Dr. Nathan M. Sage
Associate Director
Division of Sponsored Research

AEL Copy.

Dear Dr. Sage:

Thank you for sending me copies of the proposed revisions by the Atomic Energy Commission of Code of Federal Register, Title 10 Part 40, entitled "Control of Source Material".

I have studied the proposed revisions and I am happy to report that, in my opinion, the changes contemplated are very desirable. With respect to M. I. T. procedures, the changes will be most helpful in expediting procurement of source material with a minimum of red tape.

I have also distributed copies of the proposed revisions to all members of the M. I. T. Radiation Protection Committee with a request for comments. The comments received have all been favorable and there have been no suggestions for additions or deletions.

Very truly yours,

Suzel Levin
