MEMO TO FORTUNA FROM JPEARRING

- 1 -

MEMORANDUM TO: Shirley Fortuna
Systems Engineering and Evaluation Branch, HLWM

FROM: Jerome Pearring
Technical Review Branch, HLWM

SUBJECT: COMMENTS ON PROJECT MANAGER'S PERIODIC REPORT ON
ACTIVITIES OF THE CENTER, DATED APRIL 28, 1988.

The subject report was reviewed by Dr. Kien Chang, Mr. John Buckley and I. Emphasis of our review was directed toward Item 6 - "Engineered Barrier System" and Item 9 - "Repository Design, Construction and Operation," which pertain to areas for which we have assigned management responsibility.

The comments of Dr. Chang and Mr. Buckley are attached. As is evident from the comments, we now consider the level of detail contained in the report to be adequate to meet our needs given the nature of technical work in progress. As time progresses, and work of a more detailed technical nature related to the EBS and RDCO program elements is undertaken by the Center, more technical details will be desired. Every consideration within the Constraints of the contract that the Center can give to an appropriate method of providing desired additional technical information, such as those recommended by Dr. Chang and Mr. Buckley, will be appreciated.
