Gentlemen:

During December, 1988, newspapers in Las Vegas and Reno, Nevada have printed stories relating to the proposed high level nuclear waste dump at Yucca Mountain, including references to a NRC review of DOE's characterization plan. According to these stories, NRC identified five "major problems" that must be addressed by DOE, etc..

If possible, please send me a copy of this NRC report. I would like to be placed on distribution for other NRC reports and other documentation regarding the Yucca Mountain site or other aspects of the high level waste disposal program.

Thank you for your cooperation.

Sincerely,

Harold A. Rogers
