**SUBJECT: CFC LOGISTICS, INC., APPLICATION FOR AMENDMENT TO LICENSE,
CONTROL NO. 133717**

Dear Mr. Wood:

This is in reference to the letter dated September 24, 2003, from Ms. Marie Turner of your staff, which we have considered a request to amend Nuclear Regulatory Commission License No. 37-30804-02, as we explained in our letter dated September 29, 2003. We have concluded that the request does not have sufficient information to complete the review. Therefore, we are closing the action without additional review. If you decide to resubmit your request, it should be in the form of a request for an amendment to the license and should include the following information:

1. A detailed description of the proposed modifications to the plenum and a justification that incorporation of these modifications into the water and air circulation systems would improve the purging of the plenum.
2. Schematic drawings that illustrate the flow of fluids (air and water) through the purging lines that are connected to the plenum. The drawings should include the proposed changes to the systems described in Drawing Nos. 36763-016-000 and 36763-019-000.
3. Procedures that will ensure that during normal operations, the HEPA filter always remains in the air circulation loop as is described in the Drawing No. 36783-019-000.
4. Commitment that you will develop and implement a written procedure for purging the plenum after each installation and/or rearrangement of sources in the plenum. This should include a procedure for periodically checking the valves in the system for proper position.

In accordance with 10 CFR 2.790, a copy of this letter will be placed in the NRC Public Document Room and will be accessible from the NRC Web site at <http://www.nrc.gov/reading-rm.html>.

J. Wood
CFC Logistics, Inc.
