Proprietary Information Related to Reload Calculations for Crystal River 3

As part of its review of the license amendment request to support the fuel loading at Crystal River, Unit 3, Cycle 14, the NRC made a visit to Framatome ANP's offices in Lynchburg, VA on October 7, 2003. The purpose of the visit was to discuss and review selected calculational files associated with the results presented in the license amendment request associated with the fuel for cycle 14.

During this visit, Framatome ANP presented summaries of the results of these calculations, copies of which were provided to the NRC representatives. In addition, a copy of these summaries is enclosed. Framatome ANP considers one of these summaries to be proprietary. As required by 10 CFR 2.790(b), an affidavit is enclosed to support the withholding of this information from public disclosure. A non-proprietary version is also enclosed.

Three typographical errors were noted in the summaries during the discussion with the NRC and are explained below.

Presentation: Reload Analyses for CR-3 Cycle 14 Using the BHTP CHF Correlation

1)	Page 4	0.05 replaced by 0.06, 1.536 replaced by 1.546
2)	Page 10	1.77 replaced by 1.76
3)	Pages 11 and 28	Cycle 13 replaced by Cycle 14

The above corrections do not affect the conclusions presented and are consistent with the final documentation supporting CR-3 Cycle 14.

Very truly yours,

James F. Mallay, Director
Regulatory Affairs

AFFIDAVIT

COMMONWEALTH OF VIRGINIA)
) ss.
CITY OF LYNCHBURG)

1. My name is James F. Mallay. I am Director, Regulatory Affairs, for Framatome ANP ("FANP"), and as such I am authorized to execute this Affidavit.

2. I am familiar with the criteria applied by FANP to determine whether certain FANP information is proprietary. I am familiar with the policies established by FANP to ensure the proper application of these criteria.

3. I am familiar with the FANP information contained in the attachment to the letter from Framatome ANP (J.F. Mallay) to the NRC (NRC:03:066) of October 10, 2003, "Reload Analyses for CR-3 Cycle 14 Using the BHTP CHF Correlation." This attachment is referred to herein as "Document." Information contained in this Document has been classified by FANP as proprietary in accordance with the policies established by FANP for the control and protection of proprietary and confidential information.

4. This Document contains information of a proprietary and confidential nature and is of the type customarily held in confidence by FANP and not made available to the public. Based on my experience, I am aware that other companies regard information of the kind contained in this Document as proprietary and confidential.

5. This Document has been made available to the U.S. Nuclear Regulatory Commission in confidence with the request that the information contained in this Document be withheld from public disclosure.

6. The following criteria are customarily applied by FANP to determine whether information should be classified as proprietary:

(a) The information reveals details of FANP's research and development plans and programs or their results.

(b) Use of the information by a competitor would permit the competitor to significantly reduce its expenditures, in time or resources, to design, produce, or market a similar product or service.

(c) The information includes test data or analytical techniques concerning a process, methodology, or component, the application of which results in a competitive advantage for FANP.

(d) The information reveals certain distinguishing aspects of a process, methodology, or component, the exclusive use of which provides a competitive advantage for FANP in product optimization or marketability.

(e) The information is vital to a competitive advantage held by FANP, would be helpful to competitors to FANP, and would likely cause substantial harm to the competitive position of FANP.

7. In accordance with FANP's policies governing the protection and control of information, proprietary information contained in this Document have been made available, on a limited basis, to others outside FANP only as required and under suitable agreement providing for nondisclosure and limited use of the information.

8. FANP policy requires that proprietary information be kept in a secured file or area and distributed on a need-to-know basis.

9. The foregoing statements are true and correct to the best of my knowledge, information, and belief.

SUBSCRIBED before me this 10th day of October, 2003.
