MEMO TO FORTUNA - CNWRA

- 1 -

MEMORANDUM TO: Shirley Fortuna
System Engineering and Evaluation Branch

FROM: Jerome Pearing
Technical Review Branch

SUBJECT: COMMENTS ON PROJECT MANAGER'S PERIODIC REPORT ON
ACTIVITIES OF THE CENTER, DATED MAY 24, 1988.

The subject was received by Dr. Kien Chang, Mr. John Buckley and me. Emphasis of our review was directed toward Item 6 - "Engineered Barrier System" and Item 9 - "Repository Design, Construction and Operations," which pertain to areas for which we have assigned management responsibility.

The comments of Dr. Chang are attached. Although we greatly appreciate the increased level of technical detail presented by the Periodic Report (see Section 6.2.1.4 related to the CONVO work effort) we never-the-less consider our previous comments present a method less burdensome to the center for conveying the information, ie., by attachment of a technical summary adapted from the Center planned intermediate/final reports. Attachment of the technical details as a unit may also serve to help preclude the omission of "stray" figures from the reports such as the omission of Figure A (page 29) as reported by Dr. Chang.

Jerome Pearing
Technical Review Branch
