**Subject:** Approval to Publish NUREG/CR-6766  
**Place:** PUBS

Please publish the following NUREG/CR document in paper form:

**NUREG/CR-6766 "Release of Radionuclides and Chelating Agents From Full-System Decontamination Ion-Exchange Resins"**

This document has been reviewed based on Commission guidance (dated January 25, 2002) to the staff for developing final criteria for release of information to the public. Based on this sensitivity review, it has been determined that the content of NUREG/CR-6766 does not contain information that could provide a clear and significant benefit to a terrorist in a potential attack. The result of the review (attached) has been approved by Farouk Eltawila (D:DSARE), the cognizant RES Division Director.

Thanks,  
Gil Millman  
RES OCIO Liaison

Radiation Protection, Environmental Risk, and Waste Management Branch

Re: Approval for publication of NUREG/CR-6766 "Release of Radionuclides and Chelating Agents From Full-System Decontamination Ion-Exchange Resins", (Idaho National Engineering and Environmental Laboratory).

As project manager for the subject report, I reviewed the "camera ready" manuscript of NUREG/CR-6766 based on Commission guidance (dated January 25, 2002) to the staff for release of information to the public. Considering the Commission guidance, the content of NUREG/CR-6766 is benign and it contains no sensitive information that can be misused by those with malevolent intentions toward NRC-regulated facilities and activities.

Therefore I recommend publication of NUREG/CR-6766 and request that you transmit your concurrence via e-mail to the DSARE Division Director to approve and transmit approval via e-mail to the RES OCIO Liaison (Gil Millman).

Thank you,

Phillip Reed
