(Return to WM, 623-SS)

Dear Dr. Cranwell:

I have received and reviewed the July, 1984 monthly progress report for FIN-A1158 and have the following comments on both the monthly report and on other contract related activities.

Repository Site Definition

- The RSD for tuff appears to be rapidly progressing. Moisture characteristic curves for NTS have been calculated by both PNL and the USGS and should be available to the public within the next month or so (prior to release of the E.A.).

Technology Transfer

- The SWIFT II STC has been received and is undergoing staff review. I hope to have our comments to you by mid-September.
- Please keep me informed of the status of the LBL subcontract and of the resolution of the proprietary subroutine (MA28) restrictions. I would also like a copy of the subcontract after it is finalized and signed.

Miscellaneous

- The discussion of FY84 funding was not very clear. Also, I need to discuss with you the impact of the "additional" 110 K on the FY84 and FY85 funding levels.
- Please note that the monthly progress report arrived after the 15th was therefore late.
