Re: Docket No. 70-925; License No. SNM-928
License Amendment Request – Condition 27(e)

Dear Mr. Kalman:

In a letter dated August 19, 2003, Cimarron Corporation (Cimarron) requested that condition 27(e) be revised. That letter stated, "*Cimarron agrees with NRC staff and requests that license condition 27(e) be amended to prevent future misinterpretation by removing the phrase, ", and associated procedures" from the first paragraph, and by removing the phrase "in the procedures presented" from section 1(b) of license condition 27(e).*"

NRC has notified Cimarron that license SNM-928 contains no provision requiring that the Radiation Safety Officer review and approve procedure associated with the Site Decommissioning Plan and/or the Radiation Protection Program. Cimarron understands that this is one of the reasons that NRC included procedures in license condition 27(e). To ensure that the previously requested changes satisfactorily address NRC's concerns regarding this issue, Cimarron requests that the following sentence be added to license condition 27(e) as paragraph 4: "All radiation protection program procedures or revisions to these procedures shall be approved by the Radiation Safety Officer."

If you have questions or comments, please call me at 405-282-5680, ext. 120 (Cimarron) or 918-223-2522 (Cushing).

Sincerely,

Jeff Lux
Project Manager

xc: D. Blair Spitzberg, NRC Region IV
