NOV 01 1990

Dear Mr. Romine:

The Center's Outline for the LARS Recommendation Report which is work item 330, an intermediate milestone of Task 9 of WSE&I has been reviewed. Based on this review, some organizational and title changes are suggested to improve the logic and flow of the Center's outline. In addition, while most of the sections of the Center's outline are pertinent, a few additional sections have been suggested, and a few should either be deleted or explained more to understand their usefulness. The organizational and title suggestions are specifically reflected in the form of a recommended revised outline (enclosure) to clearly communicate the comments. A cross-walk from the revised outline to the sections from the Center's outline is also given to explicitly show the additional sections as well as those that might be deleted.

Mr. Robert Johnson has discussed this revised outline with Mr. Robert Adler on October 26, 1990, and further discussions are planned during the October 31, 1990 to November 2, 1990, LARS workshop. If you have any questions please call Robert Johnson.

Sincerely,
