August 14, 2003

Ms. Kathy Modes
U.S. NRC Region I
475 Allendale Road
King of Prussia, PA 19406-1415

Subject: Johnstown High School
Discovery of Radioactive Material

Dear Ms. Modes:

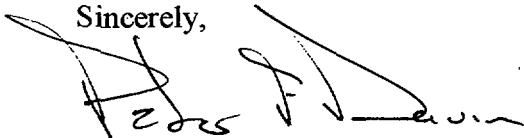

Per our conference call earlier today with Todd Mobley of Applied Health Physics, Inc., MOTA Corporation has been requested to assess the presence of certain radioactive material recently discovered in the chemistry laboratory within the Johnstown High School located in Johnstown Pennsylvania. Consistent with your direction, I have not enclosed a copy of our report regarding our assessment.

Applied Health Physics, Inc. (AHP) is currently scheduled to initiate removal operations during the week of August 18, 2003. I understand that you are familiar with AHP, but for your ease of reference, their phone number is 412-835-9555. AHP will apprise you of developments in the unlikely event that the removal operation deviates from our discussion.

For your information, Todd Mobley and I apprised Jim Yusko of the Pennsylvania Department of Environmental Protection of the situation and our removal plan.

My contact information is set forth on this letterhead. Thank you for your courtesy in this matter.

Sincerely,

Peter F. Davin
Vice President &
General Counsel
