Subject: Fwd: ANO backfit claim

Charlie,

I sent my draft ANO response letter to Karla on Nov 26. I just received the attached from Robert Gramm. I could respond to Bob separately, and we could get on with the panel, or I could incorporate my response into the draft ANO response letter before Karla sends it out to the panel. I believe I have addressed these issues in the draft, but could make some changes to specifically address these concerns. Your thoughts?

It will take about a day to research his references and revise the draft. I won't be back in the ofc until Friday afternoon. After that, I'll be out of the ofc until Dec 18. I can cancel one day of AL and come in on Dec 17. I could try to do this at night here at Sequoyah, but I don't have any of the documents that he quotes.

I do have a question regarding his concern #1 (this is probably the most important one to address) Do

*What was the result?*

[REDACTED]

We had a backfit claim from CPSES a few years ago, where a project mgr from NRR performed an inspection that apparently approved CP's use of temp mods (I think). DRS inspectors (Mike Runyan) later identified a violation concerning the mod program, that CPSES claimed was a backfit, because of the NRR PM's inspection report. It took a long time to get through this one. Tony Gody was involved in the backfit analysis.
