Dear Dr. Williams:

Under Subtask 2.2 of NRC Contract NRC-02-85-008, FIN D1020 please attend the BWIP Hydrology Meeting in Richland, Washington on December 9-11, 1985. In addition to yourself, I also request that Gerry Winter and Dale Ralston attend the meeting. The meeting will focus on BWIP's plans for large-scale hydraulic stress testing of groundwater systems in the Cold Creek Syncline, establishment of baseline hydraulic heads within the syncline, and integration of hydraulic testing with the installation of new piezometer nests, boreholes, and the exploratory shaft. In preparation for the meeting, you and Gerry Winter should attend a pre-meeting with NRC staff and contractors that will be held in Richland, Washington on Thursday, December 5. Please meet Michael Weber and John Linehan at the Rivershore Hotel in Richland by 10:00 am on December 5.

You should prepare for this meeting by reviewing BWIP and NRC documents that evaluate large-scale hydraulic testing and the establishment of baseline hydraulic heads at the BWIP site, such as NRC's Draft BWIP Site Technical Position 1.1; Summary Notes from NRC/DOE meetings on BWIP Hydrology held in 7/83, 6/84, 12/84, and 5/85; the draft BWIP Stage II Hydrology Test Plans (attachment to the letter from O. Olson to R. Wright dated November 2, 1984); and SD-BWI-DP-064. You should also prepare by reviewing the revised BWIP Hydrology Test Plan, which will be sent to you directly from BWIP sometime next week. If you have any questions about either the pre-meeting or the meeting, please contact Mr. Weber at telephone number (301) 427-4746.

The action taken by this letter is considered to be within the scope of the current contract NRC-02-85-008. This letter does not authorize changes to the cost or delivery of contracted services or products. Please notify me immediately if you believe this letter would result in changes to cost or delivery of contracted products.

Sincerely,

/s/

Jeffrey A. Pohle, Project Officer
 Geotechnical Branch
 Division of Waste Management
