Edwin I. Hatch Nuclear Plant  
License Amendment  
Withdrawal of Request for Delay in Implementation of the  
Hatch Unit 1 Measurement Uncertainty Recapture Power Uprate

Ladies and Gentlemen:

By letter dated December 19, 2002, Southern Nuclear Operating Company (SNC) submitted to the NRC a license amendment request for the Edwin I. Hatch Nuclear Plant Units 1 and 2 Measurement Uncertainty Recapture Power Uprate. On September 23, 2003, the NRC issued Amendment No. 238 to Renewed Facility Operating License DPR-57 and Amendment No. 180 to Renewed Facility Operating License NPF-5 for the Edwin I. Hatch Nuclear Plant Units 1 and 2. The license amendments were effective on the date of issuance and were required to be implemented within 90 days of issuance.

On December 11, 2003, SNC requested a delay in implementation of the Unit 1 amendment due to recently discovered fuel leakers that forced an adjustment of the control rod pattern to suppress the power in those fuel assemblies. The Unit 2 amendment has already been implemented. Subsequent to submittal of the letter requesting a delay, SNC obtained clarification from the NRC staff regarding implementation. As a result of that clarification, SNC hereby withdraws the December 11, 2003 letter delay request.
