#### A. <u>Purpose</u>

This procedure provides actions to restore emergency coolant recirc capability, to delay depletion of the FWST by adding makeup and reducing oufflow, and to depressurize the **NC** System to minimize break flow.

#### B. Symptoms or Entry Conditions

This procedure is entered from:

- EP/1/A/5000/E-1 [Loss Of Reactor Or Secondary Coolant), Step 13, and EP/1/A/5000/ES-1.2 (Post LOCA Cooldown And Depressurization), Step 4, when Cold Leg Recirc capability can not be verified.
- EP/1/A/5000/ES-1.3 (Transfer To Cold Leg Recirc), Foldout Page, if recirc flow cannot be aligned or maintained.
- EP/1/A/5000/ES-1.3 (Transfer To Cold Leg Recirc), Step 3, if containment sump level less than setpoint.
- EP/1/A/5000/ES-1.3 (Transfer To Cold Leg Recirc), Step 6, when at least one flow path from the sump can not be established or maintained.
- EP/1/A/5000/ES-1.3 (Transfer To Cold Leg Recirc), Step 11, if Cold Leg Recirc flow can not be verified.
- EP/1/A/5000/ECA-1.2 (LOCA Outside Containment), Step 3, when a LOCA outside containment cannot be isolated.

## LOSS OF EMERGENCY COOLANT RECIRC

ACTION/EXPECTED RESPONSE	RESPONSE NOT OBTAINED
C. Operator Actions	
<b> 1</b> . Monitor <b>Foldout</b> page.	
2. Try to restore <b>Cold</b> Leg Recirc capability:	
a. Check any ND pump - ON.	a. Perform the following:
	1j <u>iF</u> containment sump level is less than 3 ft, <u>THEN GO TO</u> Step 2.b.
	2) Close the following:
	<ul> <li>1ND-19A (A ND Pump Suct From FWST or NC)</li> <li>1ND-4B (B ND Pump Suct From FWST or NC).</li> </ul>
	NOTE Closing 1ND-19A and 1ND-4B meets one of the permissives to allow manual opening of associated sump valve.
	<ol> <li>WHEN 1ND-I9A is closed, THEN attempt to open 1NI-185A (RB Sump To Train A ND &amp; NS) as follows:</li> </ol>
	<ul> <li>Place control permissive switch in "BYPASS and open 1NI-185A.</li> </ul>
	<ul> <li>4) WHEN 1ND-4B is closed, THEN attempt to open 1NI-184B (RB Sump To Train 6 ND 8 NS) as follows:</li> </ul>
	<ul> <li>Place control permissive switch in "BYPASS" and open 1NI-184B.</li> </ul>
	5) <u>IF</u> sump valve opens, <u>THEN</u> start ND pump on same train.

#### ACTION/EXPECTED RESPONSE

- 6. Determine NS requirements:
  - \_\_\_\_a Check NS pump suction ALIGNED TO \_\_\_\_a. <u>GO TO</u> Step 9 FWST
  - \_ b. Determine number of NS pumps required from the following table:

FWST LEVEL	CONTAINMENT PRESSURE	NS PUMPS REOUIRED
GREATER THAN	GREATER THAN 15 PSIG	2
33 inches ("FWST LO-LO LEVEL" a1arm)	BETWEEN 10 PSIG AND 15 PSIG	1
	LESS THAN 10 PSIG	0
LESS THAN 33 inches ("FWST LO-LO LEVEL" alarm)	N/A	0

- \_\_ c. Check NS pumps running EQUAL TO NUMBER REQUIRED
- c. Perform the following.
- \_\_\_\_ 1) Reset Containment Spray
- \_\_\_\_ 2) Operate NS pumps as required by table above.
- 7. Check criteria to align NS System for recirc:
  - \_\_\_\_\_a. Any NS pump ON.
  - \_\_\_\_ b. Check containment sump level. GREATER THAN 3 FT.
- \_\_\_\_ a. <u>GO TO</u> Step 8.
  - b. Perform the following:
  - <u>WHEN</u> containment sump level greater than 3 *ft*. <u>THEN</u> perform Step 7.c.
    - 2) GO TO Step 8
- \_ c Align NS for recirc <u>PER</u> Enclosure 3 (NS Alignment To Containment Sump)

MNS EP/1/A/5000/ECA-1 1

RESPONSE NOT OBTAINED

- 11. Monitor shutdown margin during cooldown as follows:
  - a. <u>WHEN</u> the TSC is staffed, <u>THEN</u> request TSC to evaluate obtaining samples as follows:
    - 1) Consider available cooling of sample HXs as follows:
    - KC will remain isolated to normal sample HXs for 10 hours, until KC is realigned to normal sample HXs and KF per AP/1/A/5500/41 (Loss Of Spent Fuel Cooling or Level).
    - IF sample is desired prior to aligning KC to KC aux bldg non-essential header, <u>AND</u> fuel damage is not expected, <u>THEN</u> evaluate obtaining sample <u>PER</u> OP/1/A/6200/011 (Unit 1 NM Sampling) Enclosure 4.6 (1NC Hot Leg with KC Non-essential Header Isolated).
  - 2) Evaluate obtaining periodic NC System boron sample to check shutdown margin during cooldown.
  - **NOTE** Sample results are not required prior to initiating cooldown in subsequent steps.
    - b. <u>WHEN</u> each NC boron sample obtained, <u>THEN</u>:
    - 1) Perform shutdown margin calculation for Cold Shutdown <u>PER</u> OP/0/A/6100/006 (Reactivity Balance Calculation).
    - \_\_\_\_ 2) Check shutdown margin ADEQUATE.

\_\_\_\_ 2) Notify station management

UNIT ]

ENCLOSURE 4.3 CURVE 7.38

OP/1/A/6100/22

#### 5.2 Organization (continued)

#### 5.2.2 Unit Staff

The unit staff organization shall include the following:

a. A non-licensed operator shall be assigned to each reactor containing fuel and an additional non-licensed operator shall be assigned for each control room from which a reactor is operating in MODES 1, 2, 3, or 4.

A total of three non-licensed operators are required for the two units.

- b. At least one licensed Reactor Operator (RO) shall be present in the control room when fuel is in the reactor. In addition, while the unit is in MODE 1, 2, 3, or 4, at least one licensed Senior Reactor Operator (SRO) shall be present in the control room.
- c. Shift crew composition may be less than the minimum requirement of 10 CFR 50.54(m)(2)(i) and 5.2.2.a and 5.2.2.g for a period of time not to exceed 2 hours in order to accommodate unexpected absence of on-duty shift crew members provided immediate action is taken to restore the shift crew composition to within the minimum requirements.
- d. A Radiation Protection Technician shall be on site when fuel is in the reactor. The position may be vacant for not more than 2 hours, in order to provide for unexpected absence, provided immediate action is taken to fill the required position.
- e. Administrative procedures shall be developed and implemented to limit the working hours of station staff who perform safety related functions (e.g., licensed SROs, licensed ROs, radiation protection technicians, auxiliary operators, and key maintenance personnel).

Adequate shift coverage shall be maintained without routine heavy use of overtime. The objective shall be to have operating personnel work a 12 hour day with alternating **48** hour and **36** hour weeks while the unit is operating. However, in the event that unforeseen problems require substantial amounts of overtime to be used, or during extended periods of shutdown for refueling, major maintenance, or plant modification, on a temporary basis the following guidelines shall be followed:

1. An individual should not be permitted to work more than **16** hours straight, excluding shift turnover time;

(continued)

McGuire Units 1 and 2

#### 5.2 Organization

#### 5.2.2 <u>Unit Staff</u> (continued)

- An individual should not be permitted to work more than 16 hours in any 24 hour period, nor more than 28 hours in any 48 hour period, nor more than 72 hours in any 7 day period, all excluding *shift* turnover time;
- 3. A break of at least 8 hours should be allowed between work periods, including shift turnover time;
- 4. Except during extended shutdown periods, the use of overtime should be considered on an individual basis and not for the entire staff on a shift.

Any deviation from the above guidelines shall be authorized in advance by the Station Manager or his designee, in accordance with approved administrative procedures, or by higher levels of management, in accordance with established procedures and with documentation of the basis for granting the deviation.

Controls shall **be** included in the procedures such that individual overtime shall be reviewed monthly by the Station Manager or his designee to ensure that excessive hours have not been assigned. Routine deviation from the above guidelines is not authorized.

- f. The Operations Manager shall hold or have held an **SRO** license.
- g. The Shift Technical Advisor (STA) shall provide advisory technical support to the Control Room Senior Reactor Operator (CRSRO) in the areas of thermal hydraulics, reactor engineering, and plant analysis with regard to the safe operation of the unit.

:

# **General Emergency**

# 1. Symptoms

.

Events are in process or have occurred which involve <u>actual</u> or <u>imminent</u> substantial core degradation or melting with potential **for** loss **of** containment integrity.

# 2. Immediate Actions

**NOTE:** • The Immediate Actions and part of the Subsequent Actions have been separated into position specific enclosures to enhance timely completion and consistent execution.

- 2.1 The following Enclosures should be given to the appropriate personnel:
  - The OSM should execute Enclosure 4.9 (OSM Immediate and Subsequent Actions) in a timely manner.
  - The WCC SRO, or another SRO designated by the OSM should execute Enclosure 4.10 (WCC SRO Immediate and Subsequent Actions) in a timely manner.
  - The STA should execute Enclosure **4.1** (STA Immediate and Subsequent Actions) in a timely manner.

# 3. Subsequent Actions

3.1 Follow-up Notifications

# **NOTE:** IF changes to the initial Protective Action Recommendations are recognized and approved by the Emergency Coordinator, these changes shall be transmitted to the offsite agencies within 15 minutes. (PIP-M-00-02138)

- 3.1.I Assess protective action recommendations made to the State and Counties in the previous notification. Refer to Enclosure 4.2, page 1 of **4**.
- \_\_\_\_\_ **3.**I.2 The Emergency Coordinator shall make follow-up notifications to State and County authorities utilizing Enclosure 4.1 (Emergency Notification Form):
  - Every hour until the emergency is terminated
    - OR
  - If there is any significant change to the situation
    - <u>OR</u>

- As agreed upon with &individual agency. Documentation shall be maintained **for** any agreed upon schedule change and the interval <u>shall not</u> be greater than **2** hours to **any** agency.

- \_\_\_\_\_ 3.1.3 Complete Enclosure 4.1 (Emergency Notification Form) in accordance with Enclosure 4.5, Section 1.
- \_\_\_\_\_ 3.1.4 Make follow-up notification lo State and County authorities using the Emergency Notification Form in accordance with Enclosure 4.5, Section 2.

**3.2** Ensure completion of Enclosure 4.7 (Emergency Coordinator / Emergency Operations Facility Director Turnover Checklist) prior to turnover of Emergency Coordinator responsibilities

**NOTE:** A TSC preprogrammed fax button is available on the Control Room fax machine.

**IF** changes to the initial Protective Action Recommendations are recognized during the turnover, the turnover should not be completed until the Control Room transmits this notification to the offsite agencies. {PIP-M-0-00541}

## <u>OR</u>

- Fax turnover sheet to the TSC
- 3.4 In the event that a worker's behavior or actions contributed to an actual or potential substantial degradation of the level of safety of the plant (incidents resulting in an Alen or higher emergency declaration), the supervisor must consider and establish whether or not a for cause drug/alcohol screen is required. The FFD Program Administrator or designee is available to discuss/assist with the incident.
  - 3.5 Protective Actions Onsite

١.

- 3.5.1 Evacuate non-essential personnel from the site after all personnel have been accounted for via Site Assembly. Refer to **RP/0/A/5700/011** (Conducting a Site Assembly, Site Evacuation or Containment Evacuation).
- **3.5.2 IF** a situation which is immediately hazardous to life or valuable property exists, **THEN** evaluate potential dose rates by one of the following methods:
  - a. Contact RP Shift at Ext. **4282**
  - b. Assess area monitors
- \_\_\_\_\_ 3.5.3 Complete Enclosure **4.8** (Request for Emergency Exposure), prior to dispatch of emergency workers if emergency situation precludes documentation.

**RP/0/A/5700/004** Page 5 of 5

3.6	Using S	ection <b>D</b> of the Emergency Plan (EAL Basis). assess the emergency condition:
_ <u>,</u> ,	3.6.1	Remain in <b>a</b> General Emergency,
OR		
	3.6.2	Terminate the emergency. <b><u>REFER TO</u></b> RP/0/A/5700/012 (Activation of the Technical <b>Support</b> Center {TSC}), Enclosure <b>4.19</b> for termination criteria.
3.7	Termination Notifications	
NOTE	Enclosur	e 4.6 has instructions for completion and transmission of termination notifications.
<u> </u>	_ 3.7.1	Complete Enclosure <b>4.1</b> (Emergency Notification Form) in accordance with Enclosure <b>4.6</b> , Section 1
	3.7.2	Make termination notification to State and County authorities using the Emergency Notification Form in accordance with Enclosure <b>4.6</b> , Section 2.

# Initial Notification Completion/Transmission

# 1. Completion of the Emergency Notification Form

NOTE:	ONLY Items 1 - 10, 15 and 16 are required. Items 11 - 14 may be skipped.
1.1	Complete Enclosure 4.1 (Emergency Notification Form) as follows:
NOTE:	Message #'s should be sequentially numbered throughout the drill/emergency.
	- Item 1 Check A for Drill <u>OR</u> B for Actual Emergency <u>AND</u> Check INITIAL <u>AND</u> Write in message number.
NOTE:	Certain events could occur at the plant site such that both units are affected. These may include: Enclosure 4.3 (Abnormal Rad Levels/Radiological Effluent), Enclosure 4.6 (Fires/Explosions and Security Events) and Enclosure 4.7 (Natural Disasters, Hazards and Other Conditions Affecting Plant Safety) from RP/0/A/5700/000, (Classification of Emergency). Consider this when completing the "unit designation" on line 2 of the Emergency Notification Form. {PIPO-M97-4638}
t	REPORTED BY: is the Communicator's name.
	Item 2 Write in the unit(s) <u>AND</u> Communicator's name.
NOTE:	Information for Items <b>3</b> and <b>4</b> will be completed during transmission of the Emergency Notification Form.
<u></u>	- Item 3 Write in the transmittal time <u>AND</u> date.
	- Item 4 Write in appropriate number <u>AND</u> codeword.
	- Item 5 Check D for GENERAL EMERGENCY.
<u>-</u>	- Item 6 Check A for Emergency Declaration At: <u>AND</u> Write the time <u>AND</u> date the classification was declared.

## Initial Notification Completion/Transmission

RP/**0**/A/5700/004 Page **2** of **9** 

**NOTE:** Reference RP/0/A/5700/000, (Classification of Emergency)

- Item 7 Enter EAL Number and Emergency Description of the reason for declaring the emergency classification (in layman's terms. if possible). **DO NOT use** system abbreviations, acronyms orjargon which may cause confusion. Instead, write out the description in long hand. Be sensitive to the fact that certain descriptive technical terms may elicit unanticipated reactions from others. {PIP0-M98-2065}
- \_\_\_\_\_ Item 8 Check the appropriate plant condition. (PIP0-M97-4210 NRC-I)
  - A **Improving:** Emergency conditions are improving in the direction of a lower classification or termination of the event.
  - •B Stable: The emergency situation is under control. Emergency core cooling systems, equipment, plans. etc.. are operating as designed.
  - •C **Degrading:** Given current and projected plant conditions/equipment status. recovery efforts are not expected to prevent entry into a higher emergency Classification or the need **to** upgrade offsite Protective Action Recommendations.
  - Item 9 Check A SHUTDOWN AND write the time and date of Reactor Shutdown

#### <u>OR</u>

Check B AND write in the Reactor Power level

# **RP/0**/A/5700/004 Page 3 of 9

# Initial Notification Completioflransmission

**NOTE:** 1. An emergency release is any unplanned, quantifiable discharge to the environment associated with a declared emergency event. (This definition is based on an NRC commitment made on 11/30/90 following McGuire's Steam Generator Tube Rupture.) (PIP0-M97-4256}

- 2. Notify the OSM if box C or box **D** is checked.
- 3. Base the determination of emergency release on:
  - EMF readings,
  - containment pressure and other indications,
  - field monitoring results,
  - knowledge of the event and its impact on systems operation and resultant release paths.
- 4. An emergency release is occurring if any one or more of the following bulleted conditions are met associated with a declared emergency:
  - <u>Either</u> containment particulate, gaseous, iodine monitor (EMFs 38, 39 and/or 40) readings indicate an increase in activity.

#### <u>OR</u>

Containment monitor (EMFs 51A and/or 51B) readings indicate greater than 1.5R/hr,

#### <u>AND</u>

Either containment pressure is greater than 0.3 psig,

#### <u>OR</u>

An actual containment breach is known to exist.

- Unit vent paniculate. gaseous, iodine monitor (EMFs 35.36, and/or 37) readings indicate an increase in activity.
- Condenser air ejector exhaust monitor (EMF 33) or other alternate means indicate Steam Generator tube leakage.
- Confirmed activity in the environment reported by Field Monitoring Team(s)
- Knowledge of the event and its impact on systems operation and resultant release paths

\_\_\_\_ Item 10 Check the appropriate box for emergency release.

- A NONE: clearly no emergency release is occurring or has occurred
- **B POTENTIAL:** discretionary option for the EC or EOFD.
- C **IS OCCURRING:** meets the specified conditions.
- **D HAS OCCURRED:** previously met the specified conditions.

#### Initial Notification Completion/Transmission

RP/**0**/A/5700/004 Page **4** of 9

Item 15	Check <b>B</b> <u>AND</u> write affected zones for evacuation <u>AND</u> Check C <u>AND</u> write the letter designation for all other zones not evacuated.
Item <b>16</b>	Have the Emergency Coordinator approve the message $\underline{AND}$ Write in the time $\underline{AND}$ date the message was approved.

# 2. TRANSMISSION OF THE EMERGENCY NOTIFICATION FORM

- **NOTE:** 1. All initial notifications are **verbal.** Avoid using abbreviations or jargon likely to be unfamiliar to the State and Counties. If any information is not available or not applicable, write out "Not Available" or "Not Applicable" in the margin or other space as appropriate. Do not abbreviate "N.A.".
  - 2. The backup means of communications are the Bell line or County Emergency Response Radio. RP/0/A/5700/014, Enclosure 4.1 is available for needed backup numbers.
  - 3. Refer to page 6 of 9 of this Enclosure for instructions on how to use the County Emergency Response Radio if selective signaling or Bell line is not available.
  - 2.1 Use the Selective Signaling telephone by dialing \*I and depressing the push to talk button
  - 2.2 **IF** Selective Signaling Group Call fails, **THEN** go to RP/0/A/5700/014, Enclosure 4.1 for manual selective signaling numbers.

**NOTE:** The time when the first party is contacted should be recorded on Line 3.

- 2.3 As the State and Counties answer, check them off on the back of the notification form. At least one attempt using the individual selective signaling code must be made for any missing agencies. Proceed with the notification promptly following an attempt to get missing agencies on the line.
- ----- 2.4 Check the State and Counties arc on the line, document this time in item #3 on the form. This time should not exceed <u>15 minutes</u> from the time of declaration (Item # 6).
- 2.5 Tell them you have an emergency notification from the McGuire Control Room and to get out the Emergency Notification Form.
- **2.6** Read the complete message *slowly*. line by line, heginning with Item # 1, allowing ample time to copy.

#### Initial Notification CompletiofIransmission

RP/**0**/A/5700/004 Page 5 of 9

**NOTE:** Refer to page 7 of **9** of this enclosure for the authentication codeword list.

,

- 2.7 When you reach item #4, ask the State or a County to authenticate the message. The agency should give you **a** number and **you** should provide the appropriate codeword. Write the number and codeword on the form.
- 2.8 After communicating the initial message, ask if there are any questions. Record individuals' names and times on the back of the form. This time is the same time as Item **#3**.
- After verbally transmitting the message. **FAX** 3 copy (front page only) to the agencies. Refer tu pages 8 of 9 and 9 of 9 of this Enclosure for FAX operation.
- ----- 2.10 Continuous attempts to contact missing agencies must be made if unable to complete the notification per step 2.3. Document the time these agencies were contacted on the back of the notification form.

#### Initial Notification Completioflransmission

**RP/0/A/5700/004** Page **6** of 9

## COUNTY EMERGENCY RESPONSE RADIO

**NOTE:** This radio will onlycontact the County warning points. The State <u>cannot</u> be contacted on this radio. Have one of the Counties relay the message to the State.

Group Call:

- \_\_\_\_ I. Press **20** to activate all County radio units.
- \_\_\_\_\_ 2. When the ready light comes on, press the bar on the transmitter microphone and say:

"This is McGuire Control Room to all Counties, do you copy?"

Once all Counties respond, begin transmitting the message using step 2.3 through 2.10 of this enclosure.

#### Proceed with the notification promptly following an attempt to get missing agencies on the air.

- **UTE:** RP/0/A/5700/014. Enclosure 4.1 is available for needed individual radio codes.
  - 3. If a County fails to respond on the group call, press their individual code on the encoder and say:

"This is McGuire Control Room to (Agency you are calling). do you copy?"

Once the County responds, begin transmitting the message using step 2.3 through 2.10 of this enclosure.

- After you have finished transmitting the message, conclude by saying: "This is WQC700 base clear."
  - 5. Continuous attempts to contact missing agencies must be made if unable to complete the notification per step 2. Document the time these agencies were contacted on the hack of the notification form.

# **OPERATION OF THE FAX**

### A. <u>GROUPFAX</u>

- **NOTE:** 1. The FAX will dial each agency in sequence. If the FAX is busy, it will try again after completing the other calls.
  - 2. This sends a FAX to all County Warning Points, State EOC, TSC. EOF. News Group and JIC.
  - I. Insert the Emergency Notification Form face down into the FAX.
    - 2. Press GROUP FAX button.
  - **3.** Press "SENDIRECEIVE button

# B. **INDIVIDUAL** FAX

- Insert the Emergency Notification Form face down into the FAX
- \_\_\_\_\_ 2. Select location(s) to receive the fax:
  - Press News Group
  - Press TSC.
  - *o* Press State of North Carolina EOC.
  - Press Mecklenburg County Warning Point,
  - Press Gaston County Warning Point.
  - Press Lincoln County Warning Point
  - Press Iredell County Warning Point.
  - Press Catawba County Warning Point
  - \_\_\_\_ o Press Cabarrus County Warning Point
  - Press EOF.
  - Press JIC.
    - 3. <u>WHEN</u> the appropriate individual location is selected, <u>THEN</u> press the "SEND/RECEIVE" hutton.

# Initial Notification Completion/Transmission

RP/**Û**/A/5700/004 Page 9 of 9

NOTE: RP/0/A/5700/014, Enclosure 4.1 is available for needed manual FAX numbers.

- C. To send a FAX to a single location dialing manually:
- Insert the document face down into the FAX.
- 2. Using the keypad, dial the number that you wish to call

Follow-Up Notification Completio~ransmission RP/**0**/A/5700/004 Page 1 of 6

# 1. Completion of the Emergency Notification Form

NOTE: If items 8 - 14 have not changed from the previous message, only items I - 7, 15 and 16 are required to be completed. Avoid using abbreviations or jargon likely to be unfamiliar to the State and Counties. If any information is not available or not applicable. write out "Not Available" or "Not Applicable" in the margin or other space as appropriate. Do not abbreviate "N.A.". Complete Enclosure 4.1 (Emergency Notification Form as follows): 1.1 NOTE: Message #'s should be sequentially numbered throughout the drill/emergency. Check A for Drill **OR** B for Actual Emergency AND Item 1 Check FOLLOW-UP AND Write in message number. NOTE: Certain events could occur at the plant site such that both units are affected. These may include: Enclosure 4.3 (Abnormal Rad Levels/Radiological Effluent), Enclosure 4.6 (Fires/Explosions and Security Events) and Enclosure 4.7 (Natural Disasters, Hazards and Other Conditions Affecting Plant Safety) from RP/0/A/5700/000, (Classification of Emergency). Consider this when completing the "unit designation" on line 2 of the Emergency Notification Form. {PIP 0-M97-46381 **REPORTED BY:** is the Communicator's name. — Item 2 Write in the unit(s)  $\underline{AND}$  Communicator's name. NOTE: Transmittal time is the time you FAX the form to the agencies. Write in the transmittal time AND date. Item 3 Authentication is not required when faxing. Item 4 Check D for GENERAL EMERGENCY. – Item 5 Check A for Emergency Declaration At: AND ltem 6 Write the time AND date the classification was declared

# Follow-Up Notification Completion/Transmission

RP/**0**/A/5700/004 Page **2** of 6

# NOTE: Reference **RP/0/A/5700/000**, (Classification of Emergency)

Item 7 Enter EAL Number and Emergency Description of the reason for declaring the emergency classification (in layman's terms, if possible). **DO** NOT use system abbreviations. acronyms or jargon which may cause confusion. Instead. write out the description in long hand. Be sensitive to the fact that certain descriptive technical terms may elicit unanticipated reactions from others. (PIP0-M98-2065)

In addition. provide **a** description of changes in plant conditions since the last notification. Items to be <u>considered</u> for inclusion are as follows: [PIP0-M98-2065]

- Other unrelated classifiable events (for example, during an Alert, an event which, by itself would meet the conditions for an Unusual Event)
- Major/Key Equipment Out of Service
- Emergency response actions underway
- Fire(s) onsite
- Flooding related to the emergency Explosions Loss of Offsite Power
- Core Uncovery
- Core Daniage
- Medical Emergency Response Team activation related to the emergency
- Personnel injury related to the emergency or death
- Transport of injured individuals offsite specify whether contaminated or not
- Site Evacuation/relocation of site personnel
- Saboteurs/Intruders/Suspicious devices/Threats
- Chemical or Hazardous Material Spills or Releases
- Extraordinary noises audible offsite
- Any event causing/requiring offsite agency response
- Any event causing increased media attention
- Remember to "close the loop" on items from previous notifications.

# Follow-Up Notification Completion/Transmission

**RP/0/A/**5700/004 Page **3 of 6** 

	-
— Item 8	Check the appropriate plant condition. {PIP M-097-4210 NRC-1)
	• A. Improving: Emergency conditions are improving in the direction of a lower classification or termination of the event.
	• B. Stable: The emergency situation is under control. Emergency core cooling systems, equipment, plans, etc., are operating as designed.
	• C. Degrading: Given current and projected plant conditions/equipment status, recovery efforts are not expected to prevent entry into a higher emergency classification or the need to upgrade offsite Protective Action Recommendations.
Item 9	Check A SHUTDOWN AND write the time and date of Reactor Shutdown
	OR

Check B  $\underline{AND}$  write in the Reactor Power level

# **RP/<b>0**/A/5700/004 Page 4 of 6

# Follow-Up Notification Completion/Transmission

**NOTE:** 1. An emergency release is any unplanned, quantifiable discharge to the environment associated with a declared emergency event. (This definition is based on an NRC commitment made on 11/30/90 following McGuire's Steam Generator Tube Rupture.) (PIP0-M97-4256)

- 2. Notify the OSM if box C or **box** D is checked
- 3. Base the determination of emergency release on:
  - EMF readings.
  - containment pressure and other indications,
  - field monitoring results,
  - knowledge of the event and its impact on systems operation and resultant release paths.
- 4. An emergency release is occurring if any one or more of the following bulleted condition! are met associated with a declared emergency:
  - <u>Either</u> containment particulate, gaseous. iodine monitor (EMFs 38, 39 and/or 40) readings indicate an increase in activity.

### <u>OR</u>

Containment monitor (EMFs 51A and/or 51B) readings indicate greater than 1.5R/hr,

### <u>AND</u>

Either containment pressure is greater than 0.3 psig.

### <u>OR</u>

An actual containment breach is known to exist.

- Unit vent particulate, gaseous, iodine monitor (EMFs 35, 36, and/or 37) readings indicate an increase in activity.
- Condenser air ejector exhaust monitor (EMF 33) or other alternate means indicate Steam Generator tube leakage.
- Confirmed activity in the environment reported by Field Monitoring Team(s)
- Knowledge of the event and its impact on systems operation and resultant release paths

\_\_\_\_ Item 10 Check the appropriate box for emergency release.

- A NONE: clearly no emergency release is occurring or has occurred
- **B POTENTIAL:** discretionary option for the EC or EOFD.
- C **IS OCCURRING:** meets the specified conditions.
- **D HAS OCCURRED:** previously met the specified conditions.

# Enclosure 4.5 Follow-Up Notification CompletiofIransmission

**RP/0/A/5700/004** Page 5 of 6

- **1.2 IF** follow-up notification is due and information for Items **II** through 14 cannot be obtained from RP shift, **THEN** mark each item "Not Available" and go to Item 15.
  - Item 11 Check GROUND LEVEL <u>AND</u> Check **A** for AIRBORNE <u>OR</u> B for LIQUID <u>AND</u> Write in the time <u>AND</u> date the release started <u>AND</u> stopped if available
    - Item 12 Check CURIES PER SECOND <u>AND</u>
       Check BELOW <u>OR</u> ABOVE normal operating limits <u>AND</u>
       Check the appropriate blocks A, B, C, D <u>AND</u> write in the value(s).

**NOTE:** If unchanged from the previous notification, the information **does** not have to be repeated.

- Item 13 Check NEW <u>OR</u> UNCHANGED <u>AND</u> Write in the projection time <u>AND</u> Write in the estimated duration <u>AND</u> Write in the TEDE and Thyroid CDE values.
  - Item 14 Check A, B, C, D <u>AND</u> provide values foreach.
  - Item IS Check B AND write affected zones for evacuation

### <u>AND</u>

Check C AND write the letter designation for all other zones not evacuated

Item 16 Have the Emergency Coordinator approve the message <u>AND</u> Write in the time <u>AND</u> date the message was approved.

# Follow-Up Notification Completion/Transmission

**RP/0/A/**5700/004 Page **6 of** 6

# 2. Transmission of the Emergency Notification Form

- **NOTE:** For routine, follow-up notifications, FAX a copy of the notification form instead of verbally transmitting the message (front page only). This applies only if the message **does** not involve a change in the emergency classification or the protective action recommendations or a termination of the emergency. Call each agency to verify they received the message.
- 2.1 Insert the Emergency Notification Form (front page only) face down into the FAX
  - 2.2 Press "GROUP FAX button.
  - 2.3 Press "SEND/RECEIVE" button.
- **2.4 IE** programmed functions fail, <u>**THEN**</u> go to **RP/0/A/5700/014**, Enclosure **4.1** for manual FAX numbers.
  - 5 Ensure the State and Counties received the FAX by calling them.

Ask if there are any questions on the Emergency Notification Form, then record individuals' names and times on the back of the form.

# Termination Notification Completioflransmission

# 1. co pleti n f the Em rgency Notification Form

\_\_\_\_ Item 2

NOTE: A termination message should be marked as FOLLOW-UP on the Emergency Notification Form. 1.1 Complete Enclosure 4.1 (Emergency Notification Form) as follows: Item [ Check A for Drill OR B for Actual Emergency AND Check FOLLOW-UP AND Write in message number. NOTE: Certain events could occur at the plant site such that both units are affected. These may include: Enclosure 4.3 (Abnormal Rad Levels/Radiological Effluent), Enclosure 4.6 (Fires/Explosions and Security Events) and Enclosure 4.7 (Natural Disasters, Hazards and Other Conditions Affecting Plant Safety) from RP/0/A/5700/000, (Classification of Emergency). Consider this when completing the "unit designation" on line 2 of the Emergency Notification Form. (PIP0-M97 46381 **REPORTED BY:** is the Communicator's name.

Write in the unit(s) AND Communicator's name

 NOTE:
 Information for Items 3 and 4 will be completed dunng transmission of the Emergency Notification Form

 Item 3
 Write in the transmittal time <u>AND</u> date

 Item 4
 Write in appropriate number <u>AND</u> codeword

 Item 5
 Check D for GENERAL EMERGENCY

 Item 6
 Check B for Termination At: <u>AND</u> Write the time <u>AND</u> date the classification was terminated.

 Item 16
 Have the Emergency Coordinator approve the message <u>AND</u> Write in the time <u>AND</u> date the message was approved.

Termination Notification Completion/Transmission

# 2. Transmission of the Emergency Notification Form

ŧ

- NOTE: 1. All termination notifications are verbal. Avoid using abbreviations or jargon likely to be unfamiliar to the State and Counties. If any information is not available or not applicable, write out "Not Available" or "Not Applicable" in the margin or other space as appropriate. Do not abbreviate "N.A.".
  - 2. The backup means of communications are the Bell line or County Emergency Response Radio. RP/0/A/5700/014, Enclosure 4.1 is available for needed backup numbers.
  - 3. Refer to page 3 of 6 of this enclosure for instructions on how to use the County Emergency Response Radio if selective signaling or Bell line is not available.
- 2.1 Use the Selective Signal telephone by dialing \*1 and depressing the push to talk button
- **IE** Selective Signaling Group Call fails, <u>**THEN**</u> go to RP/0/A/5700/014, Enclosure 4.1 for manual selective signaling numbers.
- 2.3 As the State and Counties answer. check them off on the back of the notification form. At least one attempt using the individual selective signaling code must be made for any missing agencies Proceed with the notification promptly following an attempt **to** get missing agencies on the line.
- \_\_\_\_\_ 2.4 Check the State and Counties are on the line, document this time in item #3 on the form
- \_\_\_\_\_ 2.5 Tell them you have an emergency notification from the McGuire Control Room and to get out the Emergency Notification Form.
- 2.6 Read the complete message *slowly*. line by line, beginning with Item # I, allowing ample time to copy.

**NOTE:** Refer to page **4 of** 6 of this Enclosure for the authentication codeword list.

- 2.7 When you reach item **#4.** ask the State or a County to authenticate the message. The agency should give you a number and you should provide the appropriate codeword. Write the number and codeword on the form.
- 2.8 After communicating the message. ask if there are any questions. Record individuals' names and times on the back of the form. This time is the same time as Item #3.
- 2.9 After verbally transmitting the message, FAX a copy (front page only) to the agencies. Refer to page 5 of 6 and 6 of 6 of this enclosure for FAX operation.

# **RP/0**/A/5700/004 Page 3 of 6

# Termination Notification Completion/Transmission

**2.10** Continuous attempts to contact missing agencies must be made if unable to complete the notification per step 2.3. Document the time these agencies were contacted on the back of the notification form.

# COUNTY EMERGENCY RESPONSE RADIO

**NOTE:** This radio will only contact the County warning points. The State <u>cannot</u> be contacted on this radio. Have one of the Counties relay the message to the State.

#### Group Call:

- \_\_\_\_ I. Press **20** to activate all County radio units
  - 2. When the ready light comes on, press the bar on the transmitter microphone and say:

"This is McGuire Control Room to all Counties, do you copy?"

Once all Counties respond, begin transmitting the message using step 2.3 through 2.10 of this enclosure.

# Proceed with the notification promptly following an attempt to get missing agencies on the air.

**NOTE:** RP/0/A/5700/014, Enclosure 4.1 is available for needed individual radio codes.

3. If a County fails to respond on the group call, press their individual code on the encoder and say:

"This is McGuire Control Room to (Agency you are calling), do you copy'?"

Once the County responds, begin transmitting the message using step 2.3 through step 2.10 of this enclosure.

4. After you have finished transmitting the message. conclude by saying:

"This is WQC700 base clear."

\_\_\_\_\_5. Continuous attempts to contact missing agencies must be made if unable to complete the notification per Step 2. Document the time these agencies were contacted on the back of the notification form.

# **OPERATION OF THE FAX**

# A. <u>GROUPFAX</u>

- NOTE: **I.** The FAX will dial each agency in sequence. If the **FAX** is busy, it will try again after completing the other calls.
  - 2. This sends a FAX lo all County Warning Points, State EOC. TSC. EOF. News Group and JIC.
  - **1**. Insert the Emergency Notification Form face down into the FAX.
  - ----- 2. Press "GROUP FAX" button.
  - **3.** Press "SENDIRECEIVE button.

### B. INDIVIDUAL FAX

- 1. Insert the Emergency Notification Form face down into the FAX.
- 2. Select location(s) to receive the fax:
- Press News Group.
- Press TSC.
- Press State of North Carolina EOC.
- Press Mecklenburg County Warning Point
- Press Gaston County Warning Point.
- Press Lincoln County Warning Point.
- Press Iredell County Warning Point.
- Press Catawba County Warning Point.
- Press Cabarrus County Warning Point.
- Press EOF.
- Press JIC.
  - 3. <u>WHEN</u> the appropriate individual location is selected, <u>THEN</u> press the "SENDIRECEIVE hutton.

# Termination Notification CompletiofIransmission

RP/**0**/A/5700/004 Page 6 of 6

# **OPERATION OF THE FAX**

NOTE: RP/0/A/5700/014, Enclosure 4.1 is available for needed manual FAX numbers.

- C. To send a **FAX** *to* a <u>single</u> location dialing manually:
- \_\_\_\_\_ I. Insert the document face down in !he FAX.
- \_\_\_\_\_ 2. Using the keypad. dia! the number that you wish to call.
- \_\_\_\_\_ **3.** Press "SEND/RECEIVE" button.

RP Badge No.	Name	Age	Employer	Signature of Individual

My signature indicates my acknowledgement that I have been informed that I may be exposed to the levels of radiation indicated above. I have been fully briefed on the task to be accomplished and on the risks of this exposure.

I,	acknowledge this planned Emergency Exposure	
	(RPM or designee, signature or note of verbal authorization	Date/Time

I. \_\_\_\_\_\_ approve this planned Emergency Exposure at \_\_\_\_\_\_ (Emergency Coordinator or EOF Director. signature or note of verbal authorization Date/Time

Subsequent Radiation Protection Action:

ŝ

• Determine need for medical evaluation

- Initiate reporting requirements per 10CFR20

· Copy to Individual's Exposure History File

**OSM Immediate and Subsequent Actions** 

# 1. Immediate Actions

Initial

<b>1</b> .I	The Operations Shift Manager or designee <b>SHALL ANNOUNCE</b> the event over the plant P.A. system <b>by</b> performing the following:
	I.1.1 Turn on the outside page speakers.
NOTE:	• For drill purposes, state "This is a drill. This is a drill."
	• Any plant phone in the Control Room horse shoe area or extension <b>4021</b> is programmed to access 710, site all call. {PIP0-M98-2545}

- I.1.3 Repeat the preceding announcement one time.
- I. **1.4** Turn off the outside page speakers.

# Enclosure 4.9 OSM Immediate and Subsequent Actions

NOTE:	1.	Initial notification to the State and Counties <u>must</u> be made within 15 minutes of the event declaration, using Enclosure 4.1.
	2.	Enclosure 4.3 has instructions for completion/transmission of the Emergency Notification Form

- 1.2 The Emergency Coordinator shall recommend to offsite authorities in the initial notification the following:
- **NOTE:** I. To obtain the wind speed, use chart recorder 1EEBCR9100, point #5 (Average Lower Wind Speed).
  - 2. To obtain the wind direction, use chart recorder 1EEBCR9100, point 38 (Average Upper Wind Direction).
  - 3. If either point on 1EEBCR9100 is unavailable, obtain needed data from one of the following sources in order of sequence:
    - A. DPC Meteorological Lab(8-594-0341)
    - B. National Weather Service in Greer. S.C. (864-879-1085 or 1-800-268-7785)
    - C. Catawha Nuclear Station Control Room (8-831-5345).
- **NOTE:** IF changes to the initial Protective Action Recommendations are recognized and approved by the Emergency Coordinator, these shall be transmitted to the offsite agencies within 15 minutes. {PIP-M-00-01238}
  - I.2.I <u>IF containment radiation levels exceed the levels on Enclosure 4.2, page 2 of 4</u>, Guidance for Determination of Gap Activity, <u>THEN</u>:
    - Evacuate the 5-mile radius <u>AND</u> 10 miles downwind as shown on Enclosure 4.2, page 2 of 4, Protective Action Zones Determination, using wind direction

# <u>AND</u>

• Shelter remaining zones as shown on Enclosure 4.2, page 2 of 4, Protective Action Zones Determination, using wind direction.

# **OSM Immediate and Subsequent Actions**

1.2.2 <u>If containment radiation levels **DO NOT** exceed the levels on Enclosure 4.2, page 2 of 4, Guidance for Determination of Gap Activity, **THEN** perform one **of** the following:</u>

**IF** wind speed less than or equal to 5 **MF**", <u>**THEN**</u>:

• Evacuate zones L, B, M, C, N, A. D, O, R

# <u>AND</u>

• Shelter zones E, F, G, H, I, J. K, P, Q, S.

# <u>OR</u>

**IF** wind speed greater than 5 MPH, **THEN**:

• Evacuate the 2-mile radius <u>AND</u> 5 miles downwind as shown on Enclosure 4.2, page 3 of 4, Protective Action Zones Determination, using wind direction

### <u>AND</u>

- Shelter remaining zones as shown on Enclosure 4 2, page 3 of **4**, Protective Action Zones Determination. using wind direction
- <u>IF</u> valid trip II alarm occurs on any one of the following:

1 OR 2 EMF36(L)

1 EMF24, 25, 26, 27

2 EMFIO, 11, 12, 13

<u>THEN</u> immediately contact RP shift at 4282 to perform HP/0/B/1009/029 (Initial Response On-Shift Dose Assessment).

1.4 IF box C (IS OCCURRING) or box D (HAS OCCURRED) from Item 10 (EMERGENCY RELEASE) on Enclosure 4.1, (Emergency Notification Form) is checked, THEN immediately contact RP shift at 4282 to perform HP/0/B/1009/029 (Initial Response On-Shift Dose Assessment).

# OSM Immediate and Subsequent Actions

# 2. Subsequent Actions

-

NOTE:	Site Assembly is a required on-site protective action in response to an Alert or higher declaration.
2.1	<b>IF</b> a site assembly has not already been initiated, <b>THEN</b> refer to RP/0/A/5700/011 (Conducting a Site Assembly, Site Evacuation or Containment Evacuation) to evaluate and initiate a site assembly.
2.2	Augment shift resources to assess and respond to the emergency situation as needed
2.3	$\underline{\text{GO TO}}$ Step 3.1 in the body of this procedure and continue with the prescribed subsequent actions.

# WCC SRO Immediate and Subsequent Actions

# 1. Immediate Actions

Initial

NOTE:	1.	Initial notification to the State and Counties <u>must</u> be made within 15 minutes of the event declaration, using Enclosure 4.1.
	2.	Enclosure 4.3 has instructions for completion/transmission of the Emergency Notification Form.
1.1		be Emergency Coordinator shall recommend to offsite authorities in the initial notitication e following:
NOTE:	1.	To obtain the wind speed, use chart recorder 1EEBCR9100, point #5 (Average Lower Wind Speed).
	2.	<b>To</b> obtain the wind direction. use chart recorder 1EEBCR9100, point #8 (Average Upper Wind Direction).
	3.	If either point on 1EEBCR9100 is unavailable, obtain needed data from one of the following sources in order of sequence:
		A. DPC Meteorological Lab (8-594-0341)
		<ul> <li>B. National Weather Service in Greer, S.C. (864-879-1085 or 1-800-268-7785).</li> </ul>
		C. Catawba Nuclear Station Control Room (8-831-5345)
ΝΟΤΕ·		changes to the initial Protective Action Recommendations are recognized and approved by

# **NOTE:** <u>IF</u> changes to the initial Protective Action Recommendations are recognized and approved by the Emergency Coordinator, these shall be transmitted to the offsite agencies within 15 minutes. {PIP-M-00-01238}

- I.I.I **IF** containment radiation levels exceed the levels on Enclosure 4.2. page 2 of 4, Guidance for Determination of Gap Activity, **THEN**:
  - Evacuate the 5-mile radius <u>AND</u> 10 miles downwind as shown on Enclosure 4.2, page 2 of 4, Protective Action Zones Determination, using wind direction

# <u>AND</u>

• Shelter remaining zones as shown on Enclosure 4.2, page 7 of 4, Protective Action Zones Determination, using wind direction.

# WCC SRO Immediate and Subsequent Actions

1.1.2 If containment radiation levels <u>**DO** NOT</u> exceed the levels on Enclosure 4.2, page 2 of 4, Guidance for Determination *af* Gap Activity, <u>THEN</u> perform one of the following:

**IE** wind speed less than or equal to 5 **MPH**, **<u>THEN</u>**:

• Evacuate zones L. B, M, C, N, A, D, O, R

# AND

- Shelter zones E, F. G, H, I, J, K, P. Q, S

# <u>OR</u>

**IF** wind speed greater than 5 MPH, <u>**THEN**</u>:

• Evacuate the 2-mile radius <u>AND</u> 5 miles downwind as shown on Enclosure 4.2, page **3** of 4, Protective Action Zones Determination, using wind direction

### AND

- Shelter remaining zones as shown on Enclosure 4.2, page 3 of 4, Protective Action Zones Determination, using wind direction.
- 1.2 Complete items 1 -10, 15 and 16 on Enclosure 4.1 (Emergency Notification Form) in accordance with Enclosure 4.3, Section 1.
  - **1.3** Make initial notification to State and County authorities using the Emergency Notification Form in accordance with Enclosure 4.3, Section 2.

# 2. Subsequent Actions

i i

- 2.1 Notify the NRC Operations Center by completing Enclosure **4.4** and transmitting immediately but no later than 1 hour of the event declaration using RP/0/A/5700/014, Enclosure 4.2.
  - 2.2 Inform the OSM when this enclosure has been completed, reporting any deficiencies or problems encountered.

### STA Immediate and Subsequent Actions

# 1. Immediate Actions

# Initial

NOTE:	For a D	For a Drill, the Community Alert Network (CAN) is not activated.					
1.1	For a se	For a security event, go to steps 1.4, 1.5. and 1.6.					
1.2		<b>U I</b>	onse Organization by contacting Security via the ringdown xtension 2688 or 4900 and issue the following message:				
	. 1.2.1	For <b>a</b> Drill	"Activate the <b>TSC/OSC/EOF</b> pagers. McGuire Delta, General Emergency declared at (time)."				
	I. <b>2.2</b>	For an Emergency	"Activate the TSC/OSC/EOF pagers, McGuire Echo, General Emergency declared at(time)." <u>AND</u> "Activate the CAN system."				
NOTE:	• For a	a Drill, the Emergency I	Response Data System (ERDS) is not activated.				
	acce	ss. These are located in	I deactivated from designated computer terminals with SDS the Shift Work Manager's office, the Data Coordinators' hin the Control Room horseshoe area.				

- 1.3 For an Emergency, activate the Emergency Response Data System (ERDS) as soon as possible, but not later than one hour after the emergency declaration per the following:
  - 1.3.1 Ensure SDS is running on the selected terminal.
  - **1.3.2** Click on MAIN.
  - I.3.3 Click on GENERAL.
  - 1.3.4 Click on ERDS.
  - I.3.5 Click on ACTIVATE.
  - 1.3.6 Record the time and date ERDS was activated. TIME/DATE // / Eastern mm dd yy
  - 1.3.7 Inform the OSM that ERDS was activated.
  - 1.3.8 IF ERDS failed lo activate after five (5) attempts, <u>THEN</u> have an Offsite Agency Communicator notify the NRC via ENS or other available means.

RP/**0**/A/5700/004 Page 2 of 2

# STA Immediate and Subsequent Actions

- I For a ll, **IF** a security event exists and offsite ERO staging is desired before giving instructions to report to the **TSC** and OSC, **THEN** contact Security via the ringdown phone to the **CAS/SAS**, or at extension **2688** or 4900, and give instructions to activate the TSC/OSC, according to the Emergency Response Pager Instructions for a security event drill.
  - 1.5 For an actual emergency, **IF** a security event exists and offsite ERO staging **is** desired before giving instructions to report to the **TSC/OSC**, **THEN** contact Security via the ringdown phone to the **CAS/SAS**, or at extension 2688 or 4900. and give instructions to activate the **TSC/OSC**, according to the Emergency Response Pager Instructions for a security event emergency.
    - I.6 When the security event is stabilized to the point that ERO members can come on site, go to step 1.2.

# 2. Subsequent Actions

- 2.1 Notify one of the NRC Resident Inspectors using RP/0/A/5700/014, Enclosure 4.2.
- 2.2 Contact **Duke** Management using **RP/0/A/5700/014**, Enclosure 4.3 as soon **as** possible following event declaration.
  - **2.3** Inform the OSM when this enclosure has been completed, reporting any deficiencies or problems.

### 3.3 INSTRUMENTATION

3.3.1 Reactor Trip System (RTS) Instrumentation

LCO 3.3.1 The RTS instrumentation for each Function in Table 3.3.1-1 shall be OPERABLE.

APPLICABILITY: According to Table 3.3.1-1.

# ACTIONS

# Table 3 3 1-1 (page 5 of 7) Reactor Trip System Instrumentation

### Note 1: Overtemperature AT

The Overtemperature AT Function Allowable Value shall not exceed the following NOMINAL TRIP SETPOINT by more than 4.4% of RTP.

$$\Delta T \frac{(1+\tau_1 s)}{\{1+\tau_2 s\}} \left(\frac{1}{1+\tau_3 s}\right) \leq \Delta T_o \left\{ K_1 - K_2 \frac{(1+\tau_4 s)}{(1+\tau_5 s)} \left[ T \frac{1}{(1+\tau_6 s)} - T' \right] + K_3 (P-P') - f_1 (\Delta I) \right\}$$

- Where: AT is measured RCS AT by loop narrow range RTDs, °F
  - $\Delta T_0$  is the indicated AT at RTP, °F.
  - s is the Laplace transform operator, sec-1
  - T is the measured RCS average temperature, °F.
  - T' is the nominal Tavg at RTP < 585.1 °F.

P is the measured pressurizer pressure. psig P is the nominal RCS operating pressure,= 2235 psig

- $K_3$  = Overtemperature AT reactor trip NOMINAL TRIP SETPOINT, as presented in the COLR.
- $K_2$  = OvertemperatureAT reactor trip heatup setpoint penalty  $\infty$  efficient, as presented in *the* COLR.
- K<sub>3</sub> = OvertemperatureAT reactor trip depressurization setpoint penalty coefficient, as presented in the COLR.
- $\tau_1, \tau_2 = \text{Time constants utilized in the lead-lag controller for AT, as presented in the COLR,}$
- $\tau_3$  = Time constants utilized in the lag compensator for AT, as presented in the COLR,
- $\tau_4, \tau_5$  = Time constants utilized in the lead-lag controller for  $T_{exp}$ , as presented in the COLR,
- $\tau_{c}$  = Time constants utilized in the measured  $T_{avg}$  lag compensator, as presented in the COLR. and.
- f<sub>1</sub>(ΔI) = a function of the indicated difference between lop and bottom detectors of the power-range nuclear ion chambers; with gains to be selected based on measured instrument response during plant startup tests such that
  - (i) for  $q_t \cdot q_b$  between the "positive" and 'negabve'  $f_1(\Delta I)$  breakpoints as presented in the COLR.  $f_1(\Delta I) = 0$ , where  $q_t$  and  $q_b$  are percent RATED THERMAL POWER in the top and bottom halves of the core respectively, and  $q_t + q_b$  is total THERMAL POWER in percent of RATED THERMAL POWER,

(continued)

l

Table 3.3 1-1 (page 6 of 7) Reactor Trip System Instrumentation

- (ii) for each percent imbalance that the magnitude of  $q_1 q_b$  is more negative than the  $f_1(\Delta I)$  'negative' breakpoint presented in the COLR, the AT Trip Setpoint shall be automatically reduced by the  $f_1(\Delta I)$  'negative' slope presented in the COLR; and
- (iii) for each percent imbalance that the magnitude of  $q_f \cdot q_b$  is more positive than the  $f_1(\Delta I)$  'positive' breakpoint presented in the COLR. the AT Trip Setpoint shall be automatically reduced by the  $f_1(\Delta I)$  "positive" slope presented in the COLR.

### Note 2: Overpower AT

The Overpower AT Function Allowable Value shall not exceed the following NOMINAL TRIP SETPOINT by more than 3.0% of RTP.

$$\Delta T \frac{(1+\tau_{1} s)}{(1+\tau_{2} s)} \left(\frac{1}{1+\tau_{3} s}\right) \leq \Delta T_{0} \left\{ K_{4} - K_{5} \frac{\tau_{7} s}{1+\tau_{7} s} \left(\frac{1}{1+\tau_{6} s}\right) T - K_{6} \left[T \frac{1}{1+\tau_{6} s} - T'\right] - f_{2} (\Delta I) \right\}$$

Where: AT is measured RCS AT by loop narrow range RTDs. °F.

∆T₀ is the indicated AT at RTP, °F

s is the Laplace transform operator, sec<sup>-1</sup>.

T is the measured RCS average temperature, °F.

T is the nominal T<sub>ave</sub> at RTP, < 585.1 °F.

- K<sub>4</sub> = Overpower AT reactor NOMINAL TRIP SETPOINT as presented in the COLR,
- $K_s = 0.02/{^{\circ}F}$  for increasing average temperature and  $\theta$  for decreasing average temperature,
- $K_s$  = Overpower AT reactor trip heatup setpoint penalty coefficient as presented in the COLR for T > T and  $K_s = 0$  for T  $\leq T$ .
- $\tau_1, \tau_2$  = Time constants utilized in the lead-lag controller for AT, as presented in the COLR.
- $\tau_3$  = Time constants utilized m the lag compensator for AT. as presented in the COLR,
- $\tau_6 = Time$  constants utilized in the measured  $T_{seq}$  tag compensator. as presented in the COLR,
- $\tau_7$  = Time constant utilized in the rate-lag controller for,T as presented in the COLR, and
- $f_2(\Delta I) =$  a function of the indicated difference between top and bottom detectors of the power-range nuclear ion chambers: with gains to be selected based on measured instrument response during plant startup tests such that:

#### (continued)

### Table 3.3.1-1 (page 7 of 7) Reactor Trip System Instrumentation

- (i) for  $\mathbf{q}_t \mathbf{q}_b$  between the "positive" and 'negative'  $f_2(\Delta I)$  breakpoints as presented in the COLR;  $f_2(\Delta I) = 0$ , where  $\mathbf{q}_t$  and  $\mathbf{q}_b$  are percent RATED THERMAL POWER in the top and bottom halves of the core respectively, and  $\mathbf{q}_t + \mathbf{q}_b$  is total THERMAL POWER in percent of RATED THERMAL POWER;
- (ii) for each percent imbalance that the magnitude of  $\mathbf{q}_t \mathbf{q}_b$  is more negative than the  $f_2(\Delta I)$  'negative' breakpoint presented in the COLR, the AT Trip Setpoint shall be automatically reduced by the  $f_2(\Delta I)$  "negative" slope presented in the COLR; and
- (iii) for each percent imbalance that the magnitude of  $\mathbf{q}_t \mathbf{q}_b$  is more positive than the  $f_2(\Delta I)$  "positive" breakpoint presented in the COLR, the AT Trip Setpoint shall be automatically reduced by the  $f_2(\Delta I)$ 'positive' slope presented in the COLR.
