OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

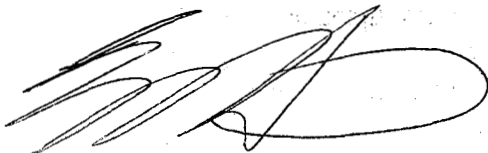

Attention: Docketing and Service Branch

Please accept this letter as a request for a public hearing on Sequoyah Fuels Corporation application to amend materials license SUB-1010 as noticed in the Federal Register on April 15, 2003.

1. My interests in the proceedings include the protection of:
 - a. my health and that of my family,
 - b. my home and acreage,
 - c. my livestock, and animals,
 - d. my personal property.
2. Improper design of the cell in the proposed environment, improper environmental characterization of the site, and introduction of non 11(e)(2) materials into the cell have the potential of detrimental physical effects on myself, family, property and the environment in which we reside and recreate.
 - a. I am an adjoining landowner of Sequoyah Fuels Corporation and their operations.
 - b. I own ten acres on which my home and animals are located and the same surrounded by the licensees property.
 - c. Possible effects of an improper reclamation plan include but are not limited to: adverse health effects, devaluation of property and physical property damage.

The information submitted by the applicant does not demonstrate that my interests will be protected or that adequate steps have been taken to protect the health and safety of the general public in the near future let alone in perpetuity as will be necessary given the long half lives and toxicity of the constituents proposed to be left on site.

Respectfully submitted on this date,

Ed Henshaw
