NEVADA BUREAU OF MINES AND GEOLOGY MAP 68

**UNIVERSITY
OF
NEVADA
RENO**

This 1:250,000-scale Bouguer gravity map is a compilation of gravity data obtained from several sources, including the authors of the U.S. Geological Survey and DOD (U.S. Department of Defense Gravity Services Division), St. Louis, MO. Terrain corrections were applied throughout the sheets. Gravity contours are shown at 5 mgal intervals. Includes generalized geology.

PRICE: \$4.00

The Nevada Bureau of Mines and Geology and the Nevada Mining Analytical Laboratory (NBMG/NMAL) are research and public service divisions of the University of Nevada-Reno.

NBMG/NMAL performs research and compiles information on Nevada's geology and mineral resources, and makes the information available through published maps and reports, unpublished data files and collections, talks, correspondence, and personal contacts. NMAL provides assaying, mineral identification, and metallurgical testing services. NBMG, through its affiliation with the National Cartographic Information Center, also provides information and assistance on base maps and airphotos. NBMG/NMAL has no regulatory functions.

NBMG/NMAL research includes all phases of Nevada's geology and mineral resources: basic geologic mapping and laboratory studies, geophysical and geochemical surveys, engineering geology, geologic problems and other considerations in urban and rural planning, the preparation of educational guides and booklets, statewide investigations of mineral commodities, the geology of ore deposits, and the exploration, development, mining, processing, utilization, and conservation of metal ores, industrial minerals, fossil and nuclear fuels, geothermal power, and water.

For information concerning the geology and mineral resources of Nevada, contact: Director, Nevada Bureau of Mines and Geology, University of Nevada, Reno, NV 89557. A publication list will be sent upon request.
