

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

February 9, 1981

CHAIRMAN

MEMORANDUM FOR: Director, PE
FROM: John Ahearne *J Ahearne*
SUBJECT: WASTE CONFIDENCE PROCEEDINGS

The recently distributed report and summaries are excellent and should be of major use in advancing the proceeding. The working group has done fine work in producing a high quality product and in a short time.

Points made in the report lead to the following questions:

- What additional information would be required were the proceeding to also consider reprocessed waste?
- What would be the best approach to get this information?
- Regarding several areas where the working group believes additional information is needed, what would be the best approach to get this information?
