Mr. Dennis K. Rathbun  
Director  
Nuclear Regulatory Commission  
Office of Congressional Affairs  
Washington, D.C. 20555-0001

Dear Mr. Rathbun:

I am forwarding to you a copy of a letter from S.K. Ho concerning his request for a contact in your office to discuss WebEyeAlert.

It is the desire of this office to be responsive to all inquiries and communications. I respectfully ask for your assistance in resolving the issues outlined in this correspondence.

Please forward a copy of your findings to Mark S. Sternman of my Boston office.

I thank you for your cooperation in this matter.

Sincerely,

John F. Kerry  
United States Senator

١٠ ٢٢ ٢٠٠٢  
OCT 22 2002

Dear Senator Kerry:

Security has become a major concern for all Americans. The people look to the government to provide protection. Faced with the unique challenges of our era, it would seem prudent for government agencies to implement the most effective security technologies, while making the most efficient use of taxpayers' dollars.

Many of our country's greatest innovations have been developed by smaller companies. In that vein, our company, WebEyeAlert, has developed an innovative technology platform that offers the potential to significantly – and cost-effectively – improve security capabilities. Yet, as a relatively small company, we are concerned that we may be overlooked by large government agencies that could benefit significantly from our technology.

Our company provides a unique networked digital video surveillance system that is capable of integrating video data from many sources. By providing a central repository for managing and distributing that data, our system can facilitate a rapid coordinated response to critical situations. While there are many video and security products in the marketplace that perform specific, dedicated functions, many of these are proprietary solutions that do not integrate well with other solutions. There are few that provide the systematic approach to managing and accessing video data that ours does. Furthermore, WebEyeAlert provides a cost-effective solution that can be implemented in a short period of time.

While we are a small company, we are very experienced. WebEyeAlert is a division of Biscom, a privately-held company based in Chelmsford, Massachusetts. We have grown profitably for fifteen years and provide critical information technology infrastructure components to some of our nation's largest companies. We have an experienced management team and a passion for providing excellent technology and customer service.

We believe that many agencies would benefit from learning more about our capabilities. Because we are small and lack contacts within the government, we are writing to you to ask for your advice on how to approach such agencies. We would greatly appreciate any efforts you can make on our behalf.

Sincerely,

S.K. Ho  
President and C.E.O.  
WebEyeAlert, a division of Biscom, Inc.
