

October 22, 3003

Mr. Ian C. Rickard, Licensing Project Manager
Regulatory Compliance and Plant Licensing
Westinghouse Electric Company
P.O. Box 500
Windsor, CT 06095-0500

SUBJECT: REQUEST FOR WITHHOLDING INFORMATION FROM PUBLIC DISCLOSURE
(AW-03-1703) (TAC NO. MB1365)

Dear Mr. Rickard:

By letter dated September 15, 2003, Westinghouse submitted an affidavit dated September 15, 2003, executed by you, requesting that information contained in the following presentation material to be used at an informational meeting with the Nuclear Regulatory Commission (NRC) staff on September 26, 2003, be withheld from public disclosure pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) Section 2.790.

"CROSSFLOW Signal Contamination: Root Cause and Corrective Actions"

A non-proprietary version of the presentation material was provided to the staff at the September 26, 2003, meeting for placement in the NRC's Public Document Room and for addition to the Agencywide Documents Access and Management Systems Publicly Available Records System (ADAMS PARS) Library. It is available under Accession No. ML032720961.

The affidavit stated that the submitted information should be considered exempt from mandatory public disclosure for the following reasons:

- (i) The information sought to be withheld from public disclosure is owned and has been held in confidence by Westinghouse.
- (ii) The information is of a type customarily held in confidence by Westinghouse and not customarily disclosed to the public.
 - (a) The information reveals the distinguishing aspects of a process (or component, structure, tool, method, etc.) where prevention of its use by any of Westinghouse's competitors without license from Westinghouse constitutes a competitive economic advantage over other companies.
 - (b) It consists of supporting data, including test data, relative to a process (or component, structure, tool, method, etc.), the application of which data secures a competitive economic advantage, e.g., by optimization or improved marketability.

- (c) Its use by a competitor would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing a similar product.

We have reviewed your application and the material in accordance with the requirements of 10 CFR 2.790 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains trade secrets or proprietary commercial information and should be withheld from public disclosure.

Therefore, we have determined that information contained in the presentation material entitled, "*CROSSFLOW* Signal Contamination: Root Cause and Corrective Actions," marked as proprietary, will be withheld from public disclosure pursuant to 10 CFR 2.790(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

If you have any questions regarding this matter, I may be reached at (301) 415-3764.

Sincerely,

/RA/

Brian Benney, Project Manager, Section 2
Project Directorate IV
