

WEEKLY REPORT TO THE COMMISSION

OFFICE OF NUCLEAR MATERIAL SAFETY AND SAFEGUARDS

Proposed Rule Signed by EDO

On November 20, 2003, the Executive Director for Operations approved a proposed rule which revises 10 CFR Part 72.214, "List of approved spent fuel storage casks," revising the Transnuclear, Inc., Standardized NUHOMS® Horizontal Modular Storage System (Standardized NUHOMS® System) listing within the list of approved spent fuel storage casks to include Amendment No. 7 in Certificate of Compliance (CoC) Number 1004. Amendment No. 7 will incorporate changes in support of the Amergen Corporation plans to load damaged fuel and additional fuel types at its Oyster Creek Nuclear Station. Specifically, the amendment will add damaged Boiling Water Reactor spent fuel assemblies and additional fuel types to the authorized contents of the NUHOMS®-61BT Dry Shielded Canister under a general license. In addition, the amendment includes three minor changes to the Technical Specifications to correct inconsistencies and remove irrelevant references.
