Nils Diaz
Chairman
Nuclear Regulatory Commission
1 White Flint N. Bldg.
11555 Rockville Pike
Rockville, MD 20852

Dear Chairman Diaz:

I am writing to you to urge that the Nuclear Regulatory Commission undertake an emergency inspection of Diablo Canyon Nuclear Power Plant. I am concerned that the 6.5 magnitude earthquake which struck the area yesterday may have caused damage to the plant that has not yet been detected.

I have been advised that a serious earthquake could cause structural damage to the underlying foundation of the plant's reactors. I request that, as part of your work, you inspect the foundation as well as the cooling tubes and other piping in the facility.

I am sure that Californians would feel more secure knowing that the Diablo Canyon plant has been inspected. It is important to rule out any damage and therefore any increased risk that may have been caused by the earthquake.

I urge you to act quickly. We must ensure that all facilities are safe. I will contact you in the next few days.

Sincerely,

Barbara Boxer
