Mr. Mark J. Logsdon, Project Manager
 Nuclear Waste Consultants, Inc.
 8341 S. Sangre de Cristo Road
 Suite 6
 Littleton, Colorado 80127

RE: BWIP

Dear Mr. Logsdon:

Under Subtask 2.3 of NRC contract NRC-02-85-009, FIN D1021, please review the report entitled "Groundwater Flow Modeling of Alternative Repository Concepts," SD-BWI-TA-015. The level of effort for this review should not exceed 2 staff weeks. Please forward your review of the document in WMGT format to me on or before October 31, 1986. Your review should focus on the validity of conclusions based on the groundwater flow simulations, especially the conclusion that less than 1% of repository groundwater migrates up the shafts to the accessible environment. We intend to use your review in support of NRC design reviews and identification of hydrogeologic information needs. Please contact Michael Weber if you have any questions about the review.

The action taken by this letter is considered to be within the scope of the current contract NRC-02-85-009. This letter does not authorize changes to the cost or delivery of contracted services or products. Please contact me immediately if you believe this letter would result in changes in cost or delivery of contracted products.
