EXPLANATION

- | | | | |
|--|---|--|---|
| | RECHARGE AREA | | Zone and numbers—properties of zones 10, 11, 14, and 23 were held constant; properties of other zones were allowed to vary. |
| | DISCHARGE AREA | | General area of ground-water discharge |
| | AQUIFERS AND BARRIERS (entire zone shaded) | | GWT |
| | Upper Cretaceous Aquifer | | Measured head in meters (Well name) |
| | Lower Cretaceous Aquifer | | Residual head in meters (Well name) |
| | Intrusive Rocks | | Area for which unit flux and flux sensitivities were calculated |
| | Other Hydraulic Barriers | | Discharge node |
| | TRANSMISSIVE ROCKS (only part of zone shaded) | | Boundary flux zero elsewhere |
| | Alluvium | | Boundary of ground-water basin |
| | Volcanic Rocks | | |
| | Carbonate Rocks | | |

ABBREVIATIONS
af. Alluvial Fan
dv. Death Valley
pv. Pahreng Valley
rs. Raining Springs
SWL Static Water Level

DRAWING NO. PLATE 3
TITLE: REGIONAL DISTRIBUTION OF HYDRAULIC PROPERTIES, ZONES, AND SITES OF UNIT-FLUX CALCULATIONS
REVISION:
