Subject: Re: FW: remaining questions on thickness measuring device (resent)

We still have not received a response to our additional questions. We have an internal goal of turning around all cases for sealed sources and devices within 6 months. In order to meet these goals, we need to have fast turnaround time from applicants. However, based on the response time from Montessino on this application, we are in danger of not meeting our goals. Therefore, if I do not receive your response by the end of this week, I will assume that you are abandoning the application (you are free to resubmit it at a later date). If you need more time, let me know and we will close out this case and reopen in when you have submitted all of the required information. Please let me know you plans. Thanks.

Dear Mr. Tiktinsky:

My apologies for the delay in responding to your e-mail. We have arranged for the QA program and labeling information to be completed by the end of next week (August 1). We will then forward this to you immediately. If there is an issue with this timing, please let me know and we will see if this can possibly be accelerated. Otherwise, I will update you via e-mail next week to confirm the timing of our response. Thank you for your understanding.

Subject: remaining questions on thickness measuring device

The following are the remaining questions:

1. Provide a copy of the QA and QC program that will apply to products

entering the US. What we need here is the QA program that Montesino will apply when items are received from overseas (eg, visual inspections, documentation, etc). NRC reg guide 6.9 has more guidance on this program.

2. Provide drawing and label with Montesino name and address and other info in accordance with 10 CFR 32.51(a)(3). Also state the method of attachment of the label to the device. As a US distributor of a foreign product, these additional labels are required.

Please let me know if you have any other questions. I will be meetings most of this week but will check my email and phone messages periodically.
