A.1 STATEMENT OF WORK

A.1.1 BACKGROUND

In August, 1998, 5 multimedia lecterns were installed in the classrooms at the U.S. Nuclear Regulatory Commission's Technical Training Center (TTC) in Chattanooga, TN. These lecterns were supplied through a contract with MediaVisions, Inc., and were manufactured by Mediatech, Inc. Each lectern provides the user with touch-control of classroom presentation equipment, including a high-resolution projector, a presentation PC, a UNIX workstation which serves as the platform for the Nuclear Engineering Workstation Simulator (NEWS), and a VCR. Additionally, a laptop can be connected and selected as the input. The lectern also controls the position of a video screen. Via the lectern's control interface, the user can control both video and audio from the selected input source and the lectern microphone, as well as a wireless microphone.

A.1.2 OBJECTIVE

The Contractor shall upgrade the hardware and software contained in the five multimedia lecterns, as described in the Scope of Work, to take advantage of advances made in the control system software and hardware, and to simplify their configuration to provide higher reliability and reduce lifecycle maintenance costs.

A.1.3 SCOPE OF WORK

The Contractor shall upgrade the hardware and software contained in the five multimedia lecterns located at the NRC's Technical Training Center in Chattanooga, TN, as follows:

1. The Contractor shall replace the internal audio and video components (switches, converters, etc.) (current equipment configurations are shown in Figures 1 and 2) with the minimum number required to maintain current capabilities and match the conceptual configuration shown in Figure 3.
2. The Contractor shall remove any unused parts and cables from the lecterns, including those associated with the unused laser videodisc interface.
3. The Contractor shall upgrade the Room Commander computer, control interface module, and software, using the existing touch screen unless it is not compatible.
4. The Contractor shall replace the existing projector video cables in all five classrooms with higher bandwidth cabling to ensure anomaly-free high resolution video projection.
5. The Contractor shall configure the software and hardware so that the lectern user can choose the existing VCR, presentation PC, Unix workstation, or laptop connection as the source for the video and audio output.
6. The Contractor shall configure the software and hardware so that the VCR video output can be previewed on the existing 9" black & white monitor.
7. The Contractor shall configure the software and hardware so that the presentation PC or Unix workstation video output can be displayed on the existing 17" LCD flat screen.
8. The Contractor shall configure the software so that the output of the projector can be blacked out, or muted, from the control touch screen.
9. The Contractor shall provide the appropriate documentation and drawings describing the new configuration.
10. The Contractor shall test all modes of operation of each upgraded lectern.

A.1.4 GOVERNMENT-FURNISHED EQUIPMENT

Subject to the terms of this contract, the Contractor shall be paid a percentage of the contract price reflecting the percentage of the work performed prior to the notice of termination, plus reasonable charges the Contractor can demonstrate to the satisfaction of the Government using its standard record keeping system, have resulted from the termination. The Contractor shall not be required to comply with the cost accounting standards or contract cost principles for this purpose. This paragraph does not give the Government any right to audit the Contractor's records. The Contractor shall not be paid for any work performed or costs incurred which reasonably could have been avoided.

(m) Termination for cause. The Government may terminate this contract, or any part hereof, for cause in the event of any default by the Contractor, or if the Contractor fails to comply with any contract terms and conditions, or fails to provide the Government, upon request, with adequate assurances of future performance. In the event of termination for cause, the Government shall not be liable to the Contractor for any amount for supplies or services not accepted, and the Contractor shall be liable to the Government for any and all rights and remedies provided by law. If it is determined that the Government improperly terminated this contract for default, such termination shall be deemed a termination for convenience.

(n) Title. Unless specified elsewhere in this contract, title to items furnished under this contract shall pass to the Government upon acceptance, regardless of when or where the Government takes physical possession.

(o) Warranty. The Contractor warrants and implies that the items delivered hereunder are merchantable and fit for use for the particular purpose described in this contract.

(p) Limitation of liability. Except as otherwise provided by an express warranty, the Contractor will not be liable to the Government for consequential damages resulting from any defect or deficiencies in accepted items.

(q) Other compliances. The Contractor shall comply with all applicable Federal, State and local laws, executive orders, rules and regulations applicable to its performance under this contract.

(r) Compliance with laws unique to Government contracts.
