Re: Correction of Certificate of Compliance USA/9215/B(U)

Dear Mr. Brach:

Confirming our telephone conversation of October 1, 2003 with Ms. Julia Barto, this is to request that the referenced revision of drawing 240116 in Certificate of Compliance USA/9215/B(U) be corrected from Revision F to Revision G which corrects the dimension of the cavity depth of the wooden overpack from 27-1/4 to 29-1/4 inches in accordance with the "Request for Additional Information" in your letter to Neutron of October 16, 2002.

In addition, Revision G was corrected to add from Revision D:

- the dimension of the hole in the tie down bracket as 13/16 inches;
- a weld symbol on the chain bracket assembly; and,
- the through holes in the chain bracket assembly.

In view of the publicity surrounding the deployment of a "dirty bomb" we have been instructed by regulatory authorities (including the NRC) to maintain enhanced security measures. In light of these instructions, we believe it would not be prudent to place the drawings in the Public

4 mss01

Mr. E. William Brach

Document Room, however if the NRC determines that it is safe to do so, we hereby give authorization for you to file the referenced drawings in the Public Document Room.

If there is anything further that we should do, please let me know.

Sincerely
Neutron Products inc
