Palisades Nuclear Plant Security Plan, Revision 49

Nuclear Management Company, LLC (NMC) is currently constructing an independent spent fuel storage installation (ISFSI) within the owner control area of the Palisades Nuclear Plant. To address the necessary security requirements, NMC has revised the Palisades Security Plan to include a Security Plan, Safeguards Contingency Plan, and Suitability, Training and Qualification Plan for the ISFSI. Two attachments comprise Revision 49 of the Palisades Nuclear Plant Security Plan. Attachment 1 contains a description of, and justification for, the changes included in revision 49. Attachment 2 contains one original and three copies of the revised pages of the Plan.

Based on current plans, spent fuel is scheduled to be stored at the ISFSI in late June 2004. It is our intent to implement the requirements of the ISFSI security plans approximately 30 days prior to that time.

NMC has determined that the changes contained in Revision 49 do not decrease the safeguards effectiveness of the Palisades Nuclear Plant Security Plan. Accordingly, this revision is submitted under the provisions of 10 CFR 50.54(p)(2).

**ATTACHMENT CONTAINS SAFEGUARDS INFORMATION  
WITHHOLD FROM PUBLIC DISCLOSURE**

Information contained in the attachments to this document has been classified as safeguards information. Therefore, NMC requests that this information be withheld from public disclosure in accordance with 10 CFR 73.21(c).
