**Subject:** EXTENSION OF PG&E'S OPERATING AUTHORITY AT DAIBLO CANYON

Barry Zalcman, Senior Project Manager  
NRC

**SUBJECT: EXTENSION OF PG&E'S OPERATING AUTHORITY AT DAIBLO CANYON**

Dear Mr. Zalcman:

25

Please enter into the record of the upcoming hearing:

I reside in the Avila Valley in close proximity to the Diablo Canyon facility. In consideration of public welfare, it appears as irresponsible for there even to be a procedure whereby a nuclear energy facility can apply for operating license approval for the technologically distant future. It cannot be known at the present time whether a facility's components will become outdated in terms of safety and / or deteriorated. I urge that NRC not approve the subject (premature) license extension.

Sincerely,

Sherri Gooding
