Repository Location on the Hanford site. I anticipate that your review will require no more than 3 staff weeks of effort. Please send me your review before January 31, 1985. This completion date, however, may be postponed at my request if the planned BWIP-NRC meeting to discuss Phase II of the exploratory shaft is delayed.

The action taken by this letter is considered to be within the scope of the current contract NRC-02-85-008. This letter does not authorize changes to the cost or delivery of contracted services or products. Please notify me immediately if you believe this letter would result in changes to cost or delivery of contracted products.

Sincerely,

JS

Jeffrey A. Pohle, Project Officer
 Geotechnical Branch
 Division of Waste Management
