Subject: request for extension of public comment on rules affecting fires in nuclear stations

Chief, Rules and Directives Branch
Division of Administrative Services
Office of Administration
U.S. Nuclear Regulatory Commission

11/26/03

Regarding: "Interim Draft Criteria for Determining Feasibility of Manual Actions to Achieve Post-Fire Safe Shutdown"

68 FR 66501

I am writing to request a 30-day extension of the public comment period so that concerned parties may submit meaningful comments on fire protection regulations at nuclear power stations. Fire; nuclear reactor; safe shutdown; this is clearly a matter that effects our communities health and safety.
