

AUG 8 1988

MEMORANDUM FOR: DHLWM Branch Chiefs
CNWRA Program Element Managers
Transportation Branch (NMSS)
Office Nuclear Regulatory Research (RES)
Office of Administration & Resources Management (ARM)

FROM: Joseph O. Bunting, Chief
System Engineering and Evaluation Branch
NRC/CNWRA Program Element Manager
Division of High-Level Waste Management

SUBJECT: NRC/CNWRA ADP INTERFACE COMMITTEE

This memorandum supersedes the previous memorandum, same subject, dated August 5, 1988.

The Center for Nuclear Waste Regulatory Analyses (CNWRA) is required to establish an automated data processing (ADP) capability consisting of computer hardware and system software which must interface with NRC end-users as well as the ADP system support currently provided by the Office of Administration and Resources Management (ARM). In order to coordinate the planning for ADP work and establish agency priorities, the Division of High-Level Waste Management (DHLWM) and ARM have agreed to establish an HLW ADP Coordinating Committee. This Committee will be charged with establishing ADP requirements (such as model development, transfer and maintenance of ADP technology, and data base development or maintenance) and priorities for management approval. The Committee will consist of members from ARM, the CNWRA, Office of Nuclear Regulatory Research, the Transportation Branch of the Division of Safeguards and Transportation, and the DHLWM. The Committee will be chaired by Philip M. Altomare.

I request that you provide to Mr. Altomare (4-H-10, ext. 23400) the names of two staff, a primary person and an alternate, to represent your respective organizations. This would provide a core group, but it is expected that other staff would be requested to attend as circumstances dictate. The first meeting will be held on August 17, 1988 at 9:00 a.m. in conference room 6-B-13.
