**Subject:** Re: Response to RIC questions

Supplemental letter has not been received. Probably NRR should have lead and I will try to bring up on licensing call today. However, the licensee did make presentation to 0350 panel about this topic, so it is fair game for any panel member to discuss. Jon

>>> Christine Lipa 08/01/03 08:32AM >>>

Jon, do you know if we have recieved this "supplemental letter" and if not, when they plan to send in? Is this something the region or NRR should have the lead on obtaining/reviewing?

Thanks, CL

Jack, attached is the response that I prepared to respond to RIC questions. There is nothing earthshaking in here. I do not know if this response was ever posted to our website or issued. Darrell Roberts would know, but he is out until August 11. Jon

✓>>> John Grobe 08/01/03 08:11AM >>>

Jon,

If you get a chance, could you send me a copy of your RIC response for Lochbaum's questions so I know the "company line"? Thanks.

Jack

✓>>> Jon Hopkins 08/01/03 06:35AM >>>

Darrell, remember that I gave you a response to RIC questions from D. Lochbaum on the licensee's response to 50.54(f) on design basis. Has the response that I provided to you been posted to RIC website yet? While it does not answer each specific question from J. Riccio, it does have some good info. in it. Jon

✓>>> Darrell Roberts 07/31/03 06:17PM >>>

Jack,

I received this e-mail containing a concern (re: Davis-Besse's 50.54f response) and an excerpt from an old inspection report from Jim Riccio after I returned a phone call for Sam Collins today. Jim would like an answer to the question of whether we're going to address Davis-Besse's "failure" to satisfy the 50.54f requirement or their design basis before we allow them to restart. He says he's talked to you about this already.

I haven't provided him an answer, but I feel we should respond to his concern. Please call me (or Margie Kotzalas in my absence next week) about this.

Darrell
