SUBJECT: APPROVAL OF HIGHWAY ROUTE TO TRANSPORT SPENT NUCLEAR FUEL
FROM ATHENS, AL, TO PLEASANTON, CA (NRC ROUTE NO. 209)

Dear Mrs. Oshinowo:

On behalf of the U. S. Nuclear Regulatory Commission (NRC), I am responding to your submittal of July 17, 2003, which requested the NRC approve a route for transporting spent nuclear fuel (SNF) from Browns Ferry Nuclear Plant, Athens, AL, to GE Vallecitos Nuclear Center, Pleasanton, CA (NRC Route No. 209).

The NRC has reviewed Edlow International Company's submittal and concluded that the information satisfies the requirements of 10 CFR 73.37. Specific details of Route No. 209 are enclosed [Enclosure 1]. Specific details of Route No. 209 combined with additional Safeguards Information (SGI) are also enclosed [Enclosure 2]. Enclosure 2 will not be released to the public and you should protect it in accordance with the requirements of 10 CFR 73.21. Approval of Route No. 209 will expire two years from the date of this letter.

The NRC issued additional security measures for the transportation of SNF for NRC licensees who ship greater than 100 grams of SNF. Licensees are required to comply with the requirements of 10 CFR 73.37 and these measures when shipping SNF. Licensees are also required to comply with the U.S. Departments of Transportation and Homeland Security regulations on the shipment of hazardous materials.

In addition, the NRC also issued Regulatory Issue Summary (RIS) 2002-12I, Rev. 1, on October 3, 2002, "Transportation of Spent Nuclear Fuel Greater than 100 Grams - NRC Threat Advisory and Protective Measures System." The RIS advised licensees shipping SNF to consider various recommendations to be taken in conjunction with changes to the national or transportation-sector threat levels.

WARNING: Violation of Section 147 of the Atomic Energy Act, "Safeguards Information" is subject to Civil and Criminal Penalties

When separated from Enclosure 2
this document is DECONTROLLED
