RE: BWIP

Dear Dr. Williams:

Enclosed for your information please find a copy of Nuclear Waste Consultant's report entitled "Development of Groundwater Conceptual Flow Models for the BWIP Site." NRC's BWIP site hydrology team will discuss the concepts described in this report along with those in your conceptual model report in the future. Please contact Michael Weber if you have any questions or comments about the report. Also for your information, the Division of Waste Management announced on May 13, 1986, that May 27 will be the earliest possible start date for NRC's review of DOE's Final Environmental Assessments for candidate HLW sites.

The action taken by this letter is considered to be within the scope of the current NRC contract NRC-02-85-008. This letter does not authorize changes to the cost or delivery of contracted services or products. Please contact me immediately if you believe this letter would result in changes to cost or delivery of contracted products.

Sincerely,

151

Jeffrey A. Pohle, Project Officer  
Geotechnical Branch  
Division of Waste Management
