As the individual formerly responsible for the overall preparation of R.E. Ginna Nuclear Power Plant Application for Renewed Operating, Volume 2, Appendix E - Environmental Report (RG&E, 2002), I have reviewed the Subject Draft Supplemental Environmental Impact Statement and discussed my comments with the appropriate RG&E personnel. For your information, I have subsequently reviewed RG& EΓÇÖs comments on the Subject DSEIS (dated September 15, 2003), and have found that all of my concerns have been adequately incorporated therein.

Thank You,
