SHEARON HARRIS NUCLEAR POWER PLANT, UNIT NO. 1
DOCKET NO. 50-400/LICENSE NO. NPF-63

**PARTIAL WITHDRAWAL OF LICENSE AMENDMENT REQUEST REGARDING
ADMINISTRATIVE REVISION TO THE TECHNICAL SPECIFICATION INDEX**

Ladies and Gentlemen:

On February 14, 2003, Progress Energy Carolinas (PEC) requested a license amendment for the Harris Nuclear Plant (HNP) to allow an increase in the decay heat load from fuel stored in Spent Fuel Pools C and D in Technical Specification 5.6.3.d. (TAC Number MB7736). In a letter dated November 10, 2003, Harris Nuclear Plant (HNP) provided the NRC with additional information regarding Progress Energy's use of the ORIGEN2 code to calculate decay heat, respond to requests from the NRC received by e-mail on September 23, 2003, and to request additional changes to Technical Specification pages to accommodate an administrative update of the Technical Specification Index. HNP desires to withdraw the request of the additional changes to Technical Specification pages to accommodate an administrative update of the Technical Specification Index, included as Attachment C to the November 10, 2003 letter.

In accordance with 10 CFR 50.91(b)(1), HNP is providing the State of North Carolina with a copy of this letter.

Please contact me with any questions regarding this partial withdrawal at (919) 362-3137.

Sincerely,

John R. Caves,
Supervisor, Licensing/Regulatory Programs
