**FOR THE POINT BEACH INITIAL EXAMINATION - SEPT 2003**

**EXAMINATION SECURITY AGREEMENT  
(EVALUATORS OR OTHERS INVOLVED)**

**Pre-Examination:**

I acknowledge that I have acquired specialized knowledge about the 2003 NRC Initial License Training examination scheduled to be administered during **the week of September 29, 2003**. I agree to not knowingly divulge any information about this examination to any unauthorized persons. An unauthorized person is any individual who has not been approved by an Operations Training Coordinator to receive specialized knowledge of the examination. I understand that I am not to participate in any instruction or tutoring involving those individuals scheduled to be administered this examination until completion of their examination administration. I further understand that violation of the conditions of this agreement may result in cancellation of the examination and/or an enforcement action against me or the facility licensee.

**Post-Examination:**

I did not, to the best of my knowledge, divulge any information concerning the examination, administered during **the week of September 29, 2003**, to any unauthorized persons. I did not participate in instructing those licensees who were administered this examination from the date that I entered into the security agreement until the completion of their examination administration.

Facility: PBNP		Date of Exam: 9/29-10/3/03		Scenario Numbers: 1 / 2		Operating Test No: 2003301			
QUALITATIVE ATTRIBUTES							Initials		
							a	b*	c#
1.	The initial conditions are realistic, in that some equipment and/or instrumentation may be out of service, but it does not cue the operators into expected events.								
2.	The scenarios consist mostly of related events.								
3.	Each event description consists of <ul style="list-style-type: none"> <li>the point in the scenario when it is to be initiated</li> <li>the malfunction(s) that are entered to initiate the event</li> <li>the symptoms/cues that will be visible to the crew</li> <li>the expected operator actions (by shift position)</li> <li>the event termination point (if applicable)</li> </ul>								
4.	No more than one non-mechanistic failure (e.g., pipe break) is incorporated into the scenario without a credible preceding incident such as a seismic event.								
5.	The events are valid with regard to physics and thermodynamics.								
6.	Sequencing and timing of events is reasonable, and allows the examination team to obtain complete evaluation results commensurate with the scenario objective.								
7.	If time compression techniques are used, the scenario summary clearly so indicates. Operators have sufficient time to carry out expected activities without undue time constraints. Cues are given.								
8.	The simulator modeling is not altered.								
9.	The scenarios have been validated. Pursuant to 10 CFR 55.46(d), any open simulator performance deficiencies have been evaluated to ensure that functional fidelity is maintained while running the planned scenarios.								
10.	Every operator will be evaluated using at least one new or significantly modified scenario. All other scenarios have been altered in accordance with Section D.5 of ES-301.								
11.	All individual operator competencies can be evaluated, as verified using Form ES-301-6 (submit the form along with the simulator scenarios).								
12.	Each applicant will be significantly involved in the minimum number of transients and events specified on Form ES-301-5 (submit the form with the simulator scenarios).								
13.	The level of difficulty is appropriate to support licensing decisions for each position.								
TARGET QUANTITATIVE ATTRIBUTES (PER SCENARIO; SEE SECTION D.5.d)							Actual Attributes

- Instructions:
- (1) Enter the operating test number and Form ES-D-1 event numbers for each evolution type.
  - (2) Reactivity manipulations may be conducted under normal or *controlled* abnormal conditions (refer to Section D.5.d) but must be significant per Section C.2.a of Appendix D. \* Reactivity and normal evolutions may be replaced with additional instrument or component malfunctions on a one-for-one basis.
  - (3) Whenever practical, both instrument and component malfunctions should be included; only those that require verifiable actions that provide insight to the applicant's competence count toward the minimum requirement.
