Subject: Fwd: Fire Protection Request for Assistance

Dave:

Re: Your email to me...I sent the attached to you last Thursday re: my recent interaction with the fire protection people (Phil Qualls specifically). There seem to be numerous parties with dogs in this show, with us being the "late comers." It would be most helpful, I think, for a coordination meeting of the interested/involved parties so everyone's singing from the same songbook. I perceived the request from Phil Qualls as relatively straight forward and innocuous. As a first step in putting out something for inspectors to consider, I thought his proposed "criteria" (albeit, general in scope) were worth flying as a trial balloon.

Jim
