

LETTER TO WHITING 10/5

- 1 -

OCT 10 1989

Mr. Alan Whiting, Director  
Systems Engineering and Integration  
Center for Nuclear Waste Regulatory Analysis  
P. O. Box 28510  
6220 Culebra Road  
San Antonio, Texas 78284

Dear Mr. Whiting:

SUBJECT: FOLLOW UP TO MEETING OF SEPTEMBER 27, 1989 AT CNWRA ON SUBSTANTIALLY COMPLETE CONTAINMENT (SCC) AND PASS DATA FIELDS

Please find enclosed a note to me from J. Pearring regarding his review of SCC Program Architecture data input. We are aware that the DW4 input forms are not generally intended for NRC staff review but the suggested grouping of information may be helpful to the analyst completing the forms.

Also, please find enclosed a memorandum to me from Brad Jones indicating which of the Program Architecture data fields might be considered most important by OGC. This is a preliminary review representing Brad's personal views and could change as experience is gained with data input.

The action taken by this Technical Direction is considered to be within the scope of the current contract NRC-02-88-005. No changes to cost or delivery of contracted services and products are authorized. Please notify me immediately if you believe that this Direction would result in changes to cost or delivery of contracted services or products.

Sincerely,

Philip Altomare, Program Element Manager  
Engineering Branch  
Division of High-Level Waste Management

Enclosures: As stated

- cc: J. Pearring, HLEN
- S. Fortuna, PMPA
- B. Jones, OGC
- B. Stiltentpole, PMPA
