

JANUARY 22, 2000 PICTURES BEHIND ECRB SEALED BULKHEADS**Pictures between Bulkhead 1 and Bulkhead 2 (Stations 17+63 to 25+00)**

Pic#1 and 2 (Station 19+00) moisture on insulated electric lines and base of ventilation line.

Pic#3 (Station 22+50) moisture on base of ventilation line.

Pics#4 and 5 (Station 22+93) fist to plate-size puddles of water on conveyor belt. Puddles appear to correspond with location of overlying rock bolts (Pic#5).

Pic#6 and 7 (Station 23+20) moisture on base of ventilation line and small puddles on conveyor belt.

Pic#8 (Station 23+35) evidence of rust on top of steel utility lines (left rib of tunnel).

Pic#9 (Station 23+48) when bulkhead previously opened (July 2000) this section of conveyor belt was wet and covered with mold. Now only blotches or faint trace appear where mold previously occurred and conveyor belt relatively dry.

Pic#10 (Station 24+65) drip cloths previously installed from 24+65 to Bulkhead 2.

Pic#11 (Station 24+80) mold growth in grease on conveyor belt roller.

Pictures between Bulkhead 2 and Bulkhead 3 (Stations 25+00 to 26+00)
(Drip Cloths previously hung from 25+00 to 26+00 except for ~10 meter gap at 25+62)

Pic#12 (Station 25+30) water droplet clinging to drip cloth.

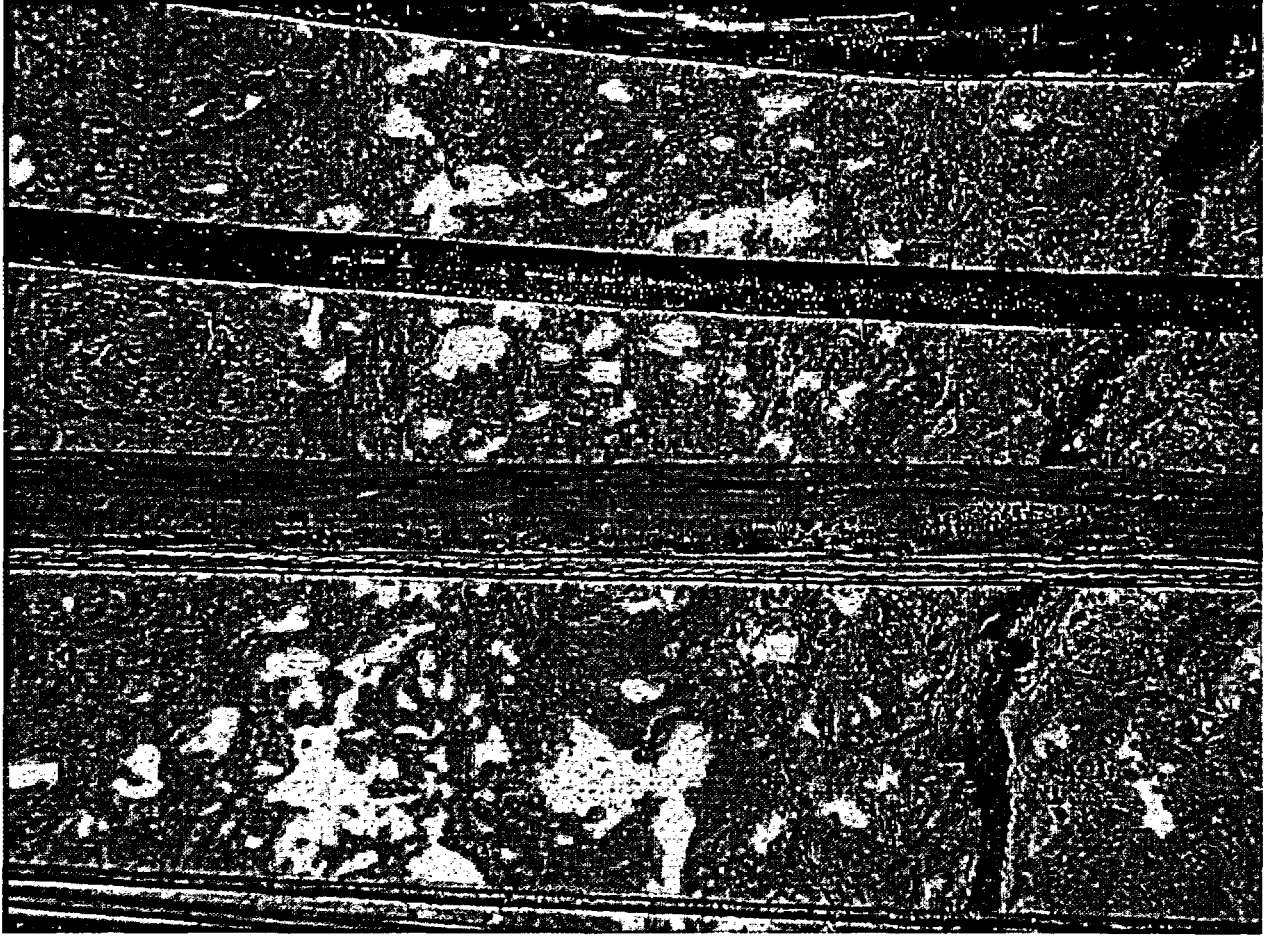

Pic#13 (Station 25+30) saturated drip cloth with rust colored lines that appear to correspond with corrugated ridges of vent line (above drip cloth and out of view).

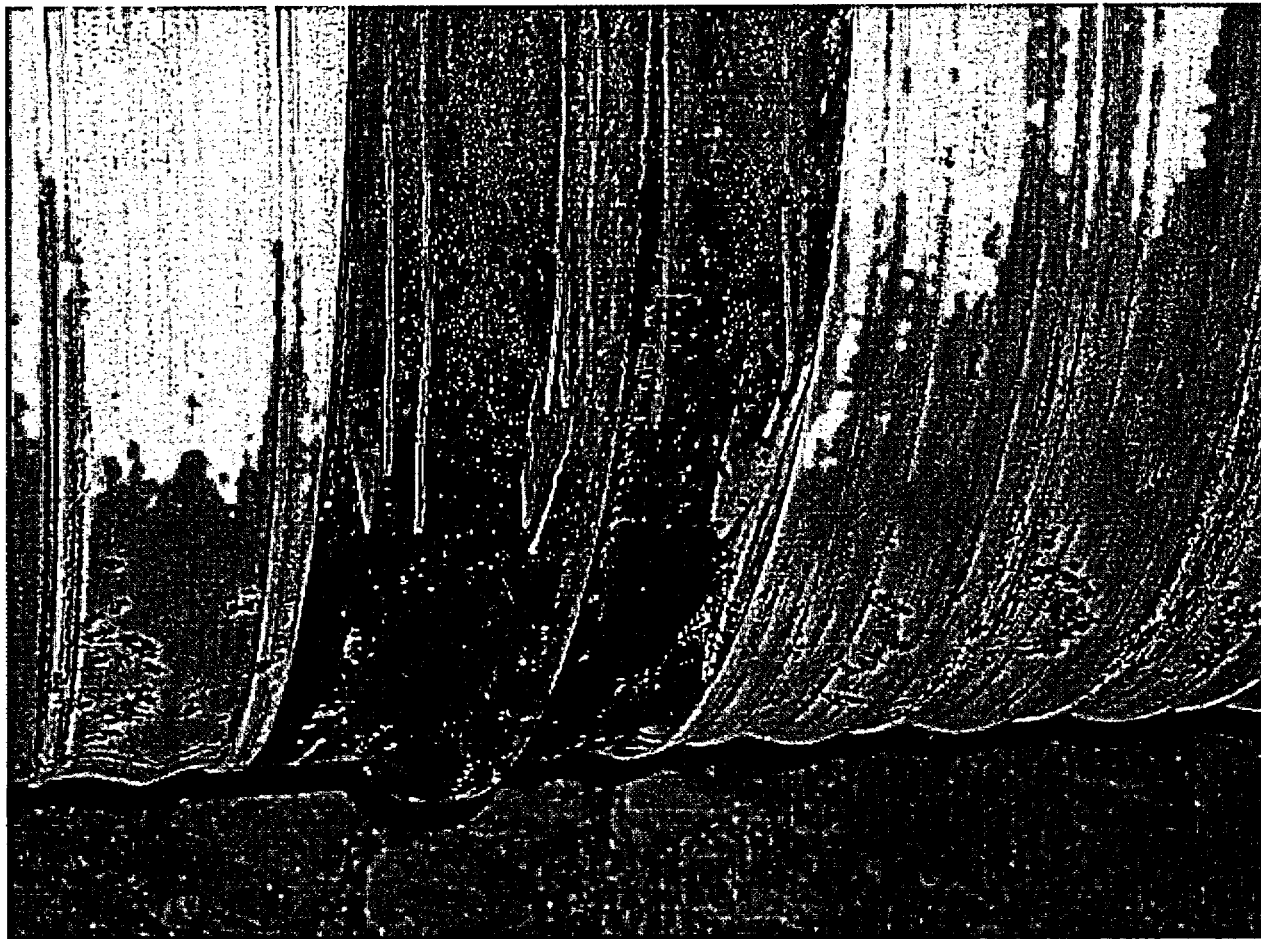

Pic#20 (Station 25+37) saturated drip cloth filled with small rocks which have fallen from tunnel crown.

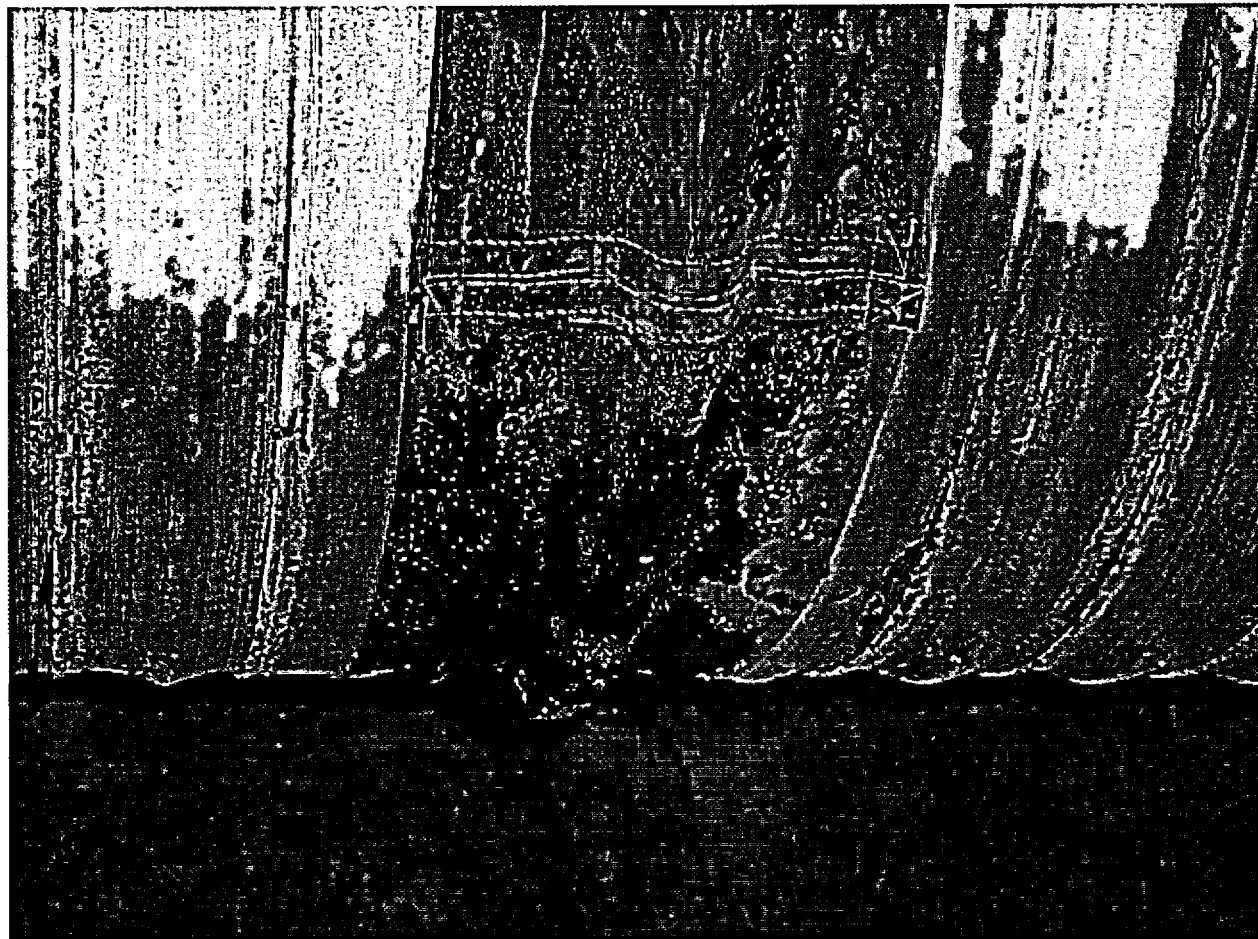

Pic#14 and 15 (Station 25+85) view of Solitario Canyon Fault (Pic#14 right rib, Pic#15 left rib).

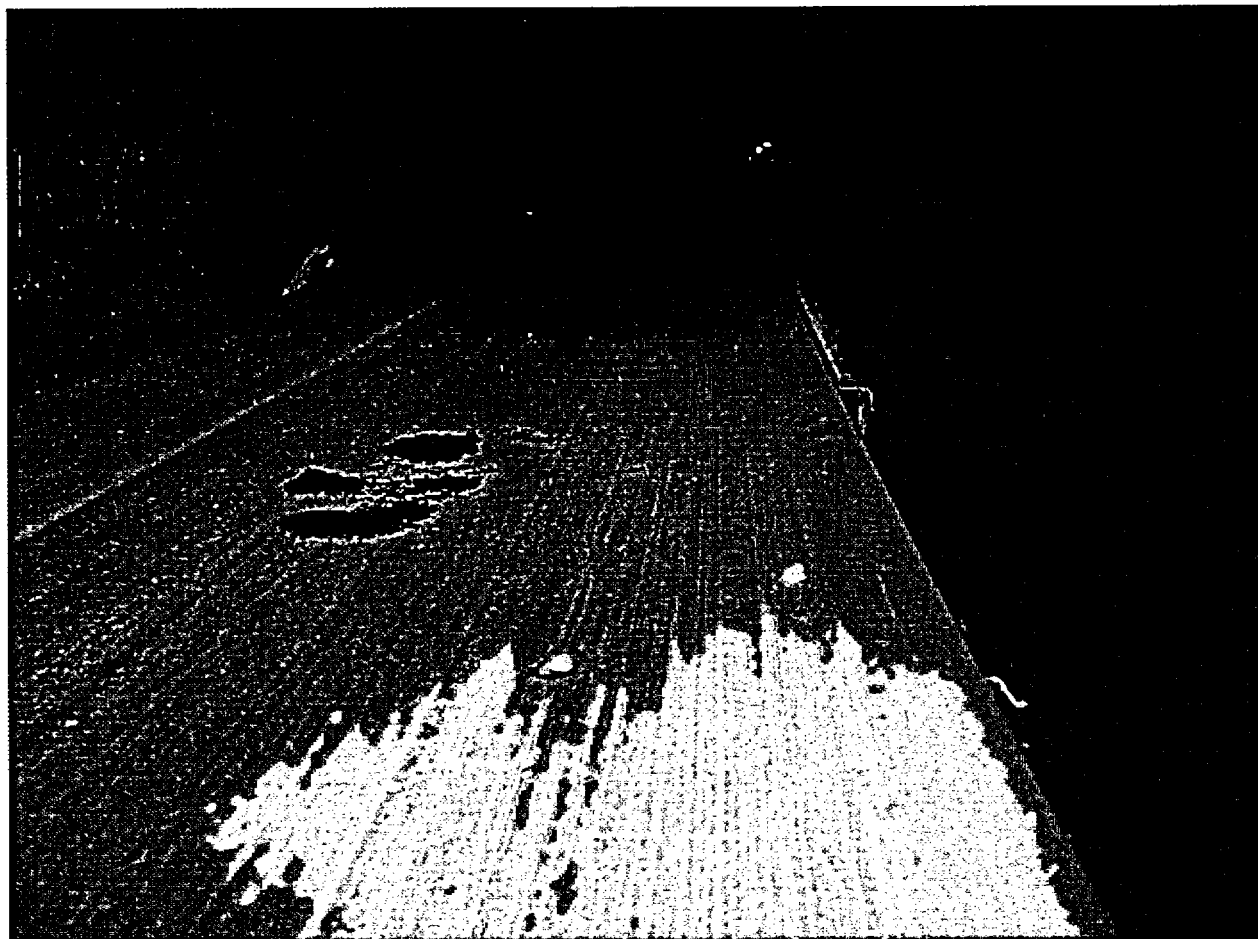

Pictures from Bulkhead 3 looking to Tunnel Boring Machine (Station 26+00 to TBM)

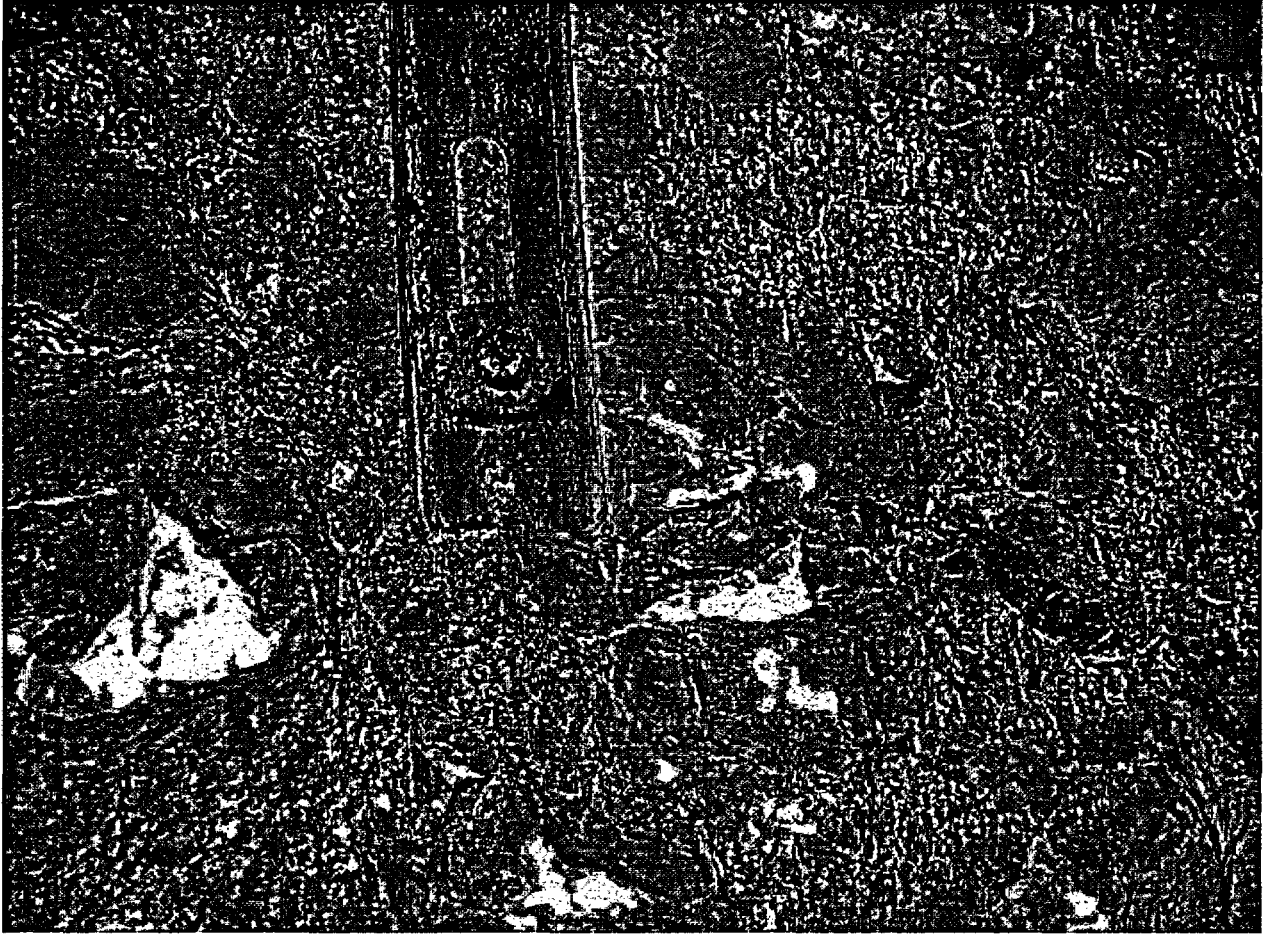

Pics#16,17,18 and 19 (Pic#16 rear of TBM, Pic#17 left rib, Pic#18 right rib, Pic#19 floor)
