ATTENTION: Docketing & Service Branch

To: The Secretary of the U.S. Nuclear Regulatory Commission

The Vermont Low-Level Radioactive Waste Advisory Commission, established in Vermont Statute 10 VSA 6510 - 12, is responsible for advising the Governor and Legislature on matters relating to low-level radioactive waste management. The Commission is in the process of developing comments on the advance notice of proposed rule-making, "Definition of High-Level Radioactive Waste; 10 CFR Part 60."

We intend to submit comments to the Nuclear Regulatory Commission on this issue. Our subcommittee, appointed for this purpose, will meet to draft a comment letter during the week of 20 April 1987.

The Vermont Low-Level Radioactive Waste Advisory Commission's comments will be sent to NRC following a meeting of the entire Advisory Commission in early May. We trust that you will accept our comments at that time.

Thank you for your patience in this matter.

Sincerely,

J. Garvan Murtha
