MEMORANDUM TO: Stephen Dembek, Chief, Section 2  
Project Directorate IV  
Division of Licensing Project Management  
Office of Nuclear Reactor Regulation

FROM: Brian Benney, Project Manager, Section 2 **/RA/**  
Project Directorate IV  
Division of Licensing Project Management  
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF **CLOSED** MEETING HELD ON SEPTEMBER 11, 2003,  
WITH WESTINGHOUSE (TAC NO. MB1365)

On September 11, 2003, representatives of Westinghouse met with the NRC staff to discuss the use of alternate sources for powder and pellets for use in Westinghouse pressurized water reactors (PWRs).

Westinghouse discussed its plan for establishing the interchangeability of powder or pellets from alternate sources for use in Westinghouse PWRs. Westinghouse suggested that since the manufacturing process is controlled by Westinghouse that the final products are equivalent and should be interchangeable. Westinghouse also discussed their intention to mix powders from different manufacturing techniques to develop pellets under their process. Westinghouse ended the meeting with an equivalency demonstration. Following the meeting, the staff expressed its appreciation to Westinghouse for the presentation.

An attendance list is provided in the attachment. The non-proprietary slides used during the meeting are available in ADAMS under accession number ML032580297.
