Re: "NRC Draft Generic Technical Position (GTP): Waste Package Reliability" (49 Federal Register 44,694) and "NRC Draft Issue-Oriented Site Technical Positions (ISTP's)" (49 Federal Register 45,285)

Dear Mr. Miller:

As you are aware, comments on the above referenced GTP are currently due January 7, 1985, while those on the ISTP's are due one week later, on January 14th. The Utility Nuclear Waste Management Group has undertaken to review these drafts. However, because of the press of other matters -- including, especially, review efforts directed toward the Department of Energy draft high-level waste repository site environmental assessments -- we do not anticipate being able to complete all comments until after these deadlines. Accordingly, we request that the review period for the GTP be extended one week, until January 14, 1985; and that the period for the ISTP's be extended until one month past the deadline for review of the DOE environmental assessments, i.e., until April 20, 1985.

Sincerely,

James B. Hall
