Subject: "Interim Draft Criteria for Determining Feasibility of Manual Actions to Achieve Post-Fire Safe Shutdown"

Federal Register notice regarding "Interim Draft Criteria for Determining Feasibility of Manual Actions to Achieve Post-Fire Safe Shutdown"

request for an extension of the public comment period.
To Whom It may Concern,

Post fire concerns have been taken lightly at the NRC and continue to be taken lightly with a fire suppression Interim Notice that gives very little time to look at this important and neglected issue. I respectfully suggest that the NRC extends the comment period on this issue so that the American public does not see a cavalier and insouciant attitude on the part of the NRC too clearly.
