S. W. Phillips (Safety)	S W Phillips 10/7/88
J. M. Davenport (Regulatory Compliance)	J M Davenport 10/7/88

PREFACE

The focus of this review is to provide a Technical Assessment of the ESF Title I Design at 100 percent completion and to document the review comments and resolutions. The review purpose was to determine whether the design meets the criteria provided to the Architect-Engineers (A/Es) in the Project approved Title I Scope and Planning Documents, for a preliminary design.

To support the assessments required, the Yucca Mountain Project Office invited seventeen (17) reviewing and four (4) observing organizations to participate in the review process, of which fifteen (15) reviewing organizations participated. The reviewing organizations provided a total of fifty-one (51) reviewers representing the technical/scientific disciplines required for the technical review of the A/Es design drawing, specifications, etc.

The review process started on August 8, 1988 and was completed on September 9, 1988. The process developed eleven hundred and seventy-two (1172) comments, of which only five (5) remain in dispute by the reviewers. It is the responsibility of the reviewer to present his/her concerns in writing to the next higher level of project authority for a decision.

As part of the 100 Percent Title I ESF Technical Assessment Review (TAR) the design submitted by the Architect/Engineers (A/Es) was subjected to a review for compliance with 10 CFR 60. A proposed checklist of the regulations in 10 CFR 60 that apply to the design of the ESF, considering eventual incorporation into the repository system, was developed by the Nuclear Regulatory Compliance Division (NRCD) of the T&MSS contractor (SAIC). The list was developed using 10 CFR 60, input from other T&MSS staff members, and notes from recent NRC interactions. Prior to conducting the review, the NRCD presented this list to the organizations assigned the responsibility of conducting the compliance review. Assignments of responsibility were made by the NRCD and the Project participants based on the scopes of Project work of the participants. During two workshops a final checklist to be used by the organizations was finalized. The review itself consisted of the responsible organization assessing the compliance of the design with the assigned 10 CFR 60 regulation(s) and supplying a short justification of that assessment on forms provided by the NRCD. The reviewing organizations determined that the ESF design complied with 15 of the 20 applicable 10 CFR 60 regulations. Please note that an additional evaluation (of 10 CFR 60 - General Comment) was completed during the review. In all cases where the reviewers determined the design was not in compliance with the regulations, a comment was submitted to the proper Architect/Engineer (A/E). Listed below are the regulations to which the reviewers felt the ESF - design was not in compliance and the number of the comment made by the reviewer to the A/E addressing this non-compliance:

10 CFR 60 - General Comment	Comment No. S.MI.RES.004
10 CFR 60.75 - NRC Office Space	Comment No. T.AR.JMD.003
10 CFR 60.113(a)(1) -Postclosure Performance by Engineered Barrier System	Comment No. L.MI.DGW.018
10 CFR 60.133(b) - Flexibility of Design of Underground Facilities	Comment No. S.GE.TEB.001
10 CFR 60 -Subpart F -Performance Confirmation Program	Comment No. S.MI.RES.004

All comments submitted to the A/Es as a result of this exercise were dispositioned satisfactorily to both the reviewer and the A/E, indicating that the reviewer believed the design either complied with the regulation or would comply with the regulation once the agreed-upon action had been completed. For more details, see Section 7.0, Volume 2, "10 CFR 60 Compliance Review of this memorandum.

The Exploratory Shaft Facility Title I-100 Percent Design completion Technical Assessment Review was conducted in accordance with Quality Management Procedure QMP-02-08 and the approved plan, which among other requirements calls for the Technical Assessment Review Secretary to provide "Meeting Minutes" of the review activities, and "Review Record Memorandum". No attempt was made to produce a daily verbatim transcription of the interchange between the fifty-one Reviewers and their counterparts on the Architect-Engineers design teams. This decision is based upon the fact that the resulting culmination of the dialogue between the parties is represented in the final documentation of the Reviewer's Comments Sheets and the Architect-Engineers Comments Resolution Sheets as accepted by the parties, and this three Volume Review Record Memorandum constitutes relevant meeting minutes. Both sets of "records" referred to above have been included in Section 6.0 Volume 2 and Section 3.0 Volume 1 respectively of this memorandum. Where a workshop was conducted and meeting minutes were considered to be either useful or necessary, they have been provided, (i.e. "Concerns Related to 10 CFR 60" Section 7.0 Volume 2 of this memorandum).

Additionally, Reviewers were asked to verify that his/her organization's comments from the ESF Title I-50 Percent Design Review had been incorporated. The reviewer's responses are contained in either the reviewer's restatement of the comment in this review or in a separate stand alone statement, included in this document.

Lastly, from a review checklist, the Technical Assessment Review Committee Discipline Coordinators (TARC) prepared responses in accordance with their area of technical expertise. Section 1, Volume 1.0 Findings & Recommendations were developed from the Discipline Coordinates Responses. This Review Record Memorandum is a comprehensive document, which provides an in depth report of the Technical Assessment Review activities. Briefly, this memorandum includes the following key activities and/or documents:

- o The DOE approved Plan used to implement the QMP-02-08 review process.
- o Presentations to Reviewers provided to highlight the review process and the reviewers' responsibilities.
- o Identification of the reviewing organizations, their respective scopes, and qualified reviewers.
- o Comment and resolution acceptance documentation.
- o TARC Team Findings and Recommendations as appropriate, based on a checklist evaluation by TAR Team Members.
- o Comment Resolution Concurrence and Items in dispute process.
- o Other items as identified in the Table of Contents of this memorandum.

Review Date 8-8-88 Location Henderson, NV Time 8:00 a.m.

Technical Assessment Review Chairperson G. Kenton Beall (at 794-7829)

Based on review of the qualification documentation, this Technical Assessment Review Chairperson is qualified to execute the responsibilities of QMP-02-08 with respect to the scope and purpose of this Review.

Scope of Technical Assessment Review: Assess the Architect-Engineers specifications for the surface and underground works in satisfaction to the design basis requirements as provided by DOE/WMPO.

(See attached Plan)

Purpose of Technical Assessment Review: A WMPO Management Review to assess the accomplishment of the items identified in QMP-02-08 Section 3.1 and DOE Order 4700.1.

REVIEW NOTICE AND IDENTIFICATION OF REVIEWERS FOR THE TITLE I TECHNICAL ASSESSMENT REVIEW FOR THE EXPLORATORY SHAFT FACILITY (ESF) AT 100 PERCENT DESIGN COMPLETION

The U.S. Department of Energy, Nevada Operations Office, Waste Management Project Office (WMPO) will conduct a Technical Assessment Review of the ESF Title I Design at 100 percent completion. WMPO has approved the Title I Technical Assessment Review Plan (TARP) for the ESF at 100 Percent Design Completion. Science Applications International Corporation (SAIC) is the WMPO designee for the conduct of this Technical Assessment Review in accordance with the enclosed plan.

The review period is scheduled to start Monday, August 8, 1988, at 8 a.m. and run through September 13, 1988. Specific calendar day activities and overall schedules are as shown in the TARP enclosed, and will be conducted at the Henderson Convention Center, Henderson, Nevada.

In order to support these WMPO activities, your organization is requested to participate as a reviewer of the ESF designs prepared by the architect/engineers. WMPO has defined the scope of work for each reviewing organization, including the method for qualification of each reviewer regarding his/her area of technical expertise. These requirements are mandatory in order to satisfy WMPO quality assurance requirements.

Your organization is asked to indicate the review team members, including the team's Lead Representative, their qualifications (forms and example enclosed) and the organization's commitment for the review team members' participation in the review process. It is strongly urged, consistent with prior commitment or other schedule demands that, where practical, the same reviewer who participated in the ESF Title I Design Review at 50 percent completion be assigned to this currently planned review.

If you have any questions or need additional information regarding this matter, please contact Lester P. Skousen of my staff at (702) 794-7929 or FTS 544-7929 or G. Kenton Beall of SAIC at (702) 794-7829 or FTS 544-7829.

Science Applications International Corporation (SAIC) is the WMPO designee for the conduct of this Technical Assessment Review in accordance with the enclosed plan.

The review period is scheduled to start Monday, August 8, 1988, at 8 a.m. and run through September 13, 1988. Specific calendar day activities and overall schedules are as shown in the TARP enclosed, and will be conducted at the Henderson Convention Center, Henderson, Nevada.

In order to support these WMPO activities, your organization is requested to participate as a reviewer of the ESF designs prepared by the architect/ engineers. WMPO has defined the scope of work for each reviewing organization, including the method for qualification of each reviewer regarding his/her area of technical expertise. These requirements are mandatory in order to satisfy WMPO quality assurance requirements.

Your organization is asked to indicate the review team members, including the team's Lead Representative, their qualifications (forms and example enclosed) and the organization's commitment for the review team members' participation in the review process. It is strongly urged, consistent with prior commitment or other schedule demands that, where practical, the same reviewer who participated in the ESF Title I Design Review at 50 percent completion be assigned to this currently planned review.

If you have any questions or need additional information regarding this matter, please contact Lester P. Skousen of my staff at FTS 544-7929 or (702) 794-7929, or G. Kenton Beall of SAIC at FTS 544-7829 or (702) 794-7829.

WMPO PROFICIENCY REVIEW REPORT

N-QA-007
6/85

Review Date August 9, 1988

Name Roxanne D. Edwards Title General Engineer

The proficiency review is based on the experience, knowledge and training of the individual. The activites the individual is capable to perform are listed below.

Activities Ms. Edwards is qualifed to participate as a reviewer in both Title I and II Technical Assessment Reviews for the Exploratory Shaft Facility (ESF) based on a review of her education and experience. In addition to having a B.S. from Idaho State University (ISU) in General Engineering with a specialty in digital and control systems engineering, she has been trained in the DOE Project Management System while working at DOE. Prior to working at DOE, Ms. Edwards was employed by the College of Engineering at ISU as a teaching assistant in a digital systems lab and an electronics lab. As part of her job, Ms. Edwards reviews work plans, work effort, and technical and programmatic documents for technical content and consistency with regulatory requirements and DOE/OCRWM/OGR policies as they relate to the ESF. The review scope al includes compliance with project execution as a Major System Acquisition, as defined by DOE Order 4700.1A, and compliance with other applicable DOE Orders.

Review Date August 15, 1988

Name Dennis H. Irby Title General Engineer

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities Provides detailed guidance to contractors regarding project planning and coordination as it relates to the Exploratory Shaft Facility (ESF); assures that management information system/baseline is used and kept current for monitoring project progress and performance. Maintains knowledge of work excuted by contractors. Assures that the project is executed as a major systems acquisition, DOE Order 5700; reviews work plans, work effort, and technical and programmatic documents for technical content and consistency with regulatory requirements and DOE/OCRWM/OGR policies. Supports quality assurance audits and surveillance of contractors. Develops the triennial budget requirements for the Exploratory Shaft Facility WBS element. Maintains thorough knowledge of the design aspect to assure validity of the cost estimates submitted by the contractors. Assures that the contractors submit appropriate technical information and the necessary level of detail to support the field work package proposal/agreements. Acts on own initiative in a timely and responsible manner. Plans work and establishes priorities to maximize output. Utilizes effectively available project management tools to manage ESF portion of the project. Mr. Irby's educational background professional experience and training acquired since joining DOE makes him a qualified reviewer in conformance with QMP-02-08 requirements.

Review Date 8-8-88

Name Derrick Wagg Title Mining Engineer

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities Based on a review of Mr. Wagg's education and experience in underground design, construction and operation, he is fully qualified to serve in the above capacity. His duties and responsibilities include:

Mr. Wagg has over 30 years experience in senior engineering and management of production mining and mine development, specializing in shaft and slope construction and underground development.

As part of the Weston Technical Support Team to the Office of Civilian Waste Management, Mr. Wagg is responsible for the review and evaluation of various technical documents submitted to HQ by the project office for review and approval. He also provides technical guidance on mining related activities such as occupational safety, shaft and underground facility design and construction, equipment evaluation, and underground ventilation.

Review Date 8/5/88 Revised 8/12/88

Name John Marshall Davenport III Title Licensing Engineer

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities Prior to joining SAIC, Mr. Davenport had licensing experience as an employee of Battelle Memorial Institute. Prior to that, he participated in geologic field activities with TVA related to design and siting of nuclear plants under 10 CFR 50. He is qualified by education and experience for the position of Licensing Engineer. Mr. Daveport's duties include regulatory review of technical documents, assessment of applicability and implementation of regulatory requirements, review and comment on regulations, participation in NRC interactions, and development of regulatory positions. Mr. Davenport received a BA degree from the University of Tennessee in 1979. He has six years of experience related to nuclear siting and licensing activities.

Name Thomas H. Pysto Title Senior Environmental Scientist

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities Mr. Pysto is employed with SAIC as a Senior Environmental Scientist. He is assigned to the Nevada Nuclear Waste Storage Investigations (NNWSI) Project in the Environmental Regulatory Compliance Division. His work duties include coordinating and interfacing engineering activities with permitting requirements. He is involved with obtaining the applicable permits, preparing environmental compliance procedures, and conducting regulatory compliance inspections.

Before joining SAIC, Mr. Pysto was a project environmental biologist for Occidental Petroleum Corporation on their experimental mine site. His duties included: con ng environmental compliance inspections; reviewing and updating permits; resolving environmental compliance problems; and working with the various engineering departments to ensure environmental requirements were incorporated into all work plans.

Mr. Pysto received a B.S. degree in Wildlife Biology from Colorado State University in 1975. He has over 12 years of experience in the environmental field.

Name Robert H. Klemens Title QA Engineer

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities Performance of activities including but not limited to:

- o Preparation, planning, conducting, and performance of audits and surveillances
- o Procedure preparation and review
- o Review of technical documents for QA requirements
- o Training
- o Performing literature surveys on Waste Management subjects
- o Represent Manager of Audits & Surveillances during Manager's absence
- o Assist in administrative matters related to planning, scheduling and other administrative matters as required
- o Evaluate candidates for performing duties as auditors, technical specialists and lead auditors

Certification is based on 12 years of prior nuclear QA experience and the indoctrination into NNWSI Project requirements.

Education includes a BS in Engineering from the University of Pittsburgh.

Review Date August 9, 1988

Name Paul Talley Title Health and Safety Specialist

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities Based upon a review of Mr. Talley's education and employment history, he is fully qualified to serve on the Title II Technical Review Board. Mr. Talley is a high school graduate from Lead, South Dakota, including several college short courses. He was employed by Lithium Mine Corporation as a mechanic/hoist operator. Subsequently, Mr. Talley was a heavy equipment instructor/recovery specialist while in the Army. He was employed by Homestake Mining Company in various capacities including hoisting, mining, and assistant Safety Director. Presently Mr. Talley is employed by the Mine Safety and Health Administration: 5 years as a general mine inspector, 14 years as a mechanical specialist--hoists/shafts, cranes and wire rope. During his time with MSHA he is active in 30 CFR committee work, training instr rs throughout the States, mine rescue, nondistructive wire rope and Fib Rope "Kevlar", state-of-the-art design and testing, special projects, working with manufaturers and consultants, including Lilly/Logan hoist controllers.

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities Based upon a review of Mr. Mundell's education and employment history, he is fully qualified to serve on the Title II Technical Review Board. Mr. Mundell holds a B.S. degree in Mining Engineering from the Pennsylvania State University and has completed graduate courses in industrial ventilation and industrial hygiene at the University of Pittsburgh. He was employed by Republic Steel Corp., National Gypsum Company and Lee-Norse Co. in various capacities including underground surveyor, mine foreman, mine engineer and applications engineer. Subsequently, Mr. Mundell was employed by the Mine Health and Safety Administration, Dept. of Labor where he was responsible for completing engineering field studies including mine ventilation and respirable dust surveys. He later was promoted to group supervisor; in this capacity he supervised a number of field crews conducting engineering field studies. Mr. Mundell was also employed by Bituminous Coal Research, Inc. as a supervising mining engineer and is currently employed as a group supervisor with the U.S. Bureau of Mines, Dept. of Interior. Mr. Mundell has approximately 13 years total experience supervising a multi-disciplinary staff of professional engineers, scientists and technicians. Groups Mr. Mundell has supervised were responsible for conducting laboratory and field investigations and research projects at surface and underground mining operations. Mining

Name Stephen D. Francis Title Staff Member

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities Based upon a review of Mr. Francis' education and employment history, he is fully qualified to serve on the Title II and Title IV Technical Review Board. Mr. Francis has a BS degree in Mining Engineering from South Dakota School of Mines and Technology. He was employed by Gulf Mineral Resources at their Mount Taylor and Mariano Lake Mines, in the capacity of shaft inspector and shift boss respectively. He was then employed by American Mine Services as the Shaft Engineer. Duties included shaft design and supervision of installation of structural members within the shaft. Prior to his employment at LANL, he was employed by Phillips Uranium Corporation in the capacity of Senior Shaft Inspector, supervising four shaft inspectors. He subsequently assumed the duties of construction superintendent (acting), working directly under the construction manager. Mr. Francis' experience in his discipline exceeds a minimum of five years.

Review Date August 8, 1988

Name William A. Boss

Title Telecommunications & Scientific Cabling Management Specialist

The proficiency review is based on the experience, knowledge and training of the individual. The activites the individual is capable to perform are listed below.

Activites Based upon a review of Mr. W. A. Boss's education and employment history, he is fully qualified to serve on the Titles I & II Technical Review Board. He has been employed in a technician, supervisory and management capacity with over 25 years of proven accomplishments in the field of telecommunications. He has been employed with the US Department of Energy for approximately 12 years as Telecommunications & Scientific Cabling Management Specialist. This experience relates to all types of communications systems, such as VHF/UHF radio, microwave, CCTV and CATV, Fire and Security Alarm Systems telephone systems, and multiconductor, coaxial and fiber optic cables and interfacing equipment. Mr. Boss also spent four years in Saudi Arabia where he worked as Customer Relations Manager, over the telephone/telex and mobile radio services in a newly developed city of approximately 50,000 people. He also worked with Hughes Aircraft on the design, fabrication and final testing of the Surveyor TV camera for the first soft landing of a spacecraft on the moon. Prior experience consisted of telecommunications work at Fort Huachuca, Arizona and Holloman AFB in New Mexico.

Review Date August 11, 1988

Name Stewart A. Thomas Title General Engineer - Mining

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities Based on a review of Mr. S. A. Thomas's experience and employment history, he is fully qualified to participate as a Reviewer on the Titles I & II Technical Review Board. Mr. Thomas has been employed for 23 years in engineering, technical and supervisory positions in a variety of mining situations. His experience includes 13 years employment with a copper mining company which operated two large underground shaft mines, one a high-grade selective mining operation and the other a bulk-mined deposit employing block-caving methods. Mining operations were conducted at depths of 1700 feet to 4900 feet at rates up to 60,000 tons per day. The company operated shafts at these properties through which all utilities, materials, ore and waste transportation, ventilation and access were conducted for the direct underground support of 2000-2500 people (total employment was 6,000 to 7,000). During Mr. Thomas's employment, approximately 12,500 feet shafts were designed, constructed, equipped and placed in operation at these properties. Mr. Thomas's various responsibilities during this em-employment included preparation of mining and development plans, design and administration of surface and underground drilling programs, definition of ore reserves, mining limits, evaluation of rock mass characteristics as they relate to ground support and mining configuration, and preparation, calculation and maintenance of mineable ore reserves. Mr. Thomas was also directly involved in the shaft construction program for approximately 6 years, including a supporting raise drilling program. Subsequently, Mr. Thomas was

Review Date July 21, 1988

Name FRANK A. SPENIA Title Safety Professional II

The proficiency review is based on the experience, knowledge and training of the individual. The activites the individual is capable to perform are listed below.

Activities

Mr. Spenia's background and experience qualify him to review and comment on safety related items for the following activities:

Surface and underground construction, including shafts, drifts, ventilation, equipment, work locations, roads, shop, storage facilities and other related facilities to support the construction effort.

Mr. Spenia has hands on experience in, and a working knowledge of, pertinent safety codes and standards relating to both aboveground and underground construction.

Spenia holds an M.S. degree in Industrial Safety from West Virginia University and has eight years of working experience, most of it in tunnels at the Nevada Test Site.

Name JAMES L. BETTS Title Fire Protection Engineer

The proficiency review is based on the experience, knowledge and training of the individual. The activites the individual is capable to perform are listed below.

Activities

Based upon a review of Mr. Bett's education and employment history, he is fully qualified to perform as an Exploratory Shaft Facility Technical Reviewer. Mr. Betts has been employed by REECo as a Fire Protection Engineer for over nine years. One of his primary duties is to review and comment on engineering design drawings/specifications relative to fire protection and safety criteria (DOE orders, NFPA Standards, UBC, OSHA, MSHA, etc.) Prior to REECo, Mr. Betts was employed by the University of Texas for three years as the Fire and Safety Coordinator, and by St. Luke's Episcopal Hospital for two years as the Safety Director. In both of these previous jobs, Mr. Betts reviewed drawings/specifications as part of his routine assignments. Mr. Betts is a Certified Safety Professional and a member of the National Fire Protection Association.

Education

AAS Degree in Fire and Safety, University of Houston
BS Degree in Psychology, University of Houston.

6/85

Review Date August 4, 1988

Name LEONIDES J. FLORES Title Principal Engineer

The proficiency review is based on the experience, knowledge and training of the individual. The activites the individual is capable to perform are listed below.

Activities

Based on a review of Mr. Flores' education, employment history and experience, he is fully qualified to perform the following activities concerning the review of drawings and specifications for the ESF Design.

1. Review of all electrical drawings and specifications to assure constructibility, completeness, code compliance, and electrical safety.

2. Review of all other drawings to assure proper interfacing and to assure constructibility and safety.

Mr. Flores' qualifications are based upon the following work experience and education:

As an operations superintendent, electrical, for underground construction he was responsible for the installation of underground utilities, including power, instrument, and diagnostic systems at the Nevada Test Site tunnels from approximately 1965 to 1970. This also included power and controls for ventilation, dewatering, and reentry systems, plus supervision of general portal area work to support the systems mentioned above. In addition he supervised various construction crafts in constructing facilities for office and industrial use for approximately five years.

Name LOUISE G. CREVELT Title Contract Administration Branch/Section Chief

The proficiency review is based on the experience, knowledge and training of the individual. The activites the individual is capable to perform are listed below.

Activities

Based upon a review of Mrs. Crevelt's education, employment history, and experience, she is fully qualified to perform the following activities concerning the review of drawings and specifications for the ESF design.

1. Analysis of specifications and drawings for ambiguities which might result in contingency bidding.

2. Review of technical specifications to assure that they do not conflict with the subcontract terms and Conditions and Special Conditions.

3. Analysis of the drawings and specifications to assure that all required services and equipment are adequately defined for fixed price contracting.

Mrs. Crevelt's qualifications are based on nine and three-quarter years contract administration experience at REECo with four and one-quarter years as Contract Administration Branch/Section Chief, Construction. Ten years progressive experience in government procurement and contracting both in the United States and overseas, including more than two years as supervising purchasing agent and deputy contracting officer with full signature authority.

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities Based on a review of Mr. Potter's education and employment history, he is fully qualified to serve as a reviewer to the Title I and II Technical Assessment Review. Mr. Potter received a B.S. in Civil Engineering from Michigan Technological University in 1976. In July of that year he started work for the Corps of Engineers St. Paul District as a Hydraulic Engineer. His duties with the St. Paul District varied from designing dam spillways, developing a Standard Project Flood for a 40,000 square mile basin, and performing several dam break analyses. In 1981, Mr. Potter accepted an overseas assignment with the Corps of Engineers Pacific Ocean Division (POD). At POD, he conducted several flood studies for Hawaii, Guam, and Saipan. At the conclusion of the overseas tour, he was transferred to the Corps of Engineers Sacramento District where he presently serves as Civil Engineer with the Design Quality Assurance Section. Since 1985, Mr. Potter has reviewed approximately 300 projects for both the Army and the Air Force. Most recently, he has been made the section's point of contact for hazardous waste material designs.

Review Date May 4, 1988

Name Alvin Langstaff Title Senior Mining Engineer

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities Based upon a review of Mr. Langstaff's education and employment history, he is fully qualified to serve on the Title I 50% Design Review Board. Mr. Langstaff holds a B.S. degree in Mining Engineering from the Colorado School of Mines. He was employed by Amax Inc. at the Urad and Henderson mines in various capacities including ventilation engineer, mine planning engineer, underground surveyor, and blasting crew miner. Subsequently, Mr. Langstaff was employed by Cleveland Cliffs where he was responsible for completion of feasibility studies. Duties included design of mine layouts, ventilation system design, equipment selection and material handling system design. Prior to joining the SAIC T&MSS team he was employed by Westinghouse Hanford on the Basalt Waste Isolation Project where he was responsible for providing mining expertise and guidance for design of the BWIP exploratory shaft facility. Assignments included leading a study group reviewing changes in mine regulations, direction of Architect Engineer contractor and team leader of a group defining design recommendations for the underground facility. In his current position as Technical Support Representative liaison he is responsible for interface and coordination of design activities between project participants and the underground design A/E

Name Peter J. Karnoski Title Quality Assurance Engineer

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities Mr. Karnoski has a Bachelor of Science Degree in Mechanical Engineering and graduate credits in Nuclear Engineering. He has been associated with the nuclear industry since 1956, serving in increasingly responsible positions in nuclear design, construction, and quality assurance. His previous employers include Brown & Root, Martin Marietta, and Commonwealth Associates. His nuclear experience consists of the design, fabrication, and operation of reactor systems and refueling machinery. He has managed nuclear quality assurance organizations at construction sites and in the home office. Recently, he has participated in quality assurance audits of the Exploratory Shaft Facility Architect Engineers and has successfully completed Lead Auditor's training. He is registered as a professional engineer in 35 states. Based upon his education, experience, and knowledge of the Project, Mr. Karnoski is highly qualified for the position of Quality Assurance Engineer.

Review Date November 5, 1987

Name Margaret C. Brake Title Systems Engineer

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities Margaret C. Brake is currently employed as a Systems Engineer in the Systems Integration Branch of the T&MSS contractor (Science Applications International Corporation) to the U.S. Department of Energy Waste Management Project Office.

She had received BS degrees in Aerospace (1969) and Civil (1973) Engineering and an MBA (1984). She is a registered Civil Engineer in the state of California.

Her previous professional experience included positions in the nuclear testing program at the Nevada Test Site. During this time, she was the quality assurance representative for her department and was responsible for ensuring that DOE's requirements for implementing NQA-1 were carried out. She was a Level II NDE Engineer. She has also been the project engineer on several large construction projects. She managed the field engineering, scheduling, estimating, cost accounting, and material requisitioning for the construction of industrial buildings, office buildings, housing facilities, and their associated utilities.

Her present duties include the application of systems engineering techniques to the scientific and engineering aspects of the project, and the preparation of procedures to implement these techniques.

Based on Ms. Brake's educational background and professional experience, she is judged to be qualified for her present position.

Experience pertinent to NNWSI:

oAt NTS - Chief Mech. Engineer on 2 SNL designed and sponsored underground nuclear tests

oWaste Isolation Pilot Plant (WIPP)

-Principal in charge of underground design and equipment design for WIPP

-In charge of initial WIPP Land Ownership Survey

oNNWSI

-Developed initial waste handling equipment concepts

-Principal in charge of design of U/G facilities including shafts, ramps and drift layouts. In this role, responsible for:

-defining, directing and review of work performed by U/G Design A&E

-coordination of ESF/Repository Interface

TSP & QUALIFIED TO COMMENT ON ITEMS PERTINENT TO UNDERGROUND
S/PF DESIGNS, SHAFTS, RAMPS, AND MECHANICAL EQUIPMENT

Proficiency Report Conducted and Certified by

Signature Thomas E Blejwas Title Supervisor, Division 6313
Sandia Nat. Labs.

Date May 10, 1988

WMPO PROFICIENCY REVIEW REPORT

M-QA-007
6/85

Review Date May 13, 1988

Name Richard A. Dick Title Senior Staff Engineer

The proficiency review is based on the experience, knowledge and training of the individual. The activites the individual is capable to perform are listed below.

Activities Mr. Dick is experienced in all phases of excavation blasting and has an international reputation in the field. He has done consulting work for the governments of India and Mexico, Bureau of Reclamation, Corps of Engineers, National Park Service, Mine Safety and Health Administration and Office of Surface Mining. He has several publications that are widely read internationally. He has conducted numerous blasters training courses. He has been a technical representative for Atlas Powder Co., a blasting foreman for Kennecott Copper Corp. and a blasting researcher for the Bureau of Mines. He is proficient in explosives properties and selection, use of all blast initiation systems, priming techniques, blasthole loading, geological effects on blasting, surface and underground blast design, smoothblasting and presplitting, ground vibrations, airblast, flyrock, and blasting safety procedures. In addition to blasting, Mr. Dick is generally knowledgeable on other phases of surface and underground mining.

Proficiency Report Conducted and Certified by

Signature _____ Title Research Director

NOTE: This report should be completed on an annual basis.

WMPO PROFICIENCY REVIEW REPORT

N-QA-007
6/85

Review Date 5/9/88

Name Bruce Cantrell/B of M Title Supervisor, Dust Aerosol Technology/Group

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities February 1985 to present: U.S. Bureau of Mines: Research in the formation and control of respirable dust in underground mines, physical and chemical characterization of respirable mine aerosol, development of instrumentation to monitor in-mine diesel aerosol, and laboratory evaluation of diesel exhaust control technology.

August 1977 to February 1985: Senior Atmospheric Physicist, SRI-International: Research in physical and chemical characterization of atmospheric aerosol and pollutant gases, use of tracer gas techniques for plume dispersion measurement, and atmospheric field study design on both local and regional scales.

June 1972 to August 1977: Research Associate, University of Minnesota: Research in physical characterization of atmospheric aerosol, modeling of aerosol growth in the atmosphere, and field measurement of pollutant aerosol concentrations.

August 1966 to June 1972: Assistant Professor of Physics, Portland State University, Portland, Oregon.

Education: PhD. Experimental Nuclear Physics, Indiana University, Bloomington, Indiana.

Proficiency Report Conducted and Certified by

Signature James J. Olson Title Deputy Research Director Twin Cities Research Center Minneapolis, MN

NOTE: This report should be completed on an annual basis.

WMPO PROFICIENCY REVIEW REPORT

N-QA-007
6/85

Review Date 5/10/88

Name Rodric M. Breland Title Supervisory Mine Inspector
(MSHA Boulder City, NV)

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities I have been in the mining field for 19 years with 8 years experience as an MSHA Metal/Nonmetal Inspector and 4 years as the MSHA Boulder City, Nevada, field office supervisor. Prior to MSHA, I was an underground mine supervisor at Magma Copper Co. in Superior, Arizona. I have a degree in Mid-Management and recently completed requirements for a Masters Degree in Safety from Marshall University. Additionally, I have received extensive training from the MSHA Mine Academy. As the lead representative for MSHA on this project, I will be reviewing all of the MSHA reviewer comments. I am most concerned with Health and Safety issues.

Particular activities include:

MSHA Regulations and Policies

Ventilation

Hoisting

Dust and Noise

Lead, Haul, and Dump

Proficiency Report Conducted and Certified by

Signature Thomas C. Dykins Title Western District Manager MSHA

100 PERCENT TITLE I TECHNICAL ASSESSMENT REVIEW

AUGUST 8, 1988

OPENING REMARKS

- PURPOSE
  - TO PERFORM A COMPREHENSIVE, DOCUMENTED TECHNICAL ASSESSMENT REVIEW OF THE ESF TITLE I DESIGN ACTIVITIES AT 100 PERCENT COMPLETION
  - TO DETERMINE IF WORK TO DATE MEETS PROJECT AND PROGRAM REQUIREMENTS
  - TO DETERMINE COMPLIANCE OF ESF DESIGN WITH 10CFR60 REQUIREMENTS

OPENING REMARKS

- THE WMPO HAS GIVEN THE OVERALL TECHNICAL ASSESSMENT REVIEW RESPONSIBILITY TO TECHNICAL AND MANAGEMENT SUPPORT SERVICES (T&MSS)

- THE SPECIFIC REQUEST IS TO PERFORM THE REVIEW IN ACCORDANCE WITH:

  - QMP-02-08, TECHNICAL ASSESSMENT REVIEW

  - WMPO APPROVED TITLE I REVIEW PLAN FOR THE ESF AT 100 PERCENT COMPLETION

OVERVIEW OF REVIEW

- DESIGN PRESENTATION MEETING AGENDA
- DESIGN REVIEW BOARD
- DESIGN REVIEW SCHEDULE

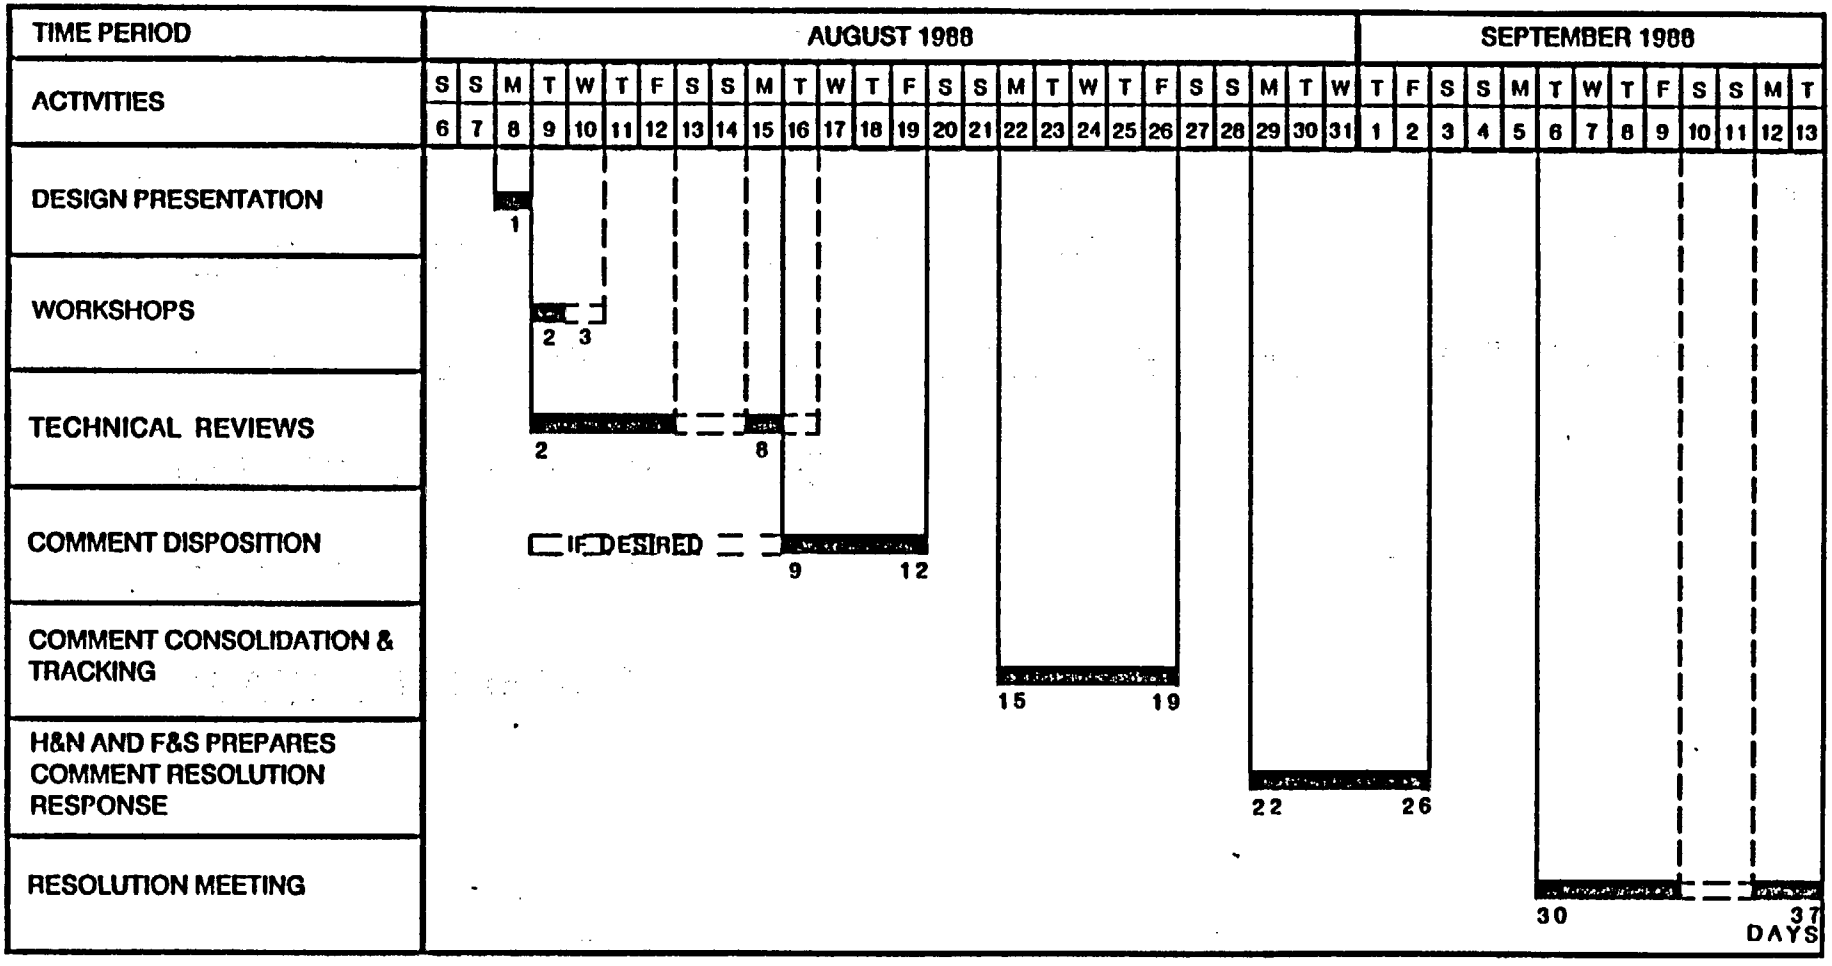
OCT 10	REVIEW RECORD MEMORANDUM (FINAL REPORT) TO THE WMPO AND REVIEWING ORGANIZATIONS

ESF TITLE I 100 PERCENT COMPLETION TECHNICAL ASSESSEMENT REVIEW SCHEDULE



ESFT1JR.PUB 6/17/1988

REVIEW PLAN OVERVIEW

- REVIEW PURPOSE
- OVERALL TECHNICAL ASSESSMENT REVIEW RESPONSIBILITY
- PARTICIPATING ORGANIZATIONS
- REVIEW RESPONSIBILITY OF PARTICIPATING ORGANIZATIONS
- VERIFICATION OF 50 PERCENT COMMENT RESOLUTIONS
- REVIEW PROCESS
- REVIEW RECORD MEMORANDUM
- WORKSHOPS

REVIEW PLAN OVERVIEW

REVIEW PURPOSE

THE PURPOSE OF THIS TECHNICAL ASSESSMENT REVIEW IS TO ENSURE THAT THE DESIGNS BEING PREPARED ARE:

- IN COMPLIANCE WITH REQUIREMENTS AND CRITERIA
- SAFE
- CONSTRUCTIBLE
- OPERABLE
- SUPPORT SITE CHARACTERIZATION

REVIEW PLAN OVERVIEW

OVERALL TECHNICAL ASSESSMENT REVIEW RESPONSIBILITY

- THE WMPO HAS GIVEN THE OVERALL TECHNICAL ASSESSMENT REVIEW RESPONSIBILITY TO T&MSS

- THE SPECIFIC REQUEST IS TO PERFORM THE REVIEW IN ACCORDANCE WITH:

  - QMP-02-08, DOCUMENT REVIEW/ACCEPTANCE/APPROVAL

  - WMPO APPROVED TITLE I - REVIEW PLAN FOR THE ESF AT 100 PERCENT COMPLETION

REVIEW PLAN OVERVIEW

PARTICIPATING ORGANIZATIONS

1. U.S. DEPARTMENT OF ENERGY/HEADQUARTERS (DOE/HQ)
2. NEVADA OPERATIONS OFFICE, SAFETY AND HEALTH DIVISION (NVO/SHD)
3. NEVADA OPERATIONS OFFICE, HEALTH PHYSICAL AND ENVIRONMENTAL DIVISION (NVO/HPED)
4. NEVADA OPERATIONS OFFICE, PHYSICAL SECURITY AND SAFETY DIVISION (NVO/SSD)
5. NEVADA TEST SITE OPERATIONS (NTSO)
6. WASTE MANAGEMENT PROJECT OFFICE (WMPO)
7. WESTON
8. TECHNICAL & MANAGEMENT SUPPORT SERVICES (T&MSS)
9. U.S. ARMY CORPS OF ENGINEERS (USACE)
10. MINE SAFETY AND HEALTH ADMINISTRATION (MSHA)
11. BUREAU OF MINES (BOM)
12. REYNOLDS ELECTRICAL AND ENGINEERING COMPANY (REECo)
13. LOS ALAMOS NATIONAL LABORATORY (LOS ALAMOS)
14. U.S. GEOLOGICAL SURVEY (USGS)
15. SANDIA NATIONAL LABORATORIES (SNL)
16. LAWRENCE LIVERMORE NATIONAL LABORATORY (LLNL)

OBSERVING ORGANIZATIONS

1. U.S. NUCLEAR REGULATORY COMMISSION (NRC)
2. THE STATE OF NEVADA
3. UNIVERSITY OF NEVADA (UNLV AND UNR)

REVIEW PLAN OVERVIEW

REVIEW RESPONSIBILITY OF PARTICIPATING ORGANIZATIONS

ORGANIZATIONAL WORKSCOPES FOR THE TECHNICAL ASSESSMENT REVIEW ARE DEFINED IN FIGURE 4 OF THE APPROVED REVIEW PLAN

1. DOE/HQ/Weston - Review for compliance to Program Requirements, constructibility, operations, maintenance, and safety (10 CFR 60).

2. REECo - Review for constructibility, use of standard construction practices, quality control, operations, maintenance, and safety (industrial/worker).

3. SAIC - Review of general compliance with Program Requirements, standard construction practices, and environmental permitting compliance, and regulatory compliance.

4. WMPO - Review for general compliance with Program Requirements.

5. COE - Review for general compliance with regulations for site preparation and civil works, constructibility, and use of standard construction practices.

6. MSHA - Review for general compliance with MSHA regulations and standard safety practices, and for use of standard construction practices.

7. B of M - Review for mining technology applications with respect to controlled blasting and blast effect on instrumentation, dust abatement and control, diesel emissions at surface and underground works, and drift and pillar stability design.

8. USGS - Review for adequacy to support ESF in situ characterization testing needs.

9. SNL - Review for general compliance with site and engineering properties data base identified in the RIB, adequacy to support ESF in situ site characterization testing needs, and compatibility of ESF permanent items which will be incorporated into the repository. Design features of the ESF for regulatory compliance with 10 CFR 60 requirements, as defined in the DOE Generic Requirements Document, Appendix E for the ESF.

10. LLNL - Review for general compliance with the waste package interfaces and for adequacy to support ESF in situ site characterization testing needs.

11. Los Alamos - Review for adequacy to support in situ site characterization testing needs.

12. NVO/SHD - Review for compliance to health and safety regulations.

13. NTSO - Review with respect to security concerns and for compatibility/interface with present on-site utilities, buildings, roads, maintenance facilities, etc.

14. NVO/SSD - Review with respect to physical security concerns.

15. NVO/HPED - Review for environmental compliance with regulations.

FIGURE IV

SCOPE OF WORK FOR REVIEWING ORGANIZATION

REVIEW PLAN OVERVIEW

VERIFICATION OF 50 PERCENT COMMENT RESOLUTIONS

- REVIEWERS TO COMPARE CURRENT DESIGN WITH THE APPROVED RESOLUTIONS OF THEIR PREVIOUS COMMENTS
- LEAD REVIEWER TO VERIFY SATISFACTORY INCORPORATION OF RESOLUTIONS
- THE APPROVED RESOLUTIONS TO THE (ORGANIZATION NAME) COMMENTS SUBMITTED AT THE 50 PERCENT ESF TITLE I DESIGN REVIEW HAVE BEEN SATISFACTORILY INCORPORATED INTO THE ESF TITLE I DESIGN AT 100 PERCENT COMPLETION
- IF EXCEPTIONS EXIST, ADD - WITH THE FOLLOWING EXCEPTIONS: (RE-STATE INDIVIDUAL COMMENT IN EXCEPTION)

REVIEW PLAN OVERVIEW

REVIEW PROCESS

- OBTAIN DETAILED INFORMATION AND ASK QUESTIONS ABOUT SPECIFIC TECHNICAL/DESIGN TOPICS DURING WORKSHOPS

- DEVELOP COMMENTS ON THE DRAWINGS AND SPECIFICATIONS IN ACCORDANCE WITH THE APPROVED REVIEW PLAN

- COMMENTS CHECKED BY ORGANIZATIONS LEAD REPRENTATIVE FOR APPROPRIATENESS AND CONFLICTS

REVIEW PLAN OVERVIEW

REVIEW PROCESS
(CONTINUED)

- COMMENTS REVIEWED AND DISPOSITIONED BY REVIEW SECRETARY AND/OR REVIEW COORDINATOR
- ACCEPTANCE BY REVIEWER
- CONSOLIDATION BY CATEGORY
- TRANSMITTAL TO A/E FOR PROPOSED RESOLUTION
- RESOLUTION
- REVIEW RECORD MEMORANDUM

REVIEW PLAN OVERVIEW

REVIEW RECORD MEMORANDUM

THE TECHNICAL ASSESSMENT REVIEW CHAIRMAN WILL ISSUE A REVIEW RECORD MEMORANDUM (FINAL REPORT) TO THE WMPO AND REVIEWING ORGANIZATIONS 27 DAYS AFTER THE FINAL COMMENT RESOLUTION MEETING. THE REPORT WILL CONTAIN:

- ALL COMMENTS SUBMITTED ON THE REVIEWERS COMMENT SHEET (FORM N-ES-001) FOR DISPOSITIONING
- ALL COMMENTS SUBMITTED TO A/Es WITH AGREED UPON RESOLUTIONS
- SUMMARY OF MAJOR FINDINGS DURING THE REVIEW
- TECHNICAL ASSESSMENT REVIEW SUPPORTING DOCUMENTATION

REVIEW PLAN OVERVIEW

WORKSHOPS
TUESDAY, AUGUST 9, 1988, ROOM 3

TIME	SUBJECT	BY
8:00 am	COMMUNICATIONS - SURFACE AND UNDER-GROUND	H&N

TECHNICAL ASSESSMENT REVIEW

TECHNICAL ASSESSMENT REVIEW

DEFINITION

A DOCUMENTED EVALUATION OF TECHNICAL STATUS, TECHNICAL PROGRESS, OR TECHNICAL MERIT, IN COMBINATION OR SEPARATELY

TECHNICAL ASSESSMENT REVIEW

A MANAGEMENT METHOD TO:

1. ASSESS REQUIREMENTS
2. DETERMINE DEGREE TO WHICH TECHNICAL WORK MEETS REQUIREMENTS
3. IDENTIFY TECHNICAL ISSUES IN TIMELY FASHION SUCH AS INTERFACES WITH SITE AND DESIGN EFFORTS
4. ASSESS TECHNICAL STATUS OR PROGRESS OF ACTIVITIES
5. PROVIDE BASIS TO ACCEPT TECHNICAL SERVICES RENDERED
6. DEFINE AND DIRECT NECESSARY CHANGES IN ACCORDANCE WITH WMPO PROCEDURES

TECHNICAL ASSESSMENT REVIEW PROCEDURE

WMPO BRANCH CHIEF - PLANS, SCHEDULES AND ANNOUNCES TECHNICAL ASSESSMENT REVIEW - DESIGNATES CHAIRPERSON

CHAIRPERSON

- DETERMINES TECHNICAL DISCIPLINES TO BE USED
- ESTABLISHES MINIMUM QUALIFICATIONS NEEDED BY TEAM MEMBERS
- OBTAINS AND ENSURES SUITABILITY OF DOCUMENTATION OF TEAM MEMBERS' QUALIFICATIONS
- OBTAINS INFORMATION FOR REVIEW FROM APPROPRIATE TPO

TECHNICAL ASSESSMENT REVIEW

PROCEDURE

- COMMENTS DOCUMENTED

TEAM MEMBERS

- REVIEW MATERIAL AND DOCUMENT COMMENTS

- A "NO COMMENT" IS DOCUMENTED

TECHNICAL ASSESSMENT REVIEW RESOLUTION OF COMMENTS

CHAIRPERSON

- OBTAINS RESOLUTIONS FROM TPOs
- COORDINATES TEAM'S EVALUATION OF RESOLUTIONS
- REFERS CONFLICTS (DISPUTES) TO TPOs FOR RESOLUTION
- PROVIDES DOCUMENTED RESOLUTIONS OF CONFLICTS TO REVIEWERS

REVIEWER

- EVALUATES DOCUMENTED RESOLUTION
- AGREES OR DISAGREES
- SIGNS, DATES, AND RETURNS TO CHAIRPERSON
- DOCUMENTS DISAGREEMENT BY LETTER TO OWN OR WMPO MANAGEMENT

TECHNICAL ASSESSMENT REVIEW

REVIEW RECORD MEMORANDUM

- ISSUED BY CHAIRPERSON TO WMPO BRANCH CHIEF FOR DISTRIBUTION

- DOCUMENTED SUMMARY OF TECHNICAL ASSESSMENT REVIEW INCLUDES:

  - SCOPE OF REVIEW
  - NOTICE OF REVIEW
  - REVIEW MEETING MINUTES
  - TEAM SELECTION RECORD
  - COMMENT RECORDS
  - LIST OF ATTENDEES
  - RELATED CORRESPONDENCE
  - INFORMATION PRESENTED DURING REVIEW
  - CONCLUSIONS AND RECOMMENDATIONS

TECHNICAL ASSESSMENT REVIEW

CLOSURE OF RESOLUTIONS

WMPO BRANCH CHIEF ENSURES THAT TPO SATISFIES AND CLOSES OUT COMMITMENTS MADE IN RESOLUTIONS

TECHNICAL ASSESSMENT REVIEW DOCUMENTATION

CHAIRPERSON COMPILES DATA PACKAGE

- TECHNICAL ASSESSMENT REVIEW PACKAGE (INFORMATION ASSESSED DURING REVIEW)
- REVIEW RECORD MEMORANDUM

TECHNICAL ASSESSMENT PROCESS

ESF TITLE I 100% TECHNICAL ASSESSEMNT REVIEW

COMMENT RESOLUTION CONCURRENCE

THE REVIEW TEAM LEAD REPRESENTATIVE CONCURS WITH ALL THE RESOLUTIONS DEVELOPED FOR ALL OF THE COMMENTS SUBMITTED BY HIS ORGANIZATION DURING THE TECHNICAL ASSESSMENT REVIEW COMMENT AND RESOLUTION ACTIVITIES.

ORGANIZATION NAME: _____

LEAD REPRESENTATIVE NAME: _____

LEAD REPRESENTATIVE SIGNATURE: _____

DATE: _____

TECHNICAL ASSESSMENT PROCESS

DEVELOPMENT OF FORMAL COMMENTS

- COMMENTS MADE AND CHECKED BY REVIEWER
- HANDWRITTEN COMMENTS SUBMITTED TO T&MSS FOR TYPING
- COMMENTS DRAFT TYPED ONTO REVIEWER'S COMMENT SHEETS (FORM NES010)
- TYPED COMMENTS CHECKED BY REVIEWER; CORRECTIONS NOTED ON TYPED FORM
- LEAD REPRESENTATIVE REVIEWS COMMENTS FOR COMPLIANCE WITH COMMENT REQUIREMENTS

TECHNICAL ASSESSMENT PROCESS

DEVELOPMENT OF FORMAL COMMENTS
(CONTINUED)

- CORRECTIONS MADE BY TYPING ONTO CLEAN SHEETS; COMMENT NUMBERS ASSIGNED BY T&MSS
- TYPED COMMENTS RECHECKED BY REVIEWER
- REVIEWER SUBMITS CORRECTED COMMENT SHEETS TO DESIGN REVIEW SECRETARY OR REVIEW COORDINATOR AFTER LEAD REPRESENTATIVE INITIALS EACH SHEET ABOVE COMMENTS COLUMN

TECHNICAL ASSESSMENT PROCESS

DEVELOPMENT OF FORMAL COMMENTS
(CONTINUED)

- REVIEWER AND DESIGN REVIEW SECRETARY AND/OR REVIEW COORDINATOR AGREE ON APPROPRIATENESS OF COMMENTS (COMMENTS CAN BE REVISED OR DELETED), AND PROPOSED DISPOSITION

- REVIEWER SIGNS FRONT PAGE OF DISPOSITIONED COMMENT SHEETS

- SECRETARY AND/OR REVIEW COORDINATOR NOTES DISPOSITION ON COMMENT SHEETS AND INITIALS FRONT PAGE OF COMMENT SHEETS

TECHNICAL ASSESSMENT PROCESS

DEVELOPMENT OF FORMAL COMMENTS

- TECHNICAL ASSESSMENT REVIEW BOARD IS RESPONSIBLE FOR CONSOLIDATING ALL COMMENTS FOR TRANSMITTAL TO A/Es

- COMMENTS SUBMITTED WILL BE REVIEWED BY THE REVIEW SECRETARY AND DISCIPLINE COORDINATORS FOR APPROPRIATENESS
  - STYLE (HOW WORDED)
  - CONTENT (PERMISSIBLE REVIEW SCOPE)
  - WITHIN ORGANIZATION'S ASSIGNED SCOPE, WITHIN PERSON'S EXPERTISE

TECHNICAL ASSESSMENT PROCESS

DEVELOPMENT OF FORMAL COMMENTS
(CONTINUED)

- COMMENTS DEEMED INAPPROPRIATE BECAUSE OF:

  - STYLE - SUGGESTIONS WILL BE MADE FOR MAKING THEM APPROPRIATE

  - OTHER REASONS - DISPOSITION WILL BE TO SUGGEST THEY BE WITHDRAWN OR NOT TRANSMITTED TO THE A/Es

TECHNICAL ASSESSMENT PROCESS

COMMENT RESOLUTION

- EACH COMMENT WILL BE CONSIDERED BY THE APPROPRIATE A/E AND A RESOLUTION WILL BE PROPOSED BY THEM

- THE PROPOSED RESOLUTION CAN BE TO:

  - AGREE WITH COMMENT AND MAKE NECESSARY CHANGE

  - DISAGREE WITH COMMENT

TECHNICAL ASSESSMENT PROCESS

COMMENT RESOLUTION

- EACH PROPOSED RESOLUTION WILL BE COVERED DURING THE COMMENT RESOLUTION MEETING
  - COMMENT IS CLOSED IF REVIEWER AGREES WITH IT
  - IF REVIEWER DISAGREES, THE RESOLUTION WILL BE DISCUSSED. IF RESOLUTION CANNOT BE ACHIEVED WITHIN A REASONABLE TIME, THE DESIGN REVIEW CHAIRMAN WILL ASK THE INVOLVED PARTIES TO CONTINUE THE DISCUSSION OUTSIDE OF THE FORMAL RESOLUTION MEETING AND BRING THE AGREED TO RESOLUTION BACK TO THE RESOLUTION MEETING
  - IF RESOLUTION IS NOT ACHIEVED, THE REVIEWER SHALL DOCUMENT THE DISAGREEMENT TO SUCCESSIVELY HIGHER LEVELS OF MANAGEMENT
- LEAD REPRESENTATIVE OF EACH REVIEWING ORGANIZATION SIGNS A COMMENT RESOLUTION CONCURRENCE FORM

TECHNICAL ASSESSMENT PROCESS

COMMENT RESOLUTION

- DURING RESOLUTION MEETINGS, COMMENTS WILL BE IDENTIFIED BY CATEGORY AND NUMBER

- EACH REVIEWER WILL BE GIVEN A LISTING OF HIS COMMENTS WITH THEIR LOCATION IN THE CONSOLIDATED COMMENT SET

COMMENT QUALITY

- REQUIREMENTS FOR COMMENTS
- INSTRUCTIONS TO REVIEWERS

COMMENT QUALITY

REQUIREMENTS FOR COMMENTS

- **DO** MAKE THEM SPECIFIC AND TO THE POINT
- **DO** GIVE ENOUGH DETAIL TO COMMUNICATE THE INTENT OF THE COMMENT AND ALLOW ITS RESOLUTION
- IF THE DOCUMENT IS A SPECIFICATION, **DO** GIVE PAGE NUMBER, PARAGRAPH AND SENTENCE NUMBER (i.e., PAGE 3, 4TH PARAGRAPH, 3RD SENTENCE)
- IF THE DOCUMENT IS A DRAWING, **DO** GIVE SPECIFIC ZONE NUMBER (i.e., 2A-C-001, ZONE A-6, DETAIL 1, ETC.)

COMMENT QUALITY

REQUIREMENTS FOR COMMENTS
(CONTINUED)

- **DO** MAKE COMMENTS THAT CAN BE RESOLVED BY THE A/E
- **DO** STRUCTURE COMMENTS IN A PROFESSIONAL MANNER
- **DO** MAKE COMMENTS THAT CONSIDER THE STAGE OF DESIGN COMPLETION AND SCOPE OF THE REVIEW. REMEMBER, THIS IS A 100 PERCENT TITLE I DESIGN
- **DO** RESTRICT COMMENTS TO YOUR AREA OF EXPERTISE AND TO THE SCOPE OF WORK ASSIGNED BY THE WMPO TO YOUR ORGANIZATION

COMMENT QUALITY

REQUIREMENTS FOR COMMENTS
(CONTINUED)

- **DO** PROVIDE SUPPORTING EVIDENCE SUCH AS REFERENCES OR VERIFIED INFORMATION

- **DO** IDENTIFY COMMENTS BY CATEGORY ON THE APPROPRIATE FORMS BEFORE SUBMITTAL (REFER TO REVIEW PACKAGE DRAWING CATEGORY LISTING)

- **DO** RESOLVE CONFLICTING COMMENTS WITHIN REVIEWING ORGANIZATIONS BEFORE SUBMITTAL TO THE DESIGN

COMMENT QUALITY

REQUIREMENTS FOR COMMENTS
(CONTINUED)

- **DON'T** MAKE COMMENTS IN THE FORM OF QUESTIONS DIRECTED TO THE A/E
- **DON'T** MAKE COMMENTS CONSISTING ONLY OF "MORE DETAIL REQUIRED," "EXPAND," "CHANGE," OR "CLARIFY." IF THIS TYPE OF COMMENT IS NECESSARY, SPECIFY THE ADDITONAL DETAIL, CHANGE, OR CLARIFICATION REQUIRED
- **DON'T** MAKE "FOR INFORMATION ONLY" COMMENTS
- **DON'T** BASE COMMENTS ON PENDING OR DESIRED REQUIREMENTS

COMMENT QUALITY

INSTRUCTIONS TO REVIEWERS

- COMPLETE FORM N-QA-007, WMPO PROFICIENCY REVIEW REPORT (REVIEWER'S QUALIFICATIONS)
- COMPLETE DRAFT OF REVIEWER'S COMMENT SHEETS (FORM NES0101). USE OF THIS FORM IS MANDATORY
- CHECK AND SIGN THE TYPED VERSION OF THE REVIEWER'S COMMENT SHEETS
- REVIEWER SIGNS REVIEWER COMMENT RESOLUTION DESIGNATION OF AUTHORITY FORM
- REVIEWER'S PARTICIPATION IS COMPLETE ONLY AFTER ALL THEIR COMMENTS ARE DISPOSITIONED AND THE ABOVE FORMS ARE COMPLETED

WMPO PROFICIENCY REVIEW REPORT

B-QA-007

Name I. A. REVIEWER

Review Date May 4, 1988

Title Senior Mining Engineer

The proficiency review is based on the experience, knowledge and training of the individual. The activities the individual is capable to perform are listed below.

Activities Based upon a review of MR REVIEWER'S education and employment history, he is fully qualified to serve on the Title II TECHNICAL Review Board. Mr. REVIEWER holds a B.S. degree in Mining Engineering from the Colorado School of Mines. He was employed by Amax Inc. at the Urad and Henderson mines in various capacities including ventilation engineer, mine planning engineer, underground surveyor, and blasting crew miner. Subsequently, MR. REVIEWER was employed by Cleveland Cliffs where he was responsible for completion of feasibility studies. Duties included design of mine layouts, ventilation system design, equipment selection and material handling system design. Prior to joining the ABC Co. team he was employed by Westinghouse Hanford on the Basalt Waste Isolation Project where he was responsible for providing mining expertise and guidance for design of the BWIP exploratory shaft facility. Assignments included leading a study group reviewing changes in mine regulations, direction of Architect Engineer contractor and team leader of a group defining design recommendations for the underground facility.

Proficiency Report Conducted and Certified by

Signature H.S. SUPERVISOR

Title Integration Mining Manager

Date MAY 4, 1988

NOTE: This report should be completed on annual basis.

DEFINITION OF TITLE I

REFERENCE:
DOE 4700.1, CHAP V, PART C.2.e.1

UTILIZING THE DESIGN CONCEPTS OR CRITERIA THAT HAVE BEEN PREPARED IN THE CONCEPTUAL DESIGN PHASE, SUFFICIENT DESIGN NEEDS TO BE PERFORMED IN TITLE I TO FIRMLY FIX THE PROJECT SCOPE AND FEATURES.

QUALITY ASSURANCE

H&N WORKS TO A WMPO APPROVED QA PROGRAM PLAN WHICH INCLUDES AN EXTENSIVE DESIGN REVIEW PROCESS.

QA DOCUMENTATION

* REGULATIONS - 10 CFR 60 subpart G
  10 CFR 50 appendix B

* HEADQUARTERS QA PLAN OGR/B-3

* PROJECT A PLAN - NNWSI 88-9

* H&N QUALITY ASSURANCE PROGRAM PLAN
  H.N. - 10471 - 1131

* H&N APPROVED PROCEDURES MANUAL

QUALITY ASSURANCE PROGRAM

H&N HAS:

* AN APPROVED QUALITY ASSURANCE PROGRAM PLAN
* APPROVED PROCEDURES FOR ALL ACTIVITIES
* QUALIFIED PERSONNEL IN ALL AREAS
* APPROPIATE INDOCTRINATION AND TRAINING FOR ALL PERSONNEL
* AN DESIGN REVIEW PROCESS
  - # INTERNAL AND INTERDISCIPLINE REVIEW
  - # QA REVIEW

H&N ENGINEERING RESPONSIBILITIES

1. SURFACE FACILITIES
2. SUBSURFACE UTILITIES AS RELATED TO TESTING
3. AREA 25 FACILITIES
4. COMMUNICATION, DATA FACILITIES AND LIFE SAFETY SYSTEMS

PIPE CONNECTION DETAILS

Underground openings shall be developed to meet the needs of in situ site characterization, including basic needs for the initially planned tests. Additionally an allowance for uncertainties for the test area needs at the main test level has been set at 100 percent; i.e., all major systems for ventilation, utilities, emergency egress, rock handling, personnel support, and others shall be analyzed to determine the need for and the impact associated with this uncertainty allowance. If it can be demonstrated that critical parts of the allowance would require excessive costs, schedule, test disruption, or other program impacts to design, procurement, and/or construction later (after the basic test plan needs are completed), consideration shall be given to designing, procuring, and/or constructing these critical items as part of the initial facility. The uncertainty allowance for each of the major ESF systems shall be determined by an analysis of the following systems:

Description	Uncertainty Allowance
Underground test area at the main test level	100 percent
Systems	
- Site	DETERMINED BY ANALYSES IN THE TITLE I DESIGN PHASE
- Utilities	
- Surface facilities	
- First shaft	
- Second shaft	
- Underground excavations	
- Underground utility systems	
- Underground tests	

Specific allowances for each major system shall be identified and incorporated prior to the start of Title II design (detailed design).

GENERAL NOTES

1. THIS TITLE I DRAWING DEPICTS ONLY THE SPECIFIC FIRE PROTECTION FEATURES OF THIS PROJECT. FOR GENERAL EQUIPMENT DESCRIPTIONS AND SPECIFIC CONSTRUCTION REQUIREMENTS SHALL BE OBTAINED DURING THE TITLE II EFFORT.
2. ALL PERSONNEL ENTERING CERTAIN AREAS OF THIS SURFACE FACILITY SHALL BE INSTRUCTED IN THE LOCATION AND USE OF FIRE EXTINGUISHERS THROUGHOUT THE BUILDING.
3. CONTROL DEVICES INCLUDING ON-OFF SWITCHES AND VALVES SHALL BE CLEARLY MARKED AND LOCATED WHERE READILY ACCESSIBLE.
4. A HOUSE FIRE ALARM AND DETECTION SYSTEM SHALL BE PROVIDED IN ACCORDANCE WITH NFPA 72E. THE SYSTEM SHALL BE CAPABLE OF MANUAL AND AUTOMATIC ACTUATION AND SHALL BE ARRANGED TO PROVIDE AUDIBLE AND VISUAL ALARM SIGNALS THROUGHOUT THE BUILDING. THE SYSTEM SHALL BE CONNECTED TO THE [illegible] AND SHALL BE SUPERVISED AND TESTED IN ACCORDANCE WITH NFPA 72E.
5. FIRE EXTINGUISHERS SHALL BE PROVIDED AND SHALL BE INSTALLED IN ACCORDANCE WITH NFPA 10.
6. FIRE DEPARTMENT CONNECTIONS SHALL BE PROVIDED AS SHOWN ON THE DRAWINGS AND SHALL BE INSTALLED IN ACCORDANCE WITH NFPA 13.

PRESENTATION

AUGUST 8, 1988

FENIX & SCISSON

TITLE I DESIGN COMPLETION

PROJECT OVERVIEW

DICK BULLOCK

AUGUST 8, 1988

SUMMARY OF ACTIONS REQUIRED BY 50% TITLE I DESIGN REVIEW COMMENTS

- TOTAL NUMBER OF COMMENTS (FOR F & S) = 582
- COMMENTS REQUIRING ACTION = 418
- ACTION ON 408 RESOLVED COMMENTS COMPLETED
- ACTION ON REMAINING 10 COMMENTS HAS BEEN INITIATED. WORK IN PROGRESS
- COPIES OF TRACKING DOCUMENT SHOWING DISPOSITION OF RESOLVED COMMENTS ARE AVAILABLE

COMMENTS NEEDING ADDITIONAL WORK

THREE AREAS OF COMMENTS NEED ADDITIONAL WORK

- DRAFT SEISMIC CRITERIA REPORT HAS BEEN BASELINED AND IS BEING IMPLEMENTED. REVISIONS ARE BEING CONTEMPLATED

- FINAL DECOMMISSIONING SEAL DESIGN AND LOCATIONS WILL BE COMPLETED BY THE REPOSITORY A/E. WE HAVE COMPLETED PRELIMINARY ANALYSIS OF ESF ABANDONMENT & RECLAMATION.

- A SAFETY ANALYSIS CONSULTING FIRM IS BEING SUBCONTRACTED TO PERFORM SAFETY ANALYSIS. WE HAVE PREPARED A LIST OF HAZARDS ---- RISK ANALYSIS WORK IS IN PROGRESS.

- ICWG APPROVED BASELINE CHANGES RELATING TO:
  - INTEGRATED DATA SYSTEM REQUIREMENTS
  - ES SEISMIC DESIGN BASIS
  - ELECTRICAL GROUNDING SYSTEM
  - CALICO HILL REFERENCES

WORK DONE TO COMPLETE ACTION ON REVIEW COMMENTS

- 23 ADDITIONAL STUDIES/ANALYSES COMPLETED

- HELD MEETINGS WITH REECo, LANL, H & N, SNL TO RESOLVE:
  - AREAS FOR STORAGE & CONSTRUCTION SUPPORT
  - POTENTIAL DISRUPTIVE IMPACTS OF EXCAVATIONS ON SHOPS/IDS.
  - DEFINITION OF VARIOUS FUNCTIONS & RESPONSIBILITY FOR PREPARATION & CONTENTS OF SPECIFICATIONS AND ANNOTATED OUTLINES OF BID PACKAGES.
  - INCLUSION OF MEASUREMENT & PAYMENT CLAUSES WITH SPECIFICATIONS.

SCOPE OF F & S WORK

- SHAFT COLLARS
- SHAFT EXCAVATION & LINING
- HOISTS & HEADFRAMES
- SUBSURFACE EXCAVATIONS
- SHAFT INTERNALS AND CONVEYANCES
- IN-SHAFT & UNDERGROUND UTILITIES
  - UNDERGROUND VENTILATION SYSTEM
  - UNDERGROUND WATER AND MINE WASTE REMOVAL
  - SUPPLY & DISTRIBUTION OF COMPRESSED AIR
  - ELECTRICAL DISTRIBUTION UNDERGROUND
  - PORTIONS OF UNDERGROUND INSTRUMENTATION & COMMUNICATION SYSTEMS

QA PROGRAM

- SPECIAL EMPHASIS HAS BEEN PLACED ON QA FOR TITLE I DESIGN. THERE WILL BE A SEPARATE PRESENTATION ON QA

- THE PURPOSE OF FENIX & SCISSON QA PROGRAM IS TO PROVIDE CONFIDENCE THAT F & S WILL CONTINUALLY ACHIEVE SATISFACTORY QUALITY PERFORMANCE

- THE PROGRAM CONTROLS:
  - DESIGN INTERFACES
  - DESIGN VERIFICATION
  - DESIGN CHANGES
  - USE OF APPROPRIATE DESIGN INPUTS AND STANDARDS.

TITLE I REQUIREMENTS PER DOE ORDER 4700.1 AND PRESENT STATUS

- PREPARATION OF PRELIMINARY PLANNING AND ENGINEERING STUDIES . COMPLETE
- PRELIMINARY DRAWINGS AND OUTLINE SPECIFICATIONS COMPLETE
- LIFE-CYCLE COST ANALYSIS COMPLETE
- PRELIMINARY COST ESTIMATES & SCHEDULES THEY ARE IN PROGRESS AND THE RESULTS OF THIS REVIEW WILL BE INCORPORATED AND SUBMITTED THIS MONTH.
- IDENTIFICATION OF LONG LEAD ITEMS — COMPLETE
- RISK ANALYSIS-IN PROGRESS. PRELIMINARY REPORT TO BE AVAILABLE IN TWO WEEKS
- ALL TASKS ARE ESSENTIALLY COMPLETE AND WE WILL BE READY TO START TITLE II BY THE END OF THIS REVIEW PROCESS

ORDER OF PRESENTATION

1. MIKE REGENDA — TITLE I QUALITY ASSURANCE PROGRAM
2. JIM GRENIA — TECHNICAL OVERVIEW
3. BRUCE STANLEY — SHAFT & SUBSURFACE DESIGN
4. MAREK MRUGALA — GROUND STABILITY
5. ROMEO JURANI — VENTILATION DESIGN
6. IVO LANGE — SHAFT OUTFITTING/HOISTING DESIGN
7. LARRY BARTO — MECHANICAL UTILITIES
8. TOM GREINER — UNDERGROUND ELECTRICAL DESIGN

QUALITY ASSURANCE DESIGN ANALYSIS CHECKLIST

ANALYSIS NO.	REVISION	ANALYSIS TITLE	QA LEVEL	WBS NO.

ITEMS FOR REVIEW	YES	NO	N/A
1. Are the objectives of the analysis clearly defined?			
2. Are design inputs and their sources identified?			
3. Are referenced materials identified?			
4. Are codes and standards correctly identified, including issue date or revision number?			
5. Are assumptions and the bases for their use identified?			
6. If there are assumptions that must be verified as design proceeds, have these been identified?			
7. Are calculations, if any, identified by subject, signed and dated by originator and checker, and pages annotated with correct information?			
8. Have all comments been resolved between originator and checker?			
9. Has the design analysis been reviewed, approved, signed and dated by the appropriate personnel?			
10. Are all parts of the design analysis legible and reproducible?			
11. If any QA Level I computer programs are used, have requirements of NNWSI-DC-12 been met?			
12. Has the design analysis been performed, documented, and approved in accordance with requirements of NNWSI-DC-03?

FENIX & SCISSON

TITLE I DESIGN COMPLETION

TECHNICAL OVERVIEW

JIM GRENIA

AUGUST 8, 1988

- GENERAL REVIEW
- PROGRESS SINCE 50%
- DESCRIPTION OF THE PAYCOST
- WORK PROGRESS ON TITLE II

o GENERAL REVIEW OF THE ESF DESIGN

CONSIDERATIONS OF 10 CFR 60 IN THE ESF DESIGN

1) Q A REQUIREMENTS

- ITEMS AND ACTIVITIES POTENTIALLY IMPORTANT TO SAFETY ARE ADDRESSED

- Q A MEASURES APPLIED TO THE DESIGN ARE:
  - o CONTROL OF INTERFACES
  - o DESIGN VERIFICATION
  - o DESIGN CHANGE CONTROL
  - o APPROPRIATE STANDARDS

- DESIGN CRITERIA

2) DESIGN BASIS REQUIREMENTS

- SITE CHARACTERIZATION
  - o ABILITY TO OBTAIN THE REQUIRED INFORMATION AND LIMIT THE ADVERSE EFFECTS ON LONG TERM PERFORMANCE OF THE REPOSITORY.
  - o ALL TESTING AND DEVELOPMENT WORK IS PLANNED AND COORDINATED WITH THE REPOSITORY DESIGN
- CONSIDERATION OF POTENTIALLY ADVERSE CONDITIONS
  - o POTENTIAL FOR FLOODING SHAFTS
  - o FUTURE REPOSITORY DRAINAGE
- ES-1 & ES-2 ARE BEING DESIGNED TO REPOSITORY SHAFT STANDARDS

o PROGRESS SINCE 50% REVIEW

1) WORK ITEMS COMPLETED FOR THIS REVIEW

- RESOLUTION OF 586 COMMENTS FROM 50% REVIEW
- DEVELOPED AND COMPLETED 84 DRAWINGS
- DEVELOPED AND COMPLETED 76 OUTLINE SPECIFICATIONS
- DEVELOPED AND COMPLETED 53 CALCULATIONS, REPORTS, STUDIES, AND ANALYSIS
- DEVELOPED A PLAN AND SCHEDULE FOR THE CERTIFICATION OF THE GFE HOISTS
- REQUESTS FOR QUALIFICATIONS, A SCREENING AND SELECTION OF A HOIST CONSULTANT TO PERFORM HOIST CERTIFICATION HAS BEEN MADE
- A SAFETY/RISK ANALYSIS CONSULTANT (ARTHUR D. HITLE INC.) HAS BEEN RETAINED
- STAFF SAFETY ENGINEERS ARE BEING INTERVIEWED AND JOB OFFERS ARE BEING MADE
- DEVELOPED A CREDIBLE ACCIDENT LIST FOR THE ENTIRE ESF OPERATION. THIS IS PRELIMINARY INPUT INTO THE SAFETY ANALYSIS.

DESIGN GOALS

- SAFETY
- TEST SUPPORT
- CONSTRUCTABILITY
- FLEXIBILITY
- COMPLIANCE WITH CRITERIA SOURCES

TECHNICAL CRITERIA SOURCES

1. SDRD

   1.2.6.0 GENERAL

   1.2.6.4 FIRST SHAFT

   1.2.6.5 SECOND SHAFT

   1.2.6.6 UNDERGROUND EXCAVATIONS

   1.2.6.8 UNDERGROUND TESTS

   APPENDIX A ESF SKETCHES

   APPENDIX B TEST AND ID REQUIREMENTS

   APPENDIX C TEST HOLE REQUIREMENTS

2. REFERENCE INFORMATION BASE

3. BASIS FOR DESIGN

4. DESIGN SCOPE AND PLANNING DOCUMENT

5. GENERIC REQUIREMENTS DOCUMENT

6. STATE AND FEDERAL REGULATIONS AND STANDARDS

CODES AND STANDARDS

- STATE OF NEVADA
  - MINE SAFETY AND HEALTH STANDARDS
- CALIFORNIA ADMINISTRATIVE CODE
  - TUNNEL SAFETY ORDERS
  - MINE SAFETY ORDERS
- CODE OF FEDERAL REGULATIONS
  - 30 CFR57
  - 10 CFR60
- D.O.E. ORDERS
- VARIOUS STANDARDS AND RECOMMENDED PRACTICES
- REPOSITORY DESIGN TO THE EXTENT CURRENTLY KNOWN (CDSCP)

ES-1 AND ES-2 SHAFT

- COLLAR
- LINER (includes ground support)
- EXCAVATION
- SUMP

COLLAR FEATURES

- o SIMPLE - MONOLITHIC
- o UTILITY ACCESS
- o FUNCTIONAL
  - HEADFRAME SUPPORT
  - MUCK DUMPING
  - MATERIALS HANDLING
  - VENTILATION ACCOMMODATION

LINER DESIGN FEATURES

- o NON - HYDROSTATIC
- o STATIC LOADS
- o DYNAMIC LOADS
- o CONSTRUCTABILITY
- o DESIGN LIFE
- o TEST SUPPORT
- o MAINTAINABLE
- o CLOSURE

SHAFT EXCAVATION

- CONTROLLED DRILL AND BLAST
- TEST SUPPORT
- SAFETY FOR CONTRACTOR AND PRINCIPAL INVESTIGATOR

SUMP AND TAILSHAFT

- SIMPLE - HYDROSTATIC
- ES-2 MUCK LOADOUT FACILITIES
- ES-1 NO SKIP LOADING

SUBSURFACE LAYOUT

- TEST AREAS
- SUPPORT AREAS
- EXPLORATION DRIFTS
- AREAS OF FUTURE EXPANSION

NEW ITEMS 50 - 100 % TITLE I

- LINER DESIGN
- GROUND SUPPORT
- VENTILATION CONCERNS - FANS, NOISE, ETC.
- DESIGN COORDINATION – A/E'S, DISCIPLINES
- DEFINITION OF GEOTECHNICAL PARAMETERS AFFECTING THE DESIGN
- SPECIALTY ITEMS – PROCUREMENT ITEMS
  - HOIST QUALIFICATION
  - RISK ANALYSIS

TITLE 1 DESIGN

FINAL REVIEW

ROCK MECHANICS

MAREK MRUGALA

AUGUST 1988

GENERAL

INPUT

- RIB
- RELEVANT PUBLICATIONS
- DESIGN STUDIES

CONSTRAINTS

- SUBSYTEM DESIGN REQUIREMENTS (SDRD)
- STATE AND FEDERAL REGULATIONS

GOALS

SHORT-TERM

- TO ESTABLISH THE METHODOLOGY IN THE ROCK MECHANICS AREA
- PROVIDE MEANS BY WHICH COMPARISONS CAN BE MADE

LONG TERM

- TO PROVIDE AN UNDERGROUND LAYOUT THAT WILL BE SAFE AND WHICH WILL SATISFY REQUIREMENTS ASSOCIATED WITH VARIOUS TESTING ACTIVITIES

EFFORTS EXTENDED

RIB

- ADAPTATION TO FIT THE NEEDS OF THE DESIGNERS

SEISMIC DESIGN INPUT

- VERIFICATION OF METHODS PROPOSED IN THE REPORT BY THE WORKING GROUP

PILLAR DESIGN AND STABILITY

ANALYSIS

- REVIEW OF METHODS AVAILABLE
- PRELIMINARY ANALYSES USING 5 MOST COMMON APPROACHES TO PILLAR DESIGN
- ESTABLISHING CRITERIA FOR THE PILLAR STABILITY ASSESSMENT

APPROACH

MINING PRACTICE

- ADAPTATION OF PROVEN METHODS
  (E.G. PILLAR-DESIGN FORMULAS)

STATE-OF-THE-ART TECHNIQUES

- COMPUTER SIMULATIONS
  (E.G. FINITE ELEMENT METHOD)

ENGINEERING JUDGMENT

- SUPPORTED BY:

  CASE HISTORIES AVAILABLE

  OBSERVATIONS

  (E.G. N-TUNNEL, G-TUNNEL)

  DESIGN ANALYSES

AREAL EXTRACTION RATIO

DEFINITION

$$R_E = \frac{A_E}{A_T} * 100\ (\%)$$

WHERE:

R_E - EXTRACTION RATIO

A_E - EXTRACTED AREA

A_T - TOTAL AREA

PILLAR

SAFETY FACTOR

(FS)

DEFINITION

$$FS = \frac{\text{PREDICTED PILLAR STRENGTH}}{\text{PREDICTED PILLAR STRESS}}$$

E X A M P L E

Uniaxial Compressive Strength (Laboratory), (psi)	14,645
Uniaxial Compressive Strength (Rock Mass), (psi)	7,207
Rock Unit Weight, [2.32*62.5], (pcf)	145
Entry Width, (ft)	21
Pillar Width, (ft)	50
Depth, (ft)	1,055

Calculated Factor of Safety, [FS1(lab)]	6.84
Calculated Factor of Safety, [FS2(rock mass)	3.28
Extraction Ratio, (Re), (%)	50.40

NOTE: N O S C A L I N G ! ! !

NOT CONSIDERED
- o GEOMETRY (W/H RATIO)
- o ROCK PROPERTIES (ROCK MATERIAL STRENGTH vs ROCK MASS STRENGTH)

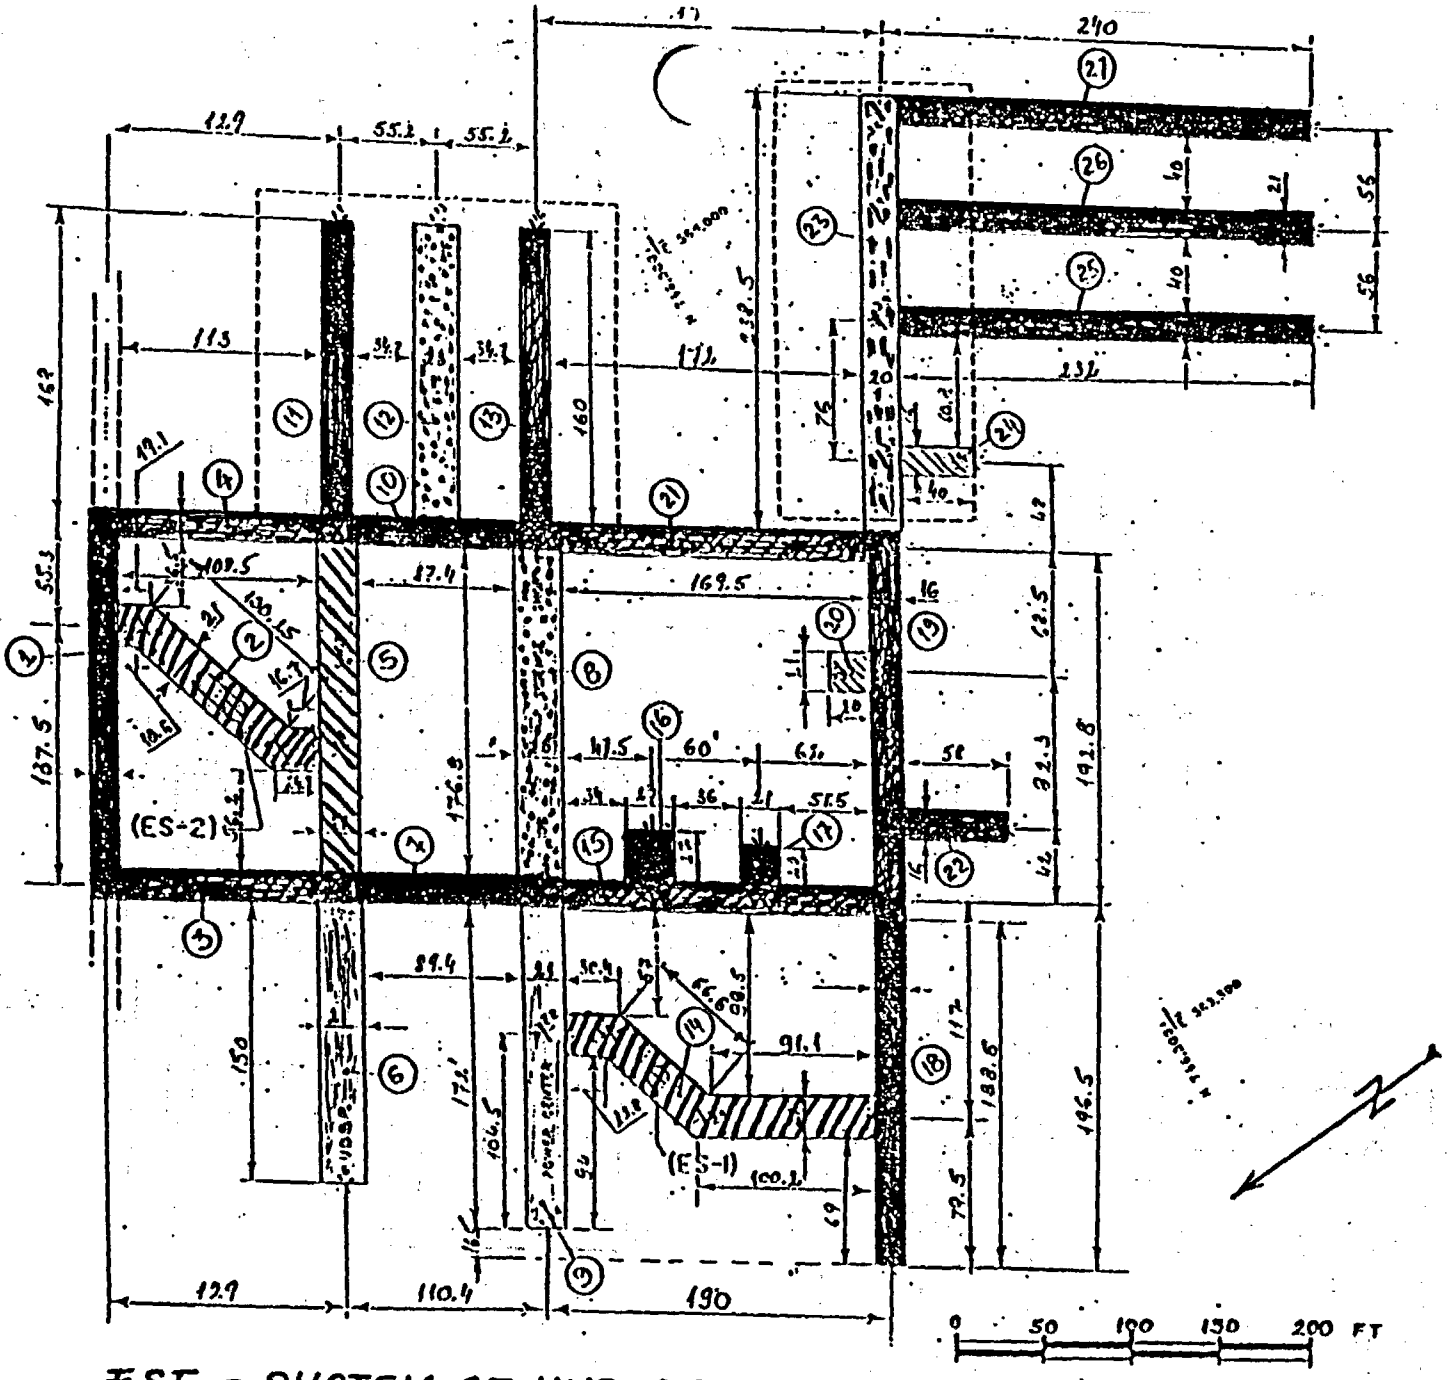
EXAMPLE

CRITICAL PILLAR SIZE

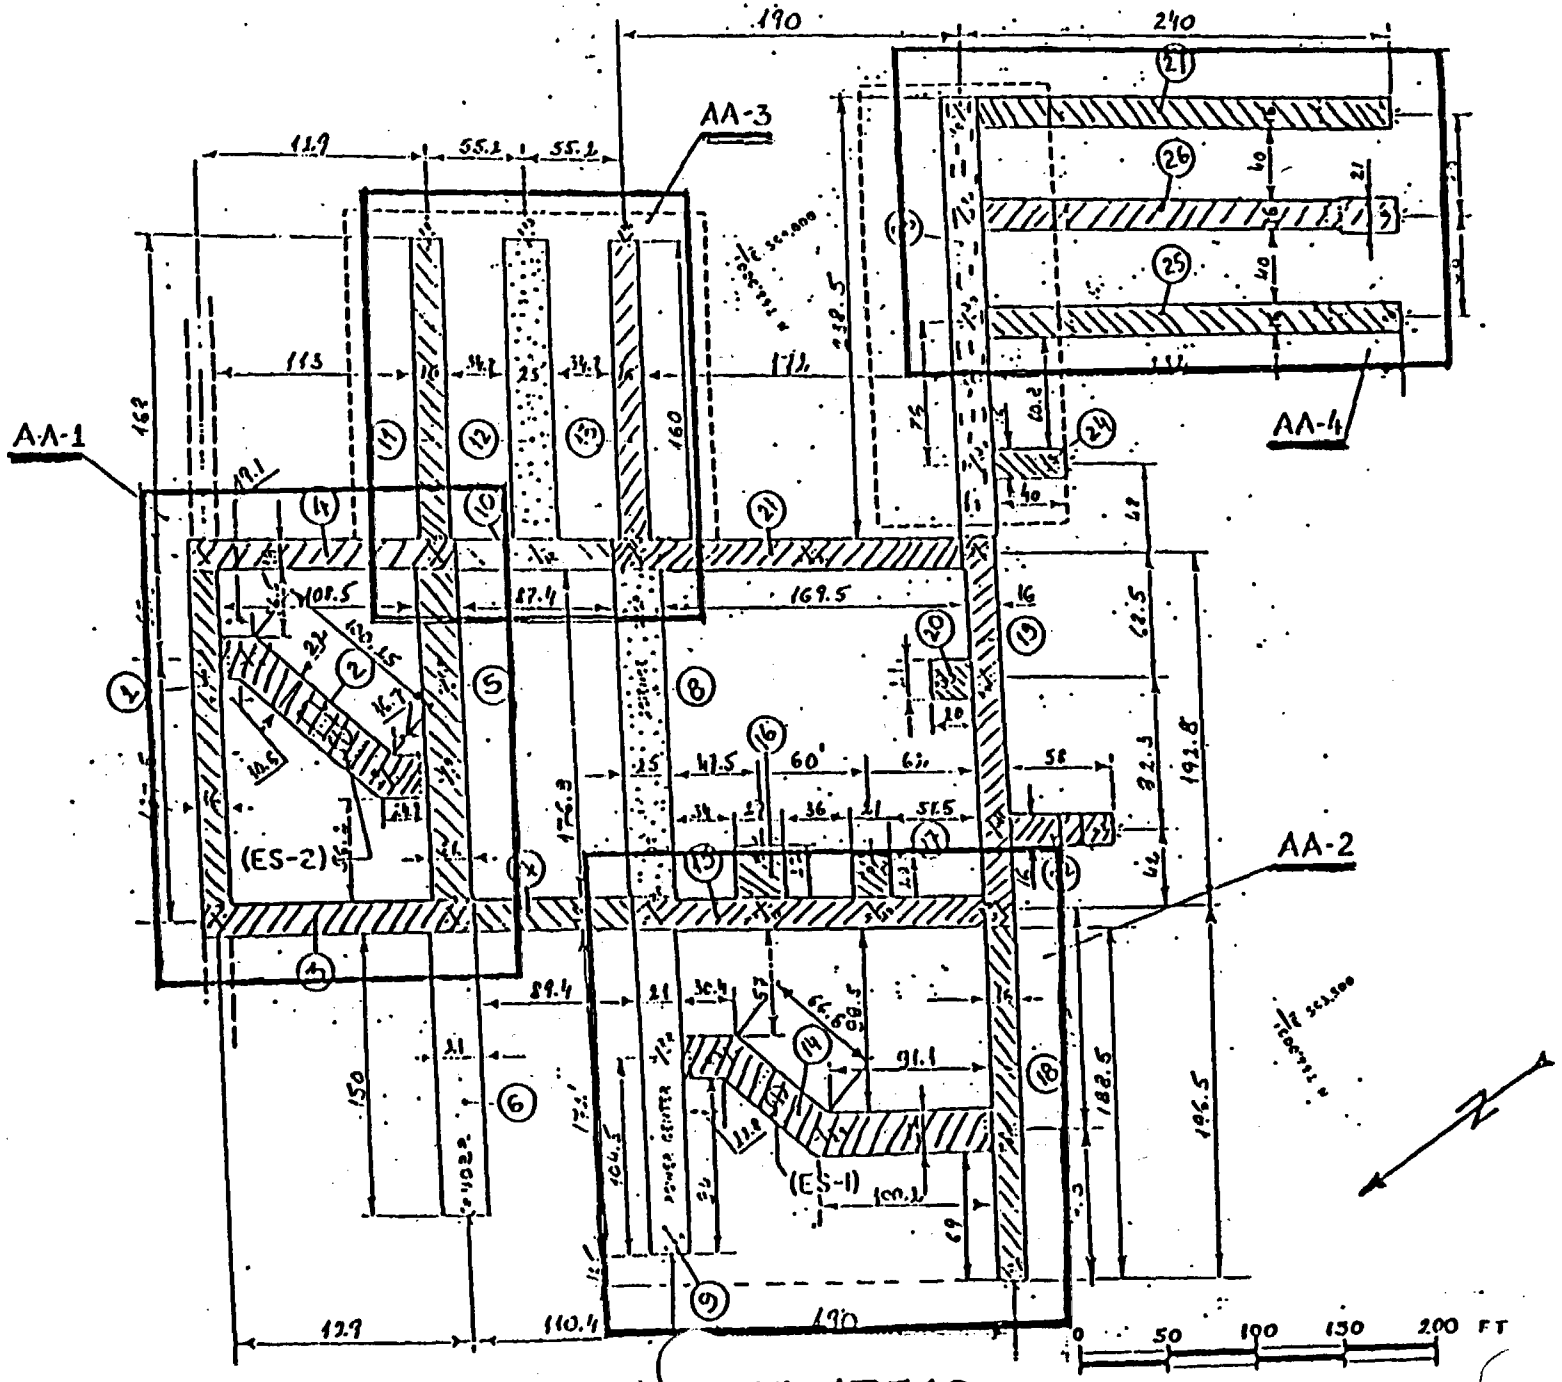
(FS PILLAR = 1.0)

ENTRY WIDTH = 21 ft

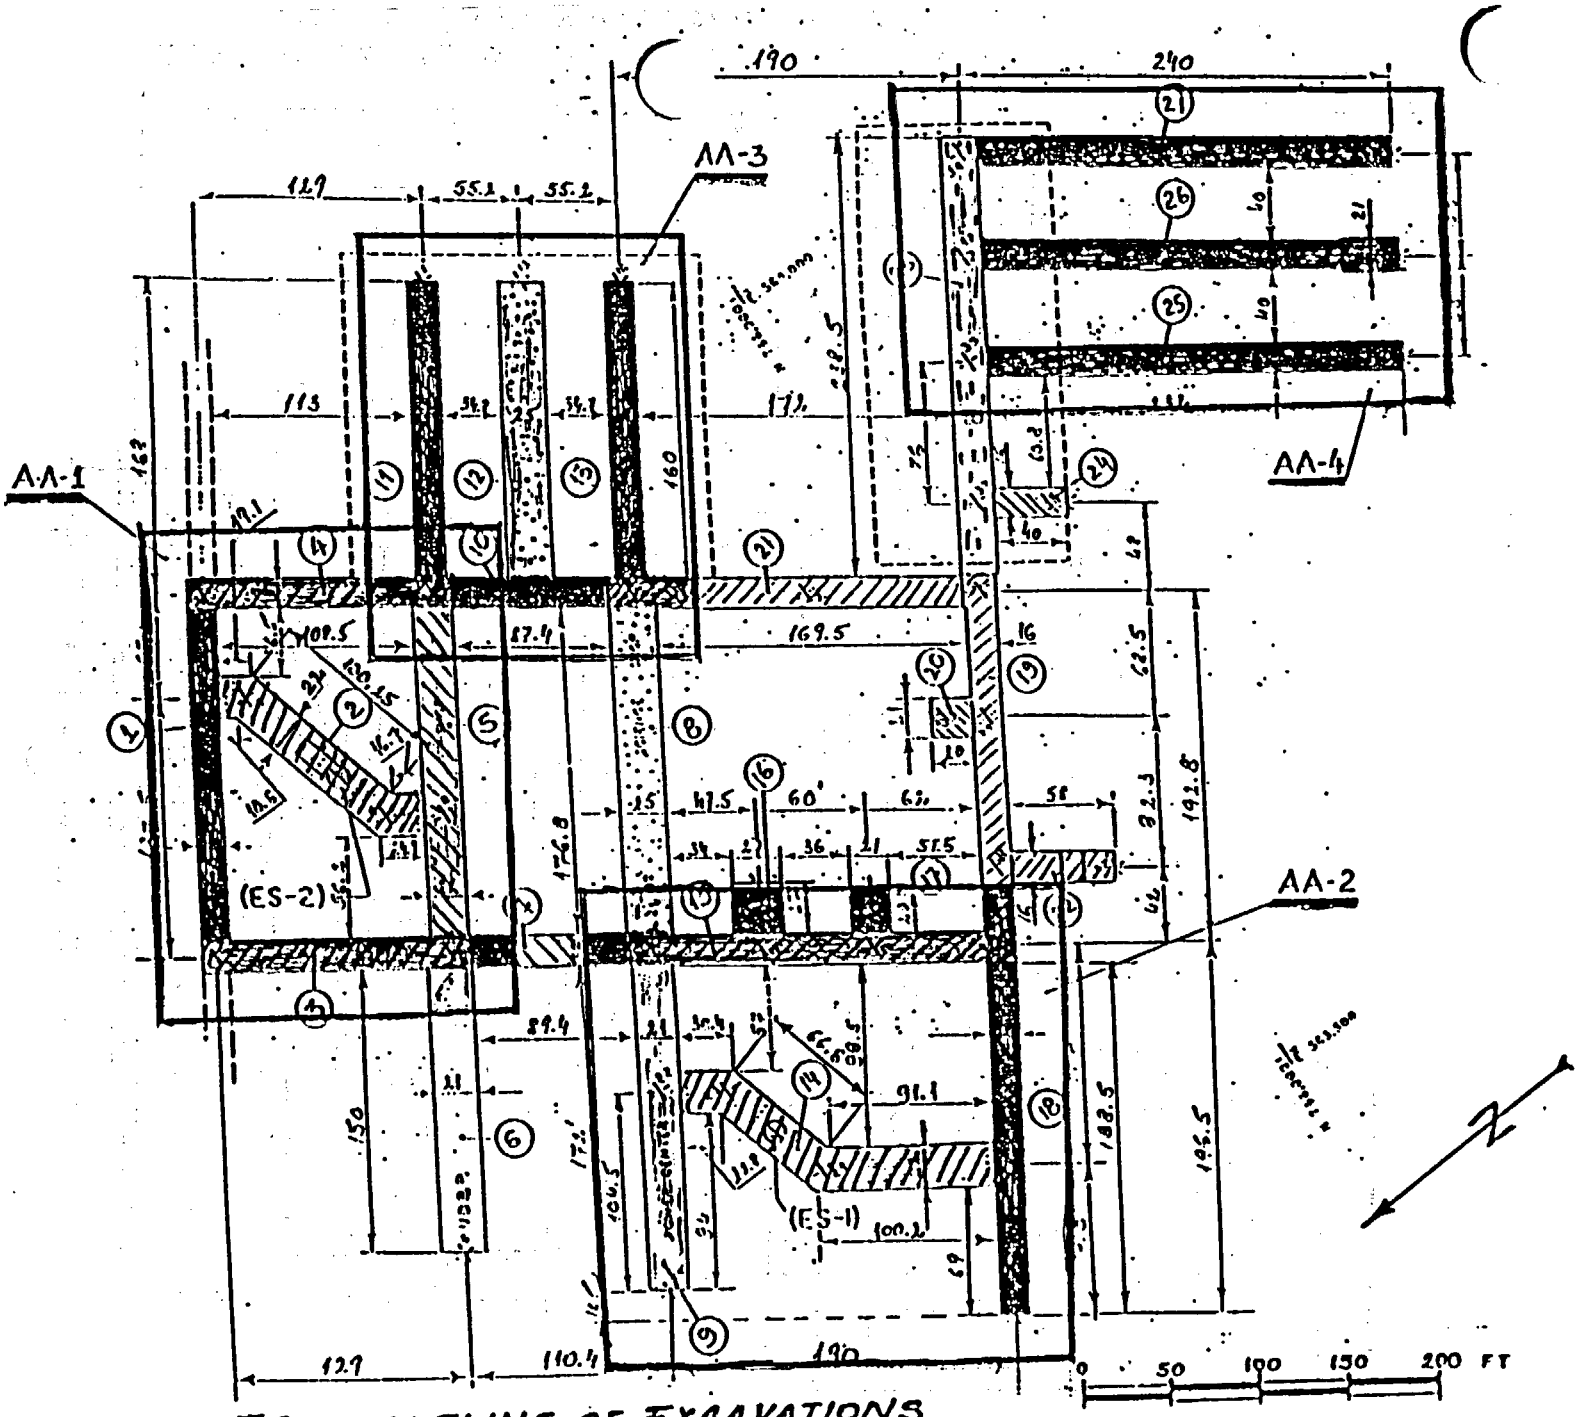
MEDIUM	UNIAXIAL COMPRESSIVE STRENGTH (psi)	CRITICAL PILLAR WIDTH (ft)	CRITICAL EXTRACTION RATIO (%)
ROCK MATERIAL	14,645	7.74	92.75
ROCK MASS	7,207	13.09	85.26



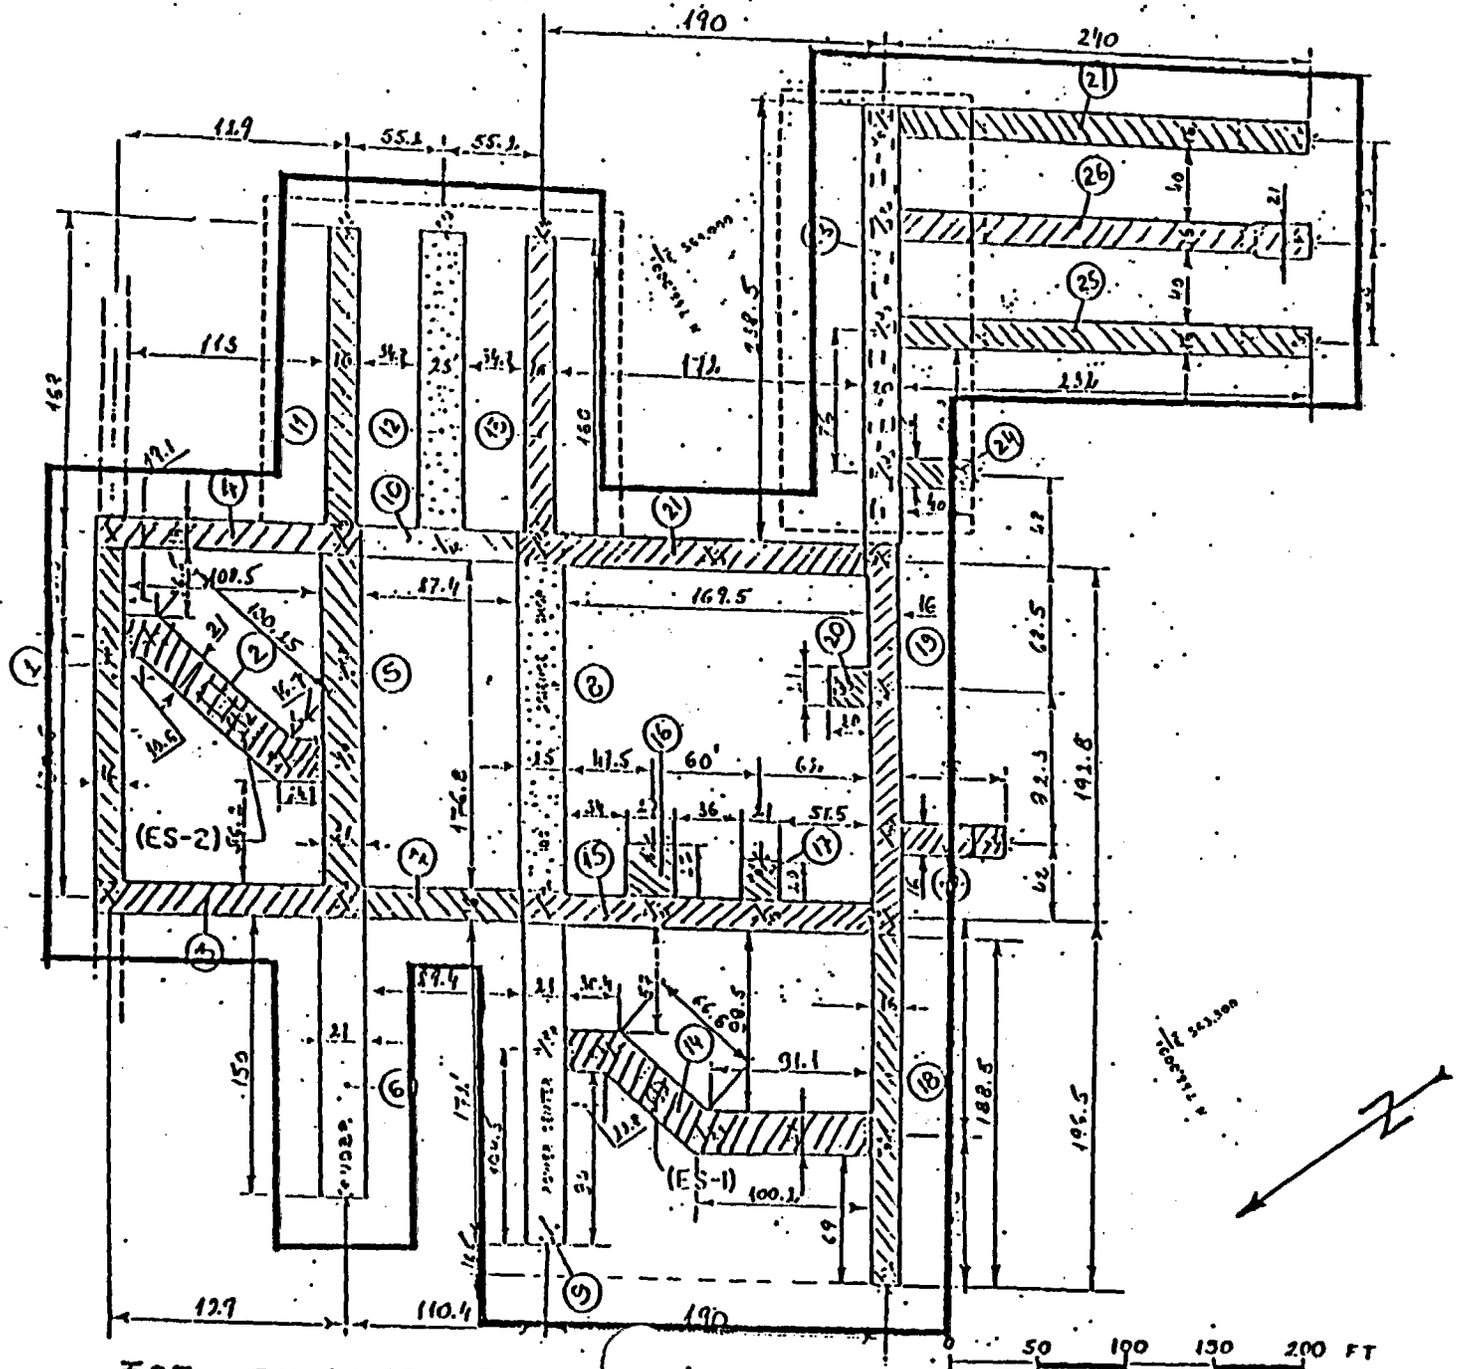
ESF - SYSTEM OF UNDERGROUND OPENINGS



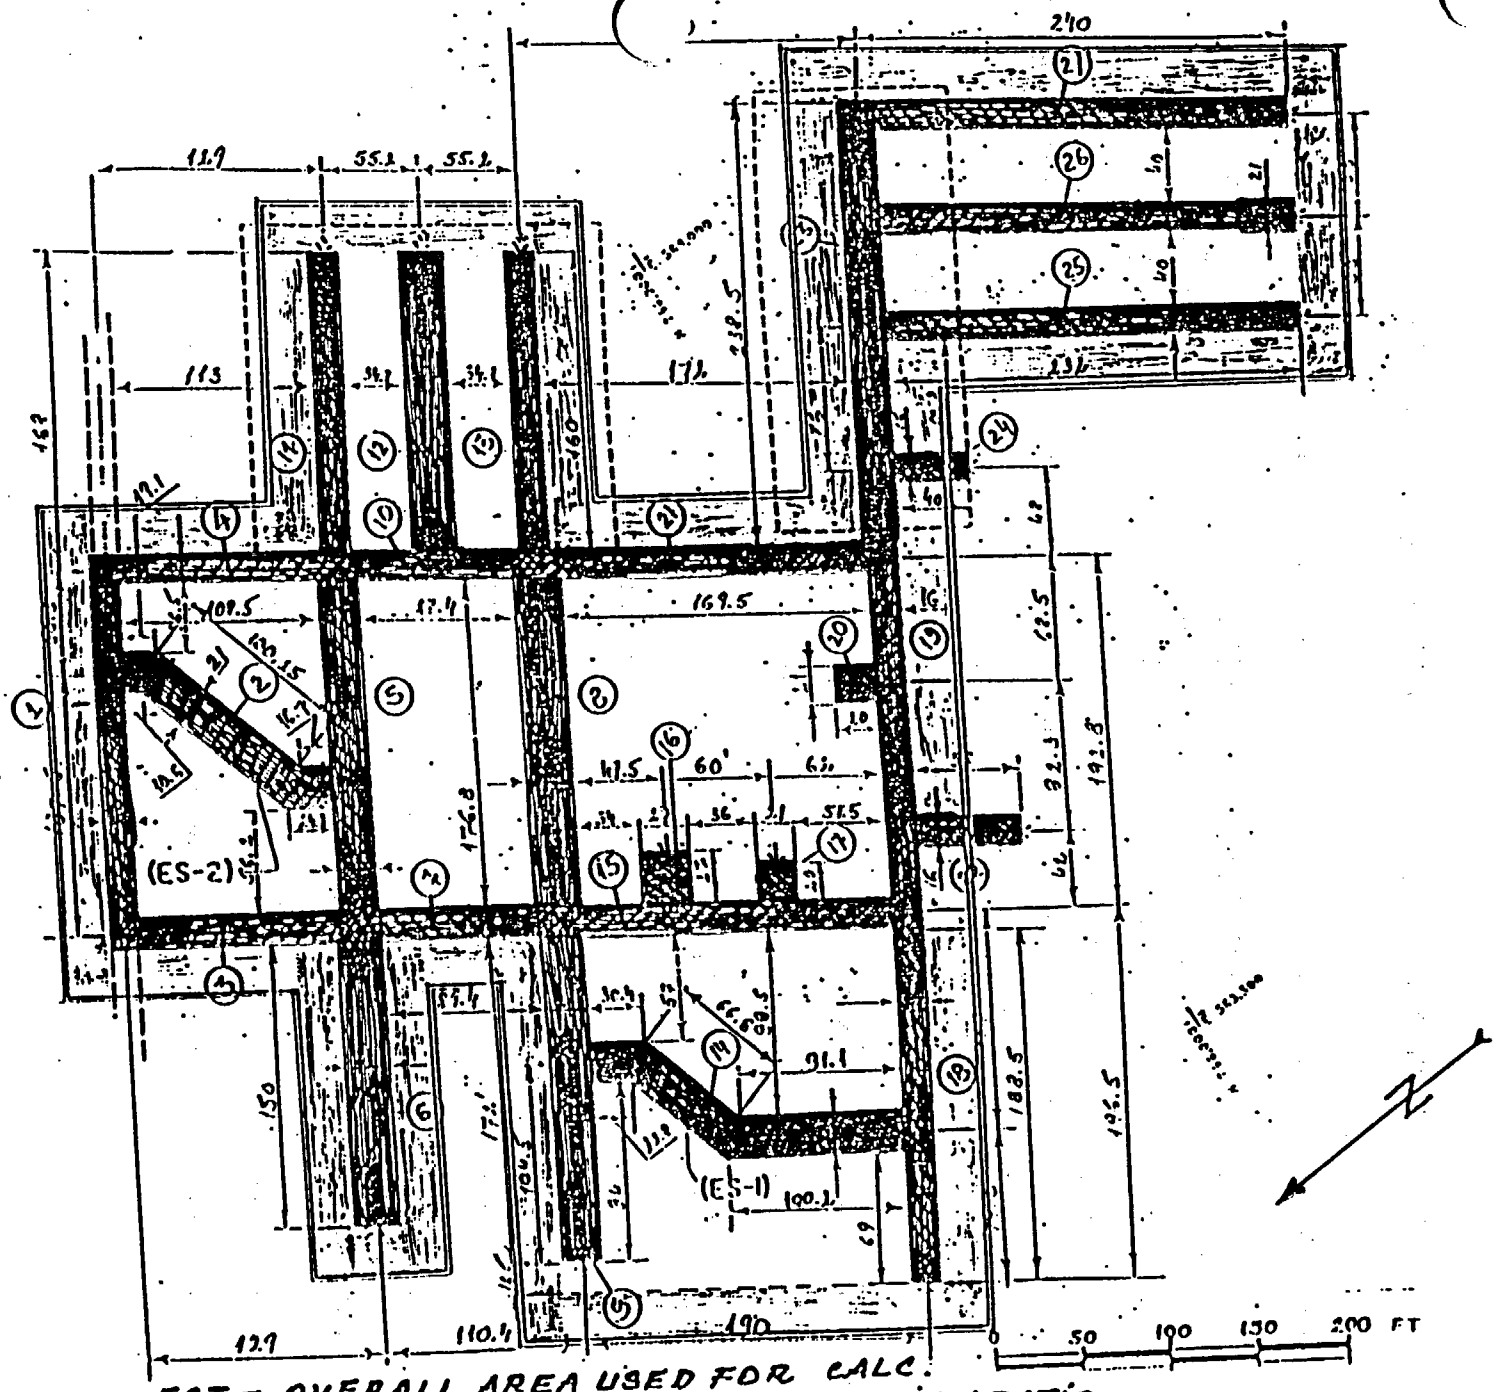
ESF - SELECTED ACTIVITY AREAS



ESF - OUTLINE OF EXCAVATIONS
INCLUDED IN EACH ACTIVITY AREA



ESF - OUTLINE OF THE [illegible] IRE ESF AREA
USING 25 FT ENVELOPE "RULE"



ESF - OVERALL AREA USED FOR CALC.
OF THE OVERALL AREAL EXTRACTION RATIO

EXTRACTION RATIO FOR THE SELECTED UNDERGROUND ACTIVITY AREAS

TOTAL AREA (A_T) (ft^2)	EXTRACTED AREA (A_E) (ft^2)	PILLAR AREA (A_P) (ft^2)	EXTRACTION RATIO (R_E) (%)
ACTIVITY AREA #1 (AA-1)			
50,595	15,841	34,754	31.3
ACTIVITY AREA #2 (AA-2)			
65,788	16,550	49,238	25.2
ACTIVITY AREA #3 (AA-3)			
39,866	13,204	26,662	33.1
ACTIVITY AREA #4 (AA-4)			
53,400	14,196	39,204	26.6
OVERALL AREAL EXTRACTION RATIO - ENTIRE ESF AREA			
272,671	73,000	199,671	26.8

TOTAL	26	6	32			

NOISE

○ FAN NOISE

- COMPLETED CALCULATION
- MOST FANS EXCEED ACGIH LIMIT

  85 dBA -- 8 HR. EXPOSURE
- ATTENUATORS WILL BE PROVIDED
- FAN MANUFACTURING CONTACT TO PROVIDE ATTENUATORS WITH GUARANTEED FAN NOISE REDUCTION 80 dBA, MEASURED 10' AWAY

○ MINING EQUIPMENT NOISE

- SPECIFICATION CASE BY CASE

  TITLE II EFFORT

DUST CONTROL

○ SPECIFICATION OF DUST COLLECTION UNIT

1. MOBILE TO GO WITH MINING ACTIVITY
   - DRILLING
   - BOLTING
   - AFTER BLASTING
   - MUCKING

2. CRITERIA
   - MINE PROVEN/COMMERCIALLY AVAILABLE
   - MSHA TESTED (RI 1150, 1984)
   - FIVE STAGE DUST REMOVAL & DISPOSAL
   - COLLECTION EFFICIENCY
     a.) 99% PARTICLES > 3.0 um
     b.) 96% PARTICLES DOWN TO 1.0 um
     (TESTED TO 0.79 um)
   - AIR QUANTITY PROCESSED 10,000 TO 15,000 cfm.

DUST CONTROL (CONTINUED)

- STATIONARY DUST CONTROL, TITLE II, WHEN DUST SOURCE DETAILS ARE ESTABLISHED.
  - -- SHAFT STATION DUMPING/MUCKING
  - -- LOADING POCKETS
  - -- HOISTING

- AE WAITING FOR DATA AIRBORNE DUST COMPOSITION

HEATING & COOLING

○ SHAFT AIR HEATING

5° F ----> 42° F

a.) ES-1 1700 kw

b.) ES-2 1300 kw

USE PROPANE OR ELECTRIC BLAST HEATER (MOBILE)
-- TITLE II

○ COOLING

- VIRGIN ROCK TEMPERATURE (MTL) $\leq 80°$ F
- EXPECTED AIR TEMPERATURE $< 80°$ Fwb
- SDRD REQUIREMENT 400 w/m 2

  AIR COOLING POWER MEANS MAINTAINING UNDERGROUND TEMPERATURES BELOW 66° Fwb. (OVERLY RESTRICTIVE)

- ECR SUBMITTED, CHANGE SDRD TO

  260 w/m 2 -- CONSERVATIVE MINING INDUSTRY PRACTICE EQUIVALENT TO 82° Fwb AT 60 FPM WIND VELOCITY

VENTILATION LIFE SAFETY AND MONITOR

- IDENTIFIED TOTAL NUMBER GAS AND TEMPERATURE SENSORS
- IDENTIFIED LOCATION OF FIRE DOORS
- CONSERVATIVE SIZING/INSTALLATION OF PRIMARY FANS
  - a.) EFFECT EMERGENCY AIRFLOW REVERSAL
  - b.) PREVENT COMPLETE LOSS OF VENTILATION EVEN IF ONE OR TWO PRIMARY FANS FAIL.
- ACTIVITY INTERFACE WITH H & N

MINE WATER DISTRIBUTION SYSTEM

DESIGN PROGRESS SINCE 50% TITLE I REVIEW

- ELIMINATE CHDR COMPONENTS
- RE-EVALUATE SERVICE TO EXPLORATORY DRIFTS
- PRIMARY LINE SIZES DETERMINED
- DESIGN ANALYSIS REINFORCES CONCEPTS
- RE-EVALUATE PEAK DEMAND REQUIREMENTS
- INTERFACE POINTS BETTER DEFINED
- ADDITIONAL COMPONENTS FOR RELIABILITY

SUMMARY OF ESSENTIAL INFORMATION

- DESIGN USER PRESSURE — 80 psi
- DESIGN PIPING VELOCITY LIMIT — 4 to 10 fps
- DESIGN PEAK DEMAND — 500 gpm
- UNCERTAINTY ALLOWANCE — 35%
- SYSTEM SERVES MINE WATER AND FIRE PROTECTION NEEDS
- SYSTEM UTILIZES A DISTRIBUTION LOOP
- INCLUDES FAILSAFE FEATURES - EXCESS FLOW CONTROL VALVES.
- NON POTABLE

MINE WASTE WATER REMOVAL SYSTEM

DESIGN PROGRESS SINCE 50% TITLE I REVIEW

- ELIMINATE CHDR COMPONENTS
- RE-EVALUATE INFLOW FROM EXPLORATORY DRIFTS
- PRIMARY LINE SIZES DETERMINED
- DESIGN ANALYSIS REINFORCES CONCEPTS
- RE-EVALUATE TOTAL INFLOW TO MTL SUMP
- INTERFACE POINTS BETTER DEFINED
- LIST OF PUMP REQURIEMENTS DEVELOPED
- PRIMARY MTL SUMP PUMP SELECTED
- PRIMARY MTL SUMP RELOCATED
- PRIMARY MTL SUMP CONFIGURATION DEVELOPED

SUMMARY OF ESSENTIAL INFORMATION

- DESIGN PIPING VELOCITY LIMIT 8 fps
- PRIMARY MTL PUMP
  - -- DESIGN FLOWRATE 500 gpm
  - -- DESIGN HEAD PRESSURE 1150 ft. H_2O
- FULLY REDUNDANT MTL PUMP/PIPING CAPACITY 1000 gpm
- ESTIMATED NORMAL INFLOW TO MTL SUMP 100 gpm
- SYSTEM DESIGN LIMITS WATER HAMMER

COMPRESSED AIR SYSTEM

DESIGN PROGRESS SINCE 50% TITLE I REVIEW

- ELIMINATE CHDR COMPONENTS
- RE-EVALUATE SERVICE TO EXPLORATORY DRIFTS
- PRIMARY LINE SIZES DETERMINED
- DESIGN ANALYSIS REINFORCES CONCEPTS
- RE-EVALUATE PEAK DEMAND REQUIREMENTS
- RECEIVER SIZE DETERMINED
- BOOSTER AIR COMPRESSOR REQUIREMENTS ESTABLISHED

COMPRESSED AIR SYSTEM (CONTINUED)

SUMMARY OF ESSENTIAL INFORMATION

- DESIGN SUPPLY PRESSURE AT COMPRESSOR — 125 psi
- DESIGN USER PRESSURE — 100 psi
- TOTAL ACCEPTABLE PRESSURE DROP — 25 psi
- ESTIMATED PRESSURE DROP
  - --MOISTURE SEPARATOR/HEADER — 4 psi
  - --LONGEST RUN OF PIPE, VALVES & FITTINGS — 6 psi
- DESIGN PIPING VELOCITY LIMIT
  - --MAIN — 2000 fpm
  - --BRANCH — 3000 fpm

DESIGN USER TEMPERATURE LIMIT — 130
(REQUIRES AFTERCOOLER)

- DESIGN PEAK DEMAND — 10,000 scfm
  - --CONSTRUCTION & TESTING
- REQUIRED COMPRESSOR UNITS
  (@ 1250 scfm ea.)
  - --FOR SHAFT SINKING PHASE — 2
  - --FOR CONSTRUCTION & TESTING PHASE — 6
  - --FOR PEAKING — 8
- SYSTEMS UTILIZES DISTRIBUTION LOOP
- UNCERTAINTY ALLOWANCE — 35%
