Dear Nailem:

The enclosed high-density diskette contains the current version of FLACT and a data file for the WIPP benchmark run. The data file uses the new thermal model described on the enclosed sheet. Note that this data file is too large for the non-DSI version of the program, so you will have to reduce the number of zones slightly. I suggest using one or two less zones in the x-direction.

I will send you data files for use in the analysis for our paper as soon as I have them made up.

Sincerely,

Mark G. Mack
