ALL AGREEMENT STATES, MINNESOTA, PENNSYLVANIA

TRAINING COURSE LIST FOR FISCAL YEAR 2004 (STP-03-076)

The Nuclear Regulatory Commission (NRC) staff has updated the list of courses for fiscal year 2004 that directly relate to the Agreement State programs (Enclosure 1). The list includes the tuition costs for those courses taught by contractors. The State is responsible for the travel and per diem expenses and tuition costs, as listed, if they wish to reserve a space in a specific course. Otherwise, State staff may attend on a space available basis. If no designation is noted on the application form, we will consider the application as a space available application.

We have also enclosed the standard application form (Enclosure 2). Please complete the application form for each person attending a course and submit it to the Office of State and Tribal Programs (STP), ATTN: Brenda Usilton. Applications may be submitted at any time; however, applications should be received by STP a minimum of at least eight (8) weeks prior to the beginning of the course. The decision to hold or cancel the course will be made at that time. Applications received after the eight week deadline will be considered if there is a cancellation by one of the students selected. This will be the case for paying applicants as well as space available applicants.

The complete list of all technical training courses can be viewed on the STP Home Page under Technical Training. If there is a "TBD" listed beside a course that means no date has been established. As dates for these courses are established, we will post them under the "What's New" area on our Home Page. Other changes to the course schedule will also be noted on the "What's New" area of the Home Page. Changes to technical training courses will also be made on the individual course descriptions and schedules.
