MEMORANDUM TO: Larry W. Camper, Deputy Director  
Spent Fuel Project Office  
Office of Nuclear Material Safety  
and Safeguards

FROM: Mary Jane Ross-Lee, Senior Project Manager /RA/  
Licensing Section  
Spent Fuel Project Office  
Office of Nuclear Material Safety  
and Safeguards

SUBJECT: SUMMARY OF SEPTEMBER 4, 2003, MEETING WITH VIRGINIA  
ELECTRIC AND POWER COMPANY ON SURRY INDEPENDENT  
SPENT FUEL STORAGE INSTALLATION RENEWAL APPLICATION  
(DOCKET No. 72-2, TAC No. L23455)

On September 4, 2003, representatives of the Nuclear Regulatory Commission (NRC), and Virginia Electric and Power Company (Dominion), met in Surry, Virginia, to discuss Dominion's proposed responses to the Request for Additional Information (RAI), issued June 23, 2003, on the Surry Independent Spent Fuel Storage Installation (ISFSI) renewal application.

The purpose of the meeting was to discuss Dominion's proposed responses to each RAI question with the NRC technical review team. Dominion's RAI responses were due to the NRC on September 12, 2003.

Dominion presented a brief synopsis of their proposed responses as presented in the attached handout. The questions and responses were each discussed to ensure clarity and understanding of both the questions and proposed responses. Following the meeting, representatives from Dominion discussed the current schedule and impacts of additional clarifying information needed to make the responses complete. Due to the necessary time to prepare that information, Dominion stated that they would need additional time to submit their RAI responses. They proposed the end of September.

No regulatory decisions were made at the meeting. Future meetings will be held subsequent to the applicant's assessment of their needs.

An attendance list is included as Attachment 1. Attachment 2 includes the handouts provided at the meeting.

Docket No.: 72-2
