Dear Mr. Mundell:

The NRC requests that Bureau of Mines personnel attend the following meetings.

1. The individuals working on the NNWSI project should attend an NRC/DOE technical meeting on Exploratory Shaft Facility Design on August 27-28 in Silver Spring, Maryland. In addition, on August 29, 1985, a pre-meeting will be held in Silver Spring for the NNWSI ESTP meeting.
2. The individuals working on the NNWSI project should attend an NRC/DOE technical meeting on the Exploratory Shaft Test Plan (ESTP) to be held in Las Vegas, Nevada on September 16-17, 1985.
3. As you have requested, I am endeavoring to set up a visit to the G-tunnel on the Nevada Test Site to look at the instrumentation that is being used and the experiments that are being performed, which are similar to those that will be performed in the Exploratory Shaft facility. The tentative date to this visit is September 18, 1985 (in conjunction with the ESTP workshop). It would also be useful for the individuals that will be involved in reviewing the ESTP's get a first hand view of the experiments that are being performed in the G-tunnel. In addition, it would also be useful if the project manager, Dr. Amey, attend the site visit to get a good working knowledge of the type of work that is being performed by the DOE at NNWSI and how the NRC and the BOM interact with the DOE. I will let you know when the date for this visit is confirmed.

The work described above should be performed under the Interagency Agreement between the U.S. Nuclear Regulatory Commission and the U.S. Bureau of Mines (NRC-02-80-075).
